Fabric Considerations

Color Variation

- Fabric appearance can vary based on lighting and selected liner
- Fabric can fade gradually over time; fading can occur at a faster rate if exposed to direct sunlight
- Color may vary between dye lots; to ensure color consistency, please order draperies, shades, top treatments, and/or cut yardage at the same time
- If using contrast lining, it is recommended that the lining color be lighter than the primary fabric, or that interlining be used, to avoid color bleed through

Appearance

- Stretching and shrinking can occur; amounts will vary depending on climatic conditions
- Wrinkling is an inherent characteristic of natural fabrics; please be aware that products may have wrinkling; most wrinkles will fall out after product is hung; see content label on product for ironing and steaming recommendations
- Seamless Roman, relaxed Roman, and balloon style shades have small stitches (used to attach the cord rings), which may be visible on the front of the shade

Weight

- Due to fabric construction and weight variation, restrictions may apply; blackout and thermal liners are restricted on specific fabric and product styles due to weight; see fabric list for details
- Due to the lightweight and occasional open weave construction, all sheers, casements, and laces are only available in drapery, drapery style valances, and tiebacks; 60" wide sheers, casements, and laces are also available in scarves
- When choosing fabrics for banding and color blocking, it is important to keep the construction of the fabrics similar in weight and style to assure fabrics will hang well together
- Heavyweight fabrics and liners may require a modified header or hem construction
- Draperies and decorative panels in rod pocket style are not available with blackout liner

Liner Options

- Sheers, laces, and casement fabrics are available unlined only
- Standard: a polyester/cotton liner that drapes and hangs nicely; the most commonly used liner; standard on draperies, shades, and top treatments, excluding sheer fabrics
- Blackout: a polyester/cotton liner blocks light from entering the room through the fabric, making it an ideal choice for day sleepers, nurseries, and entertainment rooms; due to the multiple layers used in the construction of this liner, it will have a stiffer hand and there may be restrictions by product and fabric style; we have developed blackout solutions for our products, but due to stitching there may still be minimal light seepage
- Thermal: a cotton/polyester liner helps to block out excessive heat and cold; due to its thermal qualities, this liner will have a stiffer hand; an excellent choice for those interested in energy efficiency; due to the weight and stiffness there may be restrictions by product and fabric style
- Water repellent: a cotton/polyester liner that is treated to help protect the drapery fabric from dust and moisture; a great performance liner that hangs and drapes well; recommended for areas with high humidity such as bathrooms
- Flannel-back: a cotton liner with a brushed flannel back; recommended for light to medium weight fabrics to enhance the drape of the fabric and add protection; a great option for customers looking for some light control without blackout
- Interlining: a cotton flannel liner that is used between the main fabric and liner to add additional weight and protection; recommended for lightweight fabrics such as silk and silk blends; can be used with standard and water repellent liners

Swatches and Cut Yardage

- 5" x 7" swatches are available to order at no charge; limit 10 per order; dye lots may vary between swatches and production
- ½ yard memo samples are available to order at a surcharge for customers requiring a full repeat; dye lots may vary between memo samples and production
- Fabric by the yard is available for those customers who would like to make additional products not available in the program; minimum order is 1 yard; sold in 1 yard increments; dye lots may vary; not covered under warranty

Assembled in the USA

- All our soft products are hand crafted by artisans in the USA, assuring high quality and timely delivery

Fabric Considerations

Patterns

Prints and patterns may be interrupted at the center split when drapery pairs are ordered.

Fabrics with vertical stripes or prints will not have a consistent and uniform appearance from pleat to pleat or panel to panel on draperies. We recommend a plain top drapery style on a rod with rings to allow flexibility during installation.

Swags are cut on the bias. As a result, the direction of patterns (stripes, plaids, etc) will appear diagonal.

As a result of pole scarf installation, direction of patterns (stripes, plaids, etc) will shift from vertical on the sides to horizontal as it drapes across the window.

Measurements for vertical and horizontal repeats are approximate.

Seamless

Classic Flat

Looped

Fabrics with prints and patterns will be interrupted at each sewn pleat in classic flat and looped Roman shades. Seamless or relaxed fabric shades are recommended if you do not want a pattern interruption in your fabric shade.

All products will be paneled to cover widths wider than fabric width. Patterns are matched at seams.

