- **For surcharge, see price charts**
- Available with the privacy liner option on single panels of fabric (no overlap)
- Cordless lift shades are the safest window shade alternative; ideal for homes with children and pets
- Overlap not available with Debonair, Grasscloth, Inkblot, Marina, Prescott, Sahara Ridge, Spring Bloom, or Terrain
- Suggested use on windows where consumers can comfortably raise and lower the shade with their hand (bottom up/top down cord lift shade is recommended for hard-to-reach windows)
- Sky poles are not recommended; however, if required, two sky poles should be ordered to ensure even operation
- Room-darkening side channels are available:
  - Surcharge (see price charts)
  - 2" pleated only
  - Available in cord lift and cordless lift
  - Side channels are Canyon Gray 053, Cream 715, Creamy Pearl 356, Revere Pewter 190, Sable 565, or White Satin 205

**NOTE:** See cordless size considerations chart for fabric specific limitations.

## Control Type and Size Considerations

### Sun Up/Sun Down Cordless Lift

- **Price as two separate cord lift shades from price charts and add one cordless lift surcharge for total cost**
- Perfect for combining light controls of sheer or light-filtering and room-darkening fabrics
- Available with 1" or 2" pleated fabrics
- Cannot combine 1" and 2" pleat sizes
- Headrail coordinates with top fabric, bottomrail coordinates with bottom fabric, and midrail will match headrail as a default
- Overlap not available
- Cordless lift shades are the safest window shade alternative; ideal for homes with children and pets
- Suggested use on windows where consumers can comfortably raise and lower the shade with their hand (bottom up/top down standard cord control shade is recommended for hard-to-reach windows)

# Control Type and Size Considerations

## Continuous-Loop Lift

- For surcharges, see price charts
- Recommended for larger, heavier shades
- Larger shades use a geared clutch for easier lifting, but additional pulls are required to lift the shade
- A single continuous-loop cord raises and lowers the shade and keeps the cord the same length
- Safety locking cord guide included; cord guide must be installed for shade operation

**NOTE:** When ordered as multiple shades on one headrail, there can be either one or two controls. A single control on the left or right can be used on shades up to 120" wide to operate all panels. With two controls, the left control operates the left panel and the right control operates the right panel. For three panel shades, specify middle panel as control right or control left. Continuous-loop controls cannot be located in the middle of a headrail.

### Perfect-Vue® Cord Lift

- **For pricing, see price charts**
- Perfect for combining light controls of sheer or light-filtering pleated fabric with blackout cellular fabrics
- Standard control is right control—operates bottomrail, while left control operates intermediate rail (can be reversed)
- 1" pleated can be combined with  $\frac{3}{16}$ " single cell cellular fabrics only
- 2" pleated can be combined with  $\frac{1}{2}$ " double cell or  $\frac{3}{4}$ " single cell cellular fabrics only
- Headrail coordinates with top fabric and bottomrail coordinates with bottom cellular fabric
- Midrail will match headrail as default, however, can specify to match bottomrail at time of order
- Product will have one or more cord release devices in compliance with ANSI/WCMA safety standards
- Midrail cord includes a cord release device

### Perfect-Vue® Cordless Lift

- **For pricing, see price charts**
- Perfect for combining light controls of sheer or light-filtering pleated fabric with blackout cellular fabrics
- Cordless lift shades are a safer alternative to shades with accessible cords that are traditionally used to operate window coverings; ideal for homes with children and pets
- 1" pleated can be combined with single cell cellular fabrics only
- 2" pleated can be combined with ½" double cell or ¾" single cell cellular fabrics only
- Headrail coordinates with pleated top fabric; bottomrail coordinates with bottom cellular fabric; midrail will match headrail as default; not available with multiple shades on one headrail
- All Perfect-Vue cordless lift shades need to be used on windows where consumers can comfortably raise and lower the shade with their hands and have easy access; very high windows should use the cord lift option, rather than cordless lift; operation of shade requires both sets of handles be used to properly raise and lower rails
- Sky poles not recommended; however, if required, two sky poles should be ordered to ensure even operation

## Shade Liner

Liner on backside of shade

- For surcharge, see price charts
- Available on select styles with standard cord control, continuous-loop, and motorized lift systems
- Privacy liner is available with cordless lift as a single panel only (no overlap)
- Creates neutral to the street side appearance
- Create room-darkening effects by adding a blackout liner
- FashionPleat® privacy and blackout liner are not available as a shade alone
- Due to construction of shade, light will filter through the route holes even with a blackout liner

### Optional liners increase privacy and light control.

**Privacy:** Allows a small amount of light to enter the room for a greater sense of privacy. Inside objects appear as shadows.

