PLEASE NOTE:

Photos and illustrations are for inspiration only.
Not all product configurations are available in all countries.

Window blind cords are a strangulation hazard for young children.
Consult your dealer or store associate for cordless products, or products with inaccessible cords. Remove this product immediately if a cord longer than 22 cm, or a loop exceeding 44 cm, becomes accessible.

VEUILLEZ NOTER :

Les photos et les illustrations ne sont offertes qu'à titre d'inspiration.
Toutes les configurations de produits ne sont pas disponibles dans tous les pays.

Les cordons pour store de fenêtre représentent un risque d'étranglement pour les jeunes enfants. Consultez votre dépositaire ou un associé de magasin pour des produits sans cordon ou des produits dont les cordons ne sont pas accessibles. Retirez ce produit immédiatement si un cordon mesurant plus de 22 cm de longueur ou une boucle dépassant 44 cm deviennent accessibles.

GRABER®

JUNE 2023

Features

Mezzanine Layered Shades

- Dual layers of horizontal fabric segments alternating between sheer and semi-opaque or opaque fabric
- When open and the vanes are aligned, light filters through the sheer fabric
- Shades control the amount of incoming light and the view-through with the shade partially raised or lowered

Features	Benefits
Continuous-Loop Lift	<ul style="list-style-type: none"> • Cord and clutch system makes raising and lowering shade easy • Cord remains at same length, regardless of shade position • Choose left or right cord location • Color coordinated cords <ul style="list-style-type: none"> • For Canadian orders, cord color is Bamboo only, and shrouded continuous loop lift is opaque. • Choose from six colors of hembar <ul style="list-style-type: none"> • Hembar color selected is also used for cassette end caps and cord guide
Motorized Lift	<ul style="list-style-type: none"> • Window treatments can be operated from virtually anywhere in the home • Easily operate hard-to-reach or large window coverings • Operate multiple window treatments simultaneously or individually
Fabric-Wrapped Cassette	<ul style="list-style-type: none"> • Fabric-wrapped cassette (standard) creates a cohesive appearance in the window
Warranty	<ul style="list-style-type: none"> • Limited lifetime warranty and five-year warranty on motorization components

BAND SIZE DETAILS: Small 2.76" - 3.07"/ 70mm-78mm Large 3.94"/100mm Extra Large 4.72"/120mm

Features

Light Control and Privacy

Transparent: Allows the most amount of light into the room for a minimum amount of privacy and a view to the outside. Objects in the room can be seen quite clearly through shades.

Privacy Level: Minimum.

Light Filtering*: Allows light to gently filter through and provides privacy. Images and shapes may be seen through these shades, but details are not visible. Deep fabric colors provide moderate light control, while light colors provide lower light control. **Privacy Level:** Moderate.

Room Darkening*: Allows some light to filter into the room and provides privacy. Objects in a lit room seen through these shades appear as vague shapes. Deep fabric colors darken a room; light colors filter and diffuse bright sunlight.

Privacy Level: Maximum.

*These fabrics are translucent and their colors may be influenced by changing light conditions. Colors may appear to vary depending upon the time of day and type of lighting, as well as whether the shade is partially or fully lowered.

Features

Fabric Recommendations

Order all shades for the same room at the same time to ensure color consistency and to minimize dye lot variation. For side-by-side layered shades, request stripe alignment. Stripes can be aligned to within ¼".

NOTE: Shades must be ordered at the same time with the same fabric and height. To ensure best results, the combined shade width should be 102" or less.

Light Gap

The fabric width is narrower than the finished shade width of the tube and its components. For optimal light and glare control, outside mount is recommended, or you may add a secondary soft window treatment (drapery or curtain) to hide the light gap on an inside mount. See chart below for light gap.

Control Type	Control End		Idle End	
	Inside Mount (inches)	Outside Mount (inches)	Inside Mount (inches)	Outside Mount (inches)
Continuous-Loop Lift	1	1 ⁵ / ₁₆	¾	1 ¹ / ₁₆
Motorized Lift	1 ¹ / ₁₆	1	¾	1 ¹ / ₁₆

Fabric Disclaimers

Due to the nature of the weaving process, some imperfections or spacing in the weave are normal. Fabric appearance can vary based on changing light conditions in the room.

When the sheer fabric bands are aligned, it may cause a slight moire effect which will cause a diffused view through.

Due to the weave and the nature of the dual fabric configuration, the front fabric may sometimes appear to wave or bow. This deflection may be more apparent in certain fabric collections and in wider width shades. This is not a defect but is inherent to the construction of the shade.

Cleaning and Care Information

Regular light dusting with a feather duster, vacuum with low suction, or a hair dryer on a cool temperature.

Fabric Certifications

GREENGUARD Indoor Air Quality Certified® Fabrics: Many Graber® fabrics have been certified by GREENGUARD Environmental Institute (GEI) to be low chemical- and particle-emitting fabrics, which provides a healthier indoor air quality. The process used for certification complies with established indoor air quality standards and is performed by a third party lab. Please see baliblinds.com for more information.

Oeko-Tex® Standard 100 certifies that our fabrics are free of halogen, lead, formaldehyde, allergenic dyes, pesticides, phenols, and heavy metals, and meets all VOC content limits.

Options

Shade Options (for surcharges and pricing refer to price charts)

Below is a list of options for layered shades. All options are available in all styles and colors. See detailed descriptions on the following pages.