Shades will be seamed vertically in three panels ($\frac{1}{4}$, $\frac{1}{2}$, and $\frac{1}{4}$). Seams may be visible.

Fabric Features

Key for Fabric Style List

Key to Fabric Type	
PAT/PRT	Pattern/Print
SLD	Solid
SHR	Sheer

Key to Ironing	
Lo	Iron: low setting
Med/Lo	Iron: medium/low setting
Med	Iron: medium setting
Med/Hi	Iron: medium/high setting
Hi	Iron: high setting
No	Do not iron

Key to Steaming	
Yes	Light steam OK
No	Do not steam

Key to Pictograms

For each fabric style, we use the following pictograms to indicate the product styles and options available in that fabric. Use this information to identify fabrics that are perfectly suited to the desired application. Please note the identified fabrics that have restrictions to blackout and interlining due to fabric weight or construction. Sheers, casements, and laces are available unlined only.

- Numbers that are not crossed out indicate styles that are available in the corresponding fabric
- An X through a number indicates that the style is not available in that fabric
- Fire retardant symbol indicates that the fabric is fire retardant

Drapery Styles

- 1 Pleated
- 2 Rod Pocket
- 3 Specialty (Grommet Top, Tabs, Plain Top)
- 4 Rod Pocket Top and Bottom

Fabric Shade Styles

- 1 Looped Roman
- 2 Classic Flat Roman
- 3 Seamless Roman
- 4 Relaxed Roman
- 5 Balloon

Cornices

- 1 Fabric-Wrapped/
Premium Fabric-Wrapped
- 2 Fabric-Wrapped—Curved

Fire Retardant

Passes NFPA 701

Swags

- 1 Traditional Swag and Cascades
- 2 Pole Swag and Cascades
- 3 Rod Pocket Swag/Insert and Cascades
- 4 Scarf
- 5 Tailored Arch

Valances

- 1 Formal
- 2 Inverted Box Pleat
- 3 Soft Fold
- 4 Tailored Flat
- 5 Tailored Scallop

Contrast Fabric

- 1 Contrast Cascade Lining
- 2 Contrast Fabrics—Top Treatments
- 3 Contrast Fabrics—Inset Shade Banding

Features

Features and Benefits of Our Drapery

Drapery Fullness

Fullness is based on the style and width of your custom drapery. This results in evenly spaced fullness, providing depth and a luxurious look.

Hidden Seams

Seams fall to the back of the pleat or fold, making them less noticeable.

Patterns Matched at Seams

All our seamed drapes have patterns matched to assure the pattern is continuous across the drape, creating visual continuity.

Pre-Pinned Draperies

Pleated draperies are pre-pinned based on rod specifications for easy installation.

Decorative Panels

Available in one-width and two-width options in pinch pleat, rod pocket, grommet, and back tab styles.

Rod Pocket and Tab Tops

Rod pocket and tab sizes are determined based on the diameter of the rod specified at the time of order.

Spring Back

Pleated drapes on a pole with rings may “spring back” slightly from their closed position. Manufacturing will add 10% to the width of drapery to allow for privacy and prevent light gap.

Double Turned Hem

Double turned hem provides weight and stability. Weights are added to each corner of the drapery.

Lining

Liners are added to the back of all drapes (except sheer fabrics) to help protect the fabric from outside elements and increase energy efficiency.

Mitered Corners

Mitered corners come standard on all drapery styles.

Modified Straight Hem

Due to construction and/or weight of certain fabrics, a modified hem may be required. These hems will not have mitered corners.

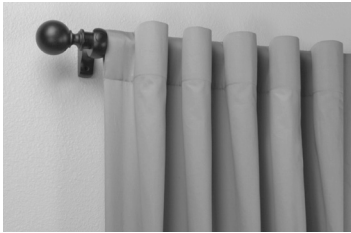

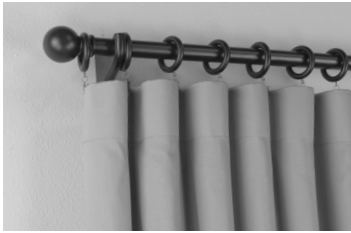

Interlining

Placed between the main fabric and liner, interlining adds weight while creating a more opaque look. Recommended for lightweight fabrics.