**Blackout Liner:** Prevents light from entering for a high level of light control with maximum privacy, preventing even silhouettes from showing through. Due to construction of the shade, light will filter through the route holes even with blackout liner.

**NOTE:** For shade widths greater than fabric width and heights up to 60", the liners will overlap at the same location as the fabric overlap. For shade widths greater than fabric width and heights over 60", the liners will overlap in the center of the shade. Maximum finished shade width limited to 142" for 1" fabrics and 140" for 2" fabrics.

## Motorized Lift

### • Refer to motorization product information guide for additional options, sizing, and pricing

- Window treatments can be operated from virtually anywhere in the home
- Provides easy operation of hard-to-reach or large window coverings
- Efficiently manages energy (heat gain and loss)
- Operate multiple window treatments simultaneously or individually
- A safer alternative to accessible cords that are traditionally used to operate window coverings; ideal for homes with children and pets
- Easily integrated with home automation systems
- Low voltage motorization requires no costly electrical hardwiring
- Multiple control and power options available, see motorization product information guide for options
- Boost room-darkening performance by reducing light leakage between the window and headrail by adding a lightblocking strip at no additional surcharge

**NOTE:** Motorization components and accessories have a five-year limited warranty, excluding batteries.

## Corner Windows

- **No charge**
- Made as individual shades
- Each shade will have its own control; we recommend opposite corners
- Indicate for each shade whether left or right and butt or bypass
- Bypass shade is mounted into the corner; butt shade is abutted to the other shade
- Manufacturer will take appropriate deductions for proper fit; **DO NOT** order as a corner shade if you do not want manufacturer to take deductions
- **Cornices are not available on corner windows**
- For bottom up/top down and sun up/sun down cord lift shades, the corner controls will be hard to reach

### Measuring Information

#### Mounting on a Wall or Molding:

Measure the width of each window from the corner on the mounting surface (molding or wall) to the point you would like to cover.

#### Mounting Above the Molding:

Measure the width of each window from the corner on the mounting surface to the point you would like to cover. Projection measurement is the distance needed to clear any molding or obstructions that the shade will be mounted above.

**NOTE:** The projection (P) distance is needed to correctly calculate deductions for installations where the shades will use shims or projection brackets to clear molding. All projection distances must match for correct deductions to be calculated.

## Bay Windows

Shades on Bay Windows

- **No charge**
- Made as individual shades
- Each section will have its own control
- Manufacturer will take appropriate deductions for proper fit; **DO NOT** order as bay window shade if you do not want manufacturing to take deductions
- For bottom up/top down and sun up/sun down with cord lift the corner controls will be hard to reach
- **Cornices are not available on bay windows**

### Measuring Information: Three-Sided Bay Window

**Measure:**

- L and R:** Width of each side window from the corners on the mounting surface to the point you would like to cover.
- C1:** Width of the center window on the mounting surface from corner to corner.

- Angle L-C1:** Angle between the (L) and (C1) windows.
- Angle C1-R:** Angle between the (C1) and (R) windows.
- Projection:** If needed: The depth of the trim or molding the shade will be mounted above.

### Measuring Information: Four-Sided Bay Window

- L and R:** Width of each side window from the corners on the mounting surface to the point you would like to cover.
- C1, C2:** Width of each center window on the mounting surface from corner to corner.

- Angle L-C1:** Angle between the (L) and (C1) windows.
- Angle C1-C2:** Angle between the (C1) and (C2) windows.
- Angle C2-R:** Angle between the (C2) and (R) windows.
- Projection (P):** If needed: The depth of the trim or molding the shade will be mounted above.