Control Type Options

- Continuous-loop lift
- Motorized lift (see motorization product information guide)

Shade Options—No Charge

- Bay and corner windows
- Cord length (must specify different length)
- Cord location
- Projection brackets 3¼" and 4"
 - 3¼" projection brackets add up to 2⅛" extension from wall
 - 4" projection brackets add up to 2⅞" extension from wall

Shade Options—Surcharge

- Motorization (see motorization product information guide)
- Palladian window shelf (see cornice, valance, and palladian window shelf product information guide)

Projection Brackets

- **No charge**
- Available with continuous-loop lift, and motorized lift with cassette on outside mount
- Two sizes: 3¼" and 4"
- 3¼" projection brackets add up to 2⅛" extension from wall
- 4" projection brackets add up to 2⅞" extension from wall

Options

Continuous-Loop Lift

- **Standard**
- Cord loop and clutch system makes raising and lowering shade easy
- Special cord loop length must be requested at time of order
- Cord remains at same length regardless of shade position
- Color coordinated cord loop and cord guide
- Safety cord guide provides the ability to keep the cord out of the reach of children and pets to enhance safety
- Choose left or right cord location
- Outside mount is recommended for maximum light control

NOTE: Cord guide must be installed to operate shade.

Inside Mount Light Gap
Refer to Light Gap Chart

- For Canadian orders, cord color is Bamboo only, and shrouded continuous loop lift is opaque. See image pictured left.

Motorized Lift

- See motorization product information guide for accessories, additional options, sizing, and pricing
- In the down position, the shade will be closed
- Allows for easy operation of hard-to-reach or large window coverings
- Efficiently manages energy (heat gain and loss)
- Motorized lift shades are cordless and are a safer choice for homes with children or pets
- Low-voltage motorization requires no costly electrical hardwiring
- Available with various power and control options; refer to the motorization product information guide for available options
- Motor located on the left or right side; standard on the right

NOTE: Motorization components and accessories have a five-year limited warranty, excluding batteries.

Options

Corner Windows

Shades on Corner Windows

- **No charge**
- Made as individual shades
- Each shade will have its own control; we recommend opposite corners
- Indicate for each shade whether butt or bypass
- Bypass shade is mounted into the corner; butt shade is butted to the other shade
- Manufacturer will take appropriate deductions for proper fit; **DO NOT** order as a corner shade if you do not want manufacturer to take deductions

Measuring Information

Mounting on a Wall or Molding:

Measure the width of each window from the corner on the mounting surface (molding or wall) to the point you would like to cover.

Mounting Above the Molding:

Measure the width of each window from the corner on the mounting surface to the point you would like to cover.

Projection measurement is the distance needed to clear any molding or obstructions that the shade will be mounted above.

NOTE: The projection (P) distance is needed to correctly calculate deductions for installations where the shades will use shims or projection brackets to clear molding. All projection distances must match for correct deductions to be calculated.

Adjacent Shadings

To cover wide window openings, shadings may be installed adjacently so ends of the cassette headrail touch. The gap between the fabric panels of the adjacent shadings varies according to the control placement as shown in the table.

Control Placement for Adjacent Shades			
Control Placement		Gap	
Left Shade Control	Right Shade Control	Continuous-Loop Lift (inches)	Motorized Lift (inches)
Right	Right	1 $\frac{1}{4}$	1 $\frac{1}{16}$
Left	Left	1 $\frac{1}{4}$	1 $\frac{1}{16}$
Right	Left	2	2
Left	Right	1 $\frac{1}{2}$	1 $\frac{3}{8}$

Side-by-Side Alignment

Stripe alignment to within $\frac{1}{4}$ " is available upon request only for shades ordered at the same time with the same fabric color and height. Add note in special instructions. To ensure best results, the combined shade width should be 102" or less.

Options

Bay Windows

Shades on Bay Windows

- **No charge**
- Made as individual shades
- Each section will have its own control
- Manufacturer will take appropriate deductions for proper fit; **DO NOT** order as a bay window shade if you do not want manufacturer to take deductions

Measuring Information: Three-Sided Bay Window

Measure:

L and R: Width of each side window from the corners on the mounting surface to the point you would like to cover.

C1: Width of the center window on the mounting surface from corner to corner.

Angle L-C1: Angle between the (L) and (C1) windows.

Angle C1-R: Angle between the (C1) and (R) windows.

Projection: If needed: the depth of the trim or molding the shade will be mounted above.

Measuring Information: Four-Sided Bay Window

L and R: Width of each side window from the corners on the mounting surface to the point you would like to cover.

C1, C2: Width of each center window on the mounting surface from corner to corner.

Angle L-C1: Angle between the (L) and (C1) windows.

Angle C1-C2: Angle between the (C1) and (C2) windows.

Angle C2-R: Angle between the (C2) and (R) windows.

Projection (P): If needed: the depth of the trim or molding the shade will be mounted above.

NOTE: The projection (P) distance is needed to correctly calculate deductions for installations where the shades will use shims or projection brackets to clear trim or molding. All projection distances must match for correct deductions to be calculated.

For additional windows on bays with up to five sides continue with number progression for center shade sizes (C1, C2, C3, ...) and angles (angle C1-C2, angle C2-C3, ...) as needed.

Measure each bay angle using a protractor or angle finder or use two business cards in each bay corner as illustrated above, trace on paper, and fax to customer service.

The angle to use between adjacent center bay windows along a straight section of wall is 180° (degrees).