Features

Features and Benefits of Our Shades

Pinhole-Free Blackout Feature

Classic flat, seamless, and relaxed shades with blackout liner are constructed to create a pinhole-free shade.

Front Control Option

Shade comes off the back of the headrail with controls placed in the front. Color coordinated cords and tassels on standard control.

Hidden Support Rods

Create even folds without the hassle of training the pleats. All shades except balloon have hidden support rods included in the price.

Snap-In Install Brackets

No struggling with wing nuts. Our snap-in brackets make installation quick and easy.

Seamless Lining

To prevent shadows from the lining seams, our lining is seamless on all shades except balloon style.

Multi-Shade Option

Multiple shades on one headrail available in two-on-one with cord lift or continuous loop lift, and three-on-one with continuous loop lift controls only.

Bottom Up/Top Down Controls

Raise or lower your shade from the bottom or the top for privacy and light control. Cord lift with color coordinated cords and tassels. Not available in multi-shade.

Fabric-Wrapped Wood Headrail

All our headrails are wrapped with self fabric for a beautifully finished look.

Patterns Matched at Seams

All our seamed shades have patterns matched to assure the pattern is continuous across the shade.

Adjustable Returns

Returns are standard on outside mount shades and valances, and are designed for flexibility on the job site.

Fabric Valance

Attached valance is free with front control and bottom up/top down. Valance is available with a surcharge on back controls. (Minimum valance length on front controls is 8").

Back Valance

Back valance coordinates with liner; standard on back control with cordless lift, continuous-loop lift, or motorized lift option. Available for a surcharge on cord lift.

Features

Features and Benefits of Our Shades

Edge and Inset Accent

2" edge or inset banding, or decorative tape option on seamless and relaxed styles. Standard on valance when ordered on shade. Not available on multi-shade valances.

Valance Trim

Decorative trim options, available on the bottom of the valance, highlight the custom look of your shade.

Safety Features of Our Shades

Single Pull Cordless Lift Option

Patented cordless lift system available on all shade styles except balloon.

Motorized Lift Option

Operate your shades from virtually anywhere in your home. Provides ease of operation for hard to reach or large windows.

Continuous-Loop Lift Option

Single continuous-loop metal bead chain allows you to raise and lower your shade smoothly and easily. Great for larger shades.

Safety Cord Shroud with Metal Rings

Prevents cord from being easily pulled away from the shade and forming a loop.

Cord Management Options

Standard clear cord cleat comes with every shade. Cord winder and decorative cord cleats are available for a surcharge.

Features

Motorized Lift

- Refer to motorization product information guide for additional options, sizing, and pricing
- Window treatments can be operated from virtually anywhere in the home
- Provides easy operation of hard-to-reach or large window coverings
- Efficiently manages energy (heat gain and loss)
- Operate multiple window treatments simultaneously or individually
- A safer alternative to accessible cords that are traditionally used to operate window coverings; ideal for homes with children and pets
- Easily integrated with home automation systems
- Low voltage motorization requires no costly electrical hard-wiring
- Multiple control options available

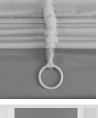

NOTE: Motorization components and accessories have a five-year limited warranty, excluding batteries.

Features

Features and Benefits of Our Top Treatments and Pillows

Premium Fabric-Wrapped Cornices

Premium fabric-wrapped cornices have a wood base and a self fabric dust cover.

Fabric-Wrapped Cornices

Fabric-wrapped cornices are light weight and easy to install.

Contrast Welting

Contrast welting on premium fabric-wrapped cornices and select fabric-wrapped styles.

Dust Cover

Premium fabric-wrapped cornices and board-mounted top treatments come with a fabric-wrapped dust cover.

No Dust Cover

Fabric-wrapped cornices do not come with a dust cover.

Curved Cornice Contrast

Fabric-wrapped curved cornice comes with decorative cording and contrast center option.

No Returns

No returns on inside mount cornices and board-mounted top treatments. Image shows outside mount to show detail only.

Returns

Returns available on left side, right side, or both sides on all cornices and most board-mounted top treatments.

Customized Board-Mounted Top Treatments

Select from five base valance silhouettes and choose one of our design options to create a unique valance design.