**NOTE:** The projection (P) distance is needed to correctly calculate deductions for installations where the shades will use shims or projection brackets to clear trim or molding. All projection distances must match for correct deductions to be calculated. For additional windows on bays with up to five sides continue with number progression for center shade sizes (C1, C2, C3, ...) and angles (Angle C1-C2, Angle C2-C3, ...) as needed. Measure each bay angle using a protractor or angle finder or use two business cards in each bay corner as illustrated above, **trace on paper**, and fax to customer service. **The angle to use between adjacent center bay windows along a straight section of wall is 180° (degrees).**

- Perfect quarter circle is where height and width are equal
- For inside mount, measure inside of window frame; for outside mount, add the desired amount of overlap to your measurements
- Include width and height measurements on all orders
- Side mount available up to 60" wide exact
- Liner available if fabric allows

**Non-Perfect Arches** (require a template)

- **For surcharges, see price charts**
- Non-perfect arches are those where the radius of the circle is NOT constant at all points; height is not exactly half the width
- Include width and height measurements on all orders
- For inside mount, measure inside of window frame; for outside mount, add the desired amount of overlap to your measurements
- See template instructions
- Side mount available up to 60" wide exact
- Liner available if fabric allows

**NOTE:** Arches can be made in EvenPleat® fabrics, however they will not have the back loop tape.

### Making a Template for Specialty Windows

1. Tape butcher paper or heavy brown wrapping paper over the window opening allowing plenty of overlap.
2. Being careful not to press against the template paper while tracing, draw an exact outline of the window opening. Pressing on the template paper may distort the paper and cause the wrong size to be made.
3. Remove the paper from the window opening. If the shade is an outside mount, add the desired amount of overlap to the window outline. Draw a second outline around it to match the shape of the finished shade. **Be sure to erase the inside line.**
4. Mark the dimensions on the template. Check that the template dimensions match your measurements of the actual window opening.

**NOTE: Make sure the template is of the window opening, not the measurement of the glass only.**

5. Cut the shape from the paper.
6. **PLACE THE TEMPLATE BACK INTO THE WINDOW OPENING TO CHECK FOR PROPER FIT.**
7. **Indicate on the template:**
  - “Room side” and “top”
  - Purchase order number
  - Customer’s name
  - Your store name and account number
8. Attach a copy of your purchase order to the template.
9. Roll up template and place in a mailing tube.  
**DO NOT FOLD TEMPLATE.**

**Mail to:** SPRINGS WINDOW FASHIONS, LLC  
1500 Sycamore Road—G5  
Montoursville, PA 17754  
ATTN: SPECIALTY DEPT

**NOTE:** When mailing, make sure to get a tracking number and note your return address on the mailing tube.

#### ACCEPTABLE MATERIALS FOR MAKING TEMPLATES

Kraft paper  
Butcher paper  
Construction paper

#### WE WILL NOT ACCEPT TEMPLATES MADE FROM THE FOLLOWING MATERIALS

Newspaper	Plastic
Wax paper	Fabric
Tissue paper	Roofing paper
Existing arch shades	Wrapping paper
Cardboard	Poster board

**NOTE:** If the material used to make a template stretches, tears easily, will not lay flat, or will mark the fabric, IT WILL NOT BE USED.

### Using a Template Service

**For surcharge, see price charts**

To use the template service, simply:

1. Select template service when entering your order online.
2. Use the template worksheet to determine what measurements you need to supply for each shape.
3. Enter the lettered measurements using line item comments. The comments have been pre-programmed to all of the measurements you need to enter for your special shape.

For additional information, contact customer service.

#### 1" and 2" Pleated

All stack calculations are with standard controls. For cordless, continuous-loop, and motorized lift controls, add ¾".

For bottom up/top down with standard controls, add ¼"; with cordless lift controls add 1½".

For sun up/sun down with standard controls, add the two fabric stacks together and subtract ⅞" for the total stack height.

For sun up/sun down with cordless lift controls, add the two fabric stacks together.

**NOTE:** Stack height includes headrail and bottomrail. The stack measurements above are approximate. All stack heights as shown are without overlap, for overlap add an additional 60% to the given height for total stack height.