Contrast Cascade Lining

Contrast cascade lining available with or without interlining.

Asymmetrical Cascades

Pole swag and cascades available with asymmetrical cascades. The concealed rod pockets create the look of a scarf with easy installation.

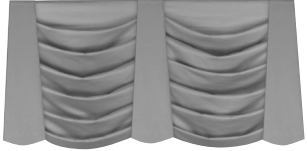

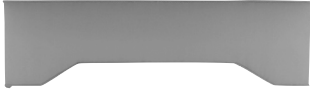

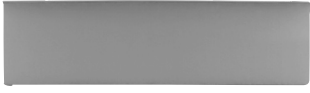

Decorative Pillows

Decorative pillows add pops of color to any room décor. Available in five shape and size options.

Minimum Length: Scarfs (inches)						60
Maximum Length: Scarfs (inches)						360
Returns (inches) (left side only, right side only, or both sides)	2-8 in 1" increments				2-8 in 1" increments	
Swag Only Dust Cover Depth (inches)	2-8 in 1" increments					

⁽¹⁾ Cascades may be offset, longest length will determine price. Short cascade will fall to the front, long cascade will fall to the back.

⁽²⁾ Sheers, laces, and casement fabrics in 60" or less. See fabric listing or back of swatch for width of fabric.

⁽³⁾ Contrast welting is only available when contrast cascade or swag banding is selected.

⁽⁴⁾ See fabric listing or back of fabric swatch for width of fabric.

Cascade face coverage for traditional or pole mounted swag/cascade is approximately 12".

How to Measure for Drapery

Drapery Styles and Hardware Summary						
Type of Rod	Drapery Style	Face Width	Length	Return Projection	Minimum Recommended Rod Placement	Other Considerations
 <p>Curtain Rod</p>	Pleated or decorative panels, with valance over them Rod pocket	Bracket to bracket	Top of rod to desired length	Wall to front of rod	4" to 5" above the glass	When ordering a rod pocket drapery, the heading is NOT included in the finished length
 <p>Decorative Pole</p>	Grommet top Rod pocket Tab styles	Inside finial to inside finial	Top of pole to desired length		6½" to 7" above the glass	When ordering a rod pocket drapery, the heading is NOT included in the finished length
 <p>Decorative Traverse</p>	Pleated	Inside finial to inside finial	With slides: bottom of rod to desired length With rings: bottom of ring to desired length	Wall to front of rod	6½" to 7" above the glass	Returns are strongly recommended to prevent light seepage
 <p>Traverse Rod</p>	Pleated	Bracket to bracket	Top of rod to desired length	Wall to front of rod	4" to 5" above the glass	Typical projections— single traverse rod: 3½" double traverse rod: 5½" Returns offered: 2", 4", 6"
 <p>Decorative Pole with Rings</p>	Pleated Plain top Rod pocket	Inside finial to inside finial	Using eyelet: bottom of ring to desired length Using clip: hinge of clip to desired length	Wall to front of rod	6½" to 7" above the glass	
 <p>Sash or Tension</p>	Top and bottom rod	Bracket to bracket	Top of top sash rod to bottom of bottom sash rod		Sash rod: 1" to 2" above and below the glass Tension rod: desired length	When ordering a rod pocket drapery, the heading is NOT included in the finished length
 <p>Roll Pleat Rod</p>	Roll pleat (100 or 120 fullness)	End to end	Bottom of rod	Approximately 3½"	5" to 6" above the glass	Specify butt or overlap master glides when ordering
 <p>Motorized</p>	Pleated Roll pleat	End to end	Bottom of rod		5" to 6" above the glass	Specify butt or overlap master glides when ordering

How to Measure for Drapery

Drapery Width

Consider the look you want to create when determining the type of drapery hardware and its placement. Rod type and placement determine the width and length of the draperies needed. General guidelines follow.

Width

There are only two measurements you need to determine the width of the drapery: the face width to be covered and the projection of the rod.

Determining the Width of the Area to be Covered	
Minimum Rod Placement Face Width = glass width + 8" (4" per side)	
Stack Back Consideration Additional wall coverage may be needed in order for the drapery to stack back off the glass when opened. The general rule is that the total stack back needed is approximately $\frac{1}{3}$ the width of the window. Additional width may be needed for heavy or bulky fabrics. Face Width = glass width + total stack back	
Bracket to Bracket Face Width	
Inside Finial to Inside Finial Face Width	
End to End Face Width	
Return Projection Measure from the wall to the face of the rod.	

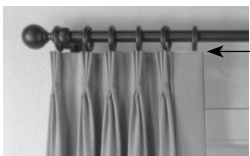

How to Measure for Drapery

Drapery Length

Determine your drapery style and the type of drapery hardware you will use (see drapery styles and hardware summary chart for pairing options.)

Length

There are only two measurements you need to determine the length of the drapery: the length you want to be covered and the starting point of the drapery.

Determine Your Starting Point (based on the type of rod and style of drapery you have chosen)			
Type of Drapery	Starting Point	Type of Drapery	Starting Point
Pleated	 <p>top of rod</p> <ul style="list-style-type: none"> • Traverse rod • Curtain rod 	Rod Pocket Top and Bottom	 <p>top of top rod</p> <ul style="list-style-type: none"> • Sash rods • Tension rods • Length does not include headers
	 <p>bottom of rod</p> <ul style="list-style-type: none"> • Decorative traverse rod with glides • Motorized rod 		 <p>bottom of bottom rod</p>
	 <p>bottom of ring</p> <ul style="list-style-type: none"> • Decorative traverse rod with rings • Decorative pole with rings 		 <p>top of pole</p> <ul style="list-style-type: none"> • Decorative pole (length does not include fabric above the rod)
Roll Pleat	 <p>bottom of rod</p> <ul style="list-style-type: none"> • Roll pleat rod • Motorized roll pleat rod 	Tab	 <p>top of pole</p> <ul style="list-style-type: none"> • Decorative pole
Plain Top	 <p>top of clip hinge</p> <ul style="list-style-type: none"> • Decorative pole with clip rings 		 <p>top of pole</p> <ul style="list-style-type: none"> • Decorative pole • Length includes tabs
Rod Pocket	 <p>top of pole</p> <ul style="list-style-type: none"> • Decorative pole (length does not include heading) 		 <p>top of pole</p> <ul style="list-style-type: none"> • Decorative pole • Length includes tabs

Determine the Length to be Covered: the bottom stopping point of your drapery. The five most popular styles are below.

Measure from above starting point.

Sill

Top of sill less ½"

Apron

Bottom of apron plus 1"

Floor⁽¹⁾

Top of floor less ½"

Trouser

Top of floor plus 2"

Puddle

Top of floor plus 6"-10"

(1) When using a drapery under another drapery, 1" above floor is recommended.

How to Measure for Shades

Measuring Guidelines

Measuring for an Inside Mount

Inside Mount:

Window treatments are installed inside the window casing.

Use a steel tape measure for taking measurements.

1. Measure Depth:

See chart below to determine if window casing has enough depth for an inside mount window treatment.

2. Measure Width:

Measure the inside width of window casing in three places; record narrowest measurement.

3. Measure Length:

Measure the inside length from the top of window casing to the top of the sill in three places; record longest measurement.

NOTE: Do not take any deductions for clearance. The manufacturer will take necessary deductions for a perfect fit.

Fabric Shades Control Type	Minimum Depth Needed for Inside Mount (inches)	Depth Needed for Flush Mount ⁽¹⁾ (inches)
Cord Lift	¾	2¾
Upturned Headrail ⁽²⁾	1¼	1
Continuous-Loop Lift	¾	3⅝
Motorized Lift	¾	3⅝
Cordless Lift	See cordless size considerations chart	See cordless size considerations chart

(1) Flush mount includes headrail and fabric and is approximate. This can vary by fabric and shade style.

(2) For direct mount, front control shades add ¾" to the mounting depths for clearance of the pleat tabs and rings. Upturned headrail is direct mount only, mounting brackets are not available.

Measuring for an Outside Mount

Outside Mount:

Window treatments are installed outside the window casing.

Use a steel tape measure for taking measurements.

1. Determine Headrail Location:

Determine if headrail will be on molding or above molding and mark the spot.

2. Measure Width:

Measure exact width to be covered; we recommend 1½" overlap on each side of the window (3") total for optimum light control and privacy; record measurement.

3. Measure Length:

Measure exact length to be covered, including desired overlap (typically from 1" above the molding to bottom of sill or apron); record measurement.

NOTE: The manufacturer makes no deductions on outside mount installations.

Measuring for a Relaxed and Balloon Shade

Relaxed and Balloon Shade:

Tend to "toe-in" at the bottom; inside mounts or multiple shades on one headrail are not recommended.

Use a steel tape measure for taking measurements.

1. Measure Length:

Measure to the short point on the bottom edge.

How to Measure for Shades

Bay Windows

Shades cannot be raised to the same level. Light gap may occur.

- Pull cords can be on the right or left side of each shade, locating cords opposite of the corner is recommended
- Depending on the angle, some corner shades cannot be raised to the same length
- Horizontal panel alignment between shades cannot be guaranteed
- Price as standard shades, no additional surcharge
- Headrails will not be mitered
- Valances will not be mitered
- For bottom up/top down cord lift shades the corner controls may be hard to reach

NOTE: Manufacturer will take appropriate deductions for proper fit.
DO NOT order as a bay window if you do not want manufacturer to take deductions.

Measuring Information: Three-Sided Bay Window

Measure:

- L and R:** Width of each side window from the corners on the mounting surface to the point you would like to cover.
- C1:** Width of the center window on the mounting surface from corner to corner.

- Angle L-C1:** Angle between the (L) and (C1) windows.
- Angle C1-R:** Angle between the (C1) and (R) windows.
- Projection:** If needed for ceiling mount: the depth of the trim or molding the shade will be mounted above.

Measuring Information: Four-Sided Bay Window

- L and R:** Width of each side window from the corners on the mounting surface to the point you would like to cover.
- C1, C2:** Width of each center window on the mounting surface from corner to corner.

- Angle L-C1:** Angle between the (L) and (C1) windows.
- Angle C1-C2:** Angle between the (C1) and (C2) windows.
- Angle C2-R:** Angle between the (C2) and (R) windows.
- Projection:** If needed for ceiling mount: the depth of the trim or molding the shade will be mounted above.

NOTE: The projection (P) distance is needed to correctly calculate deductions for ceiling mount installations where the shades are mounted to clear molding. All projection distances must match for correct deductions to be calculated.
For additional windows on bays with up to five sides continue with number progression for center shade sizes (C1, C2, C3, ...) and angles (angle C1-C2, angle C2-C3, ...) as needed.
Measure each bay angle using a protractor or angle finder or use two business cards in each bay corner as illustrated above and fax to customer service.
The angle to use between adjacent center bay windows along a straight section of wall is 180° (degrees).

How to Measure for Shades

Corner Windows

Left Shade Right Shade

Shades cannot be raised to the same level. Light gap may occur.

- Corner shades are used to butt two shades together in a corner window
- Pull cords can be on the right or left side of each shade, locating cords opposite of the corner is recommended
- Depending on the angle, some corner shades cannot be raised to the same length
- Horizontal panel alignment between shades cannot be guaranteed
- Price as standard shades, no additional surcharge
- Headrails will not be mitered
- Valances will not be mitered
- For bottom up/top down cord lift shades the corner controls will be hard to reach

NOTE: Manufacturer will take appropriate deductions for proper fit.

DO NOT order as a corner shade if you do not want manufacturer to take deductions.

Mounting Options	
<p>Mounting on a Wall or Molding: Measure the width of each window from the corner on the mounting surface (molding or wall) to the point you would like to cover.</p>	
<p>Mounting Above the Molding: Measure the width of each window from the corner on the mounting surface to the point you would like to cover. Projection measurement is the distance needed to clear any molding or obstructions that the shade will be mounted above.</p>	

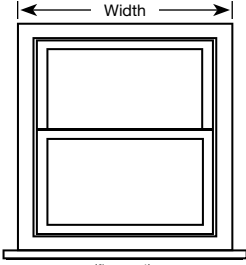

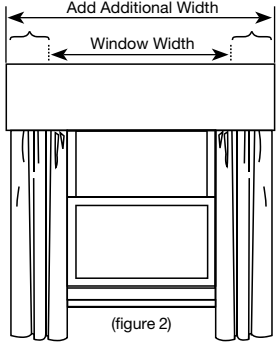

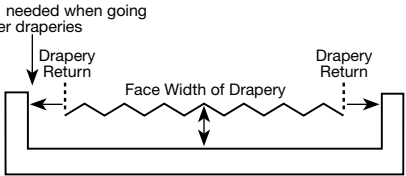

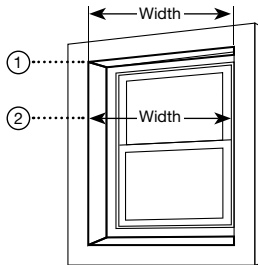

NOTE: The projection (P) distance is needed to correctly calculate deductions for ceiling mount installations where the shades are mounted to clear molding. All projection distances must match for correct deductions to be calculated.

How to Measure for Top Treatments

Measuring Guidelines

Tips for Getting Started:

1. Use a steel tape measure. Measure to the nearest $\frac{1}{8}$ ".
2. Take measurements at the top of window, as not all windows are perfectly square.
3. If ordering top treatments for multiple windows, make sure to measure each window individually.

Mounting Options	
<p>Outside Mount:</p> <ol style="list-style-type: none"> 1. Measure window width including molding (see figure 1). 2. Add any additional width desired, especially if hanging curtain panels or sheers under cornice (see figure 2). Round up to the nearest full inch. 3. Recommended 2" minimum clearance on face and sides when mounting over a drapery (see figure 3). 4. Recommended 1" when mounting over inside mount treatments. 	 <p>(figure 1)</p>  <p>(figure 2)</p>  <p>(figure 3)</p>
<p>Inside Mount:</p> <ol style="list-style-type: none"> 1. Measure the exact width of the window opening at the very top of the casing (see figure 4). 2. Measure the exact width of the window opening down from the top, depending on the desired length of top treatments being ordered. 	 <p>(figure 4)</p>

NOTE: Measure twice and document the smaller dimension, as not all window openings are perfectly square.
Length options vary by styles; see individual style specification pages.

How to Measure for Top Treatments

Board-Mounted Top Treatments

Measure Notes:

- An inside mount cornice has a depth of 3" (mounting board/dust cover)
- Measure depth of window casing to determine if it will accommodate an inside mount
- Determine inside or outside mount

Outside Mount (side view)

Inside Mount (side view)

Example: Kick Pleat

Finished width will be approximately $\frac{1}{8}$ " wider than ordered width.
Soft fold and formal valance—approximately 1" wider than ordered width.

Bay and Corner Windows

- Available in select board-mounted valances and linear premium fabric-wrapped cornice
- Measure bay angle using protractor or angle finder, or use two business cards in bay corner as illustrated.

Measure:

L and R: Width of each side window from the corners on the mounting surface to the point you would like to cover.

C1: Width of the center window on the mounting surface from corner to corner.

Angle L-C1: Angle between the (L) and (C1) windows.
Angle C1-R: Angle between the (C1) and (R) windows.

Butt/Bypass—Corner Windows Only

- Fabric-wrapped cornices—straight style only
- Shown as outside mount with returns
- Outside mount projection = return depth
- Inside mount—projection is specified by the customer
- Excludes curved cornice

Measure:

Left Cornice: Width from corner (B) to the outside desired width (A).

Right Cornice: Width from corner (B) to the outside desired width (C).

Projection/Return Depth (P): Depth from wall to back of cornice.

Choose Either: Left butt/right bypass (as shown in image) or left bypass/right butt.

NOTE: Face of cornice will be approximately $\frac{3}{4}$ " greater than the ordered projection/return measurement.

How to Measure for Top Treatments

Premium Fabric-Wrapped Cornices

Measure Notes:

- An inside mount cornice has a depth of 3" (mounting board/dust cover)
- Measure depth of window casing to determine if it will accommodate an inside mount
- Determine inside or outside mount
- Face width will be approximately 1½" wider than the ordered width
- Inside mount will be approximately ½" less than the ordered width

Outside Mount (side view)

Inside Mount (side view)

Fabric-Wrapped Cornices

Measure Notes:

- Determine inside or outside mount
- Outside mount face width on the curved cornice will be approximately 2½" wider than the ordered width
- Outside mount face width on the other fabric-wrapped cornice styles will be 1½" wider than the ordered width
- Inside mount will be approximately ½" less than the ordered width

Outside Mount (side view)

Inside Mount (side view)

Scarves

Width:

- Width on a scarf is one full width of fabric; this is standard and does not have to be noted at time of order

Length:

- Measure width to be covered
- Measure the length you want the scarf to drop down on the left and right sides
- Add 18" to 30" if you plan to loop the scarf around the curtain rod or drop it in the center
- Add an additional 6" to 10" per side if you want it to puddle on the floor
- Add these figures together to get the approximate scarf ordered length

Specifications

5. Iron and steam allowances
6. Order #
7. Date of Order

Iron and Steaming

This information is for light touch-ups when installing soft products; most wrinkles will fall out naturally once the product has been hanging for 10-14 days

- It is EXTREMELY important to follow the iron and steaming guidelines provided on the label
- When ironing or steaming a product, you should ALWAYS do this on the back side of the product to avoid marking or damaging the face of the fabric
- When steaming, use a low steam setting and avoid actually touching the fabric with the steamer

Steaming Correctly

Steaming Incorrectly

PDF copies of installation instructions are available at graberdirect.com

Specifications

Installation Information

Dressing

- Draperies: start at the top of the drapery and gently dress the folds of the drapery down to the bottom hem

Dressing Your Drapery

- Shades: smooth the fabric along the pleats or support rods, and raise and lower the shade a few times to make sure the shade is pleating smoothly as it is raised and lowered
- Top treatments: gently smooth the fabric of your top treatment following the folds and lines of the design; check and smooth out the welting if necessary

Fabric Features

Customer's Own Material (C.O.M.)

C.O.M. Guidelines

- The designer is responsible for fabric and style design choices
- Not all fabrics are suitable for all product styles; SWF reserves the right to refuse any C.O.M. material that will not allow us to manufacture a product that meets our quality standards
- All fabric types follow the same special considerations as the Graber collection
- Available product styles and options are the same as the Graber collection
- Please contact customer service if you have questions regarding fabric specific restrictions prior to placing your order

Warranty Information

- Five-year "No Questions Asked" warranty does not apply to Customer's Own Material orders
- Limited lifetime warranty for Customer's Own Material orders excludes fabric

Understanding Your Fabric

All fabric types follow the same special considerations as the Graber collection.

- For a quick reference find a similar fabric in the Graber collection and check the pictograms on the back of the swatch
- Consider how the fabric will perform in the product style chosen; at times it may be necessary to adjust the selection of product or fabric
- Things to consider:
 - How will the fabric hang or drape?
 - Is the hand of the fabric stiff or soft?
 - Will it flair due to stiffness?
 - Is it too loosely woven to hold its shape?
 - Will it wrinkle or ripple?
 - Can the fabric be steamed or ironed?
 - Is the fabric too heavy or bulky, or not heavy enough?
- Combining—fabrics used as accent linings, color blocks, or banding should be the same weight and hand to avoid problems such as puckering and flaring
- Check for bleed through when using contrast lining for cascades; interlining is recommended to reduce bleed through on fabrics darker than the face fabric
- Antique satins, silks, and linens wrinkle easily and will require additional dressing during installation
- Natural fibers such as linens and silks can have wider variation in dye lots and slubs due to the natural construction of the fabric; these are considered inherent and part of the natural beauty of these fabrics, they are not flaws
- Tumbled or pre-washed fabrics may have variations in width, patterns, and dye lots that can affect repeat size and pattern match; additional yardage may be required in these cases
- Crinkled or crashed fabrics, due to the processing techniques, may not finish with a crisp appearance; the crinkles may relax over time creating uneven hems
- SWF reserves the right to adjust construction specifications to accommodate fabrics with special considerations; as an example, heavy weight fabrics may have a single turn header and no miter on the side hem

Special Considerations for Patterned Fabrics

- Patterned fabrics, whether woven, printed, or embroidered are rarely straight or square; depending on the product style, adjustments will be made to try to minimize the appearance, however we cannot guarantee complete alignment
- Scale—take note of the pattern repeat vs. the width and length of your custom product; we center the patterns in manufacturing; some patterns, stripes, and plaids when centered will finish with the ends not the same in pattern and/or color
- Patterns with distinct vertical lines such as stripes are not recommended for swags due to the bias cut
- We pattern match all our joining seams; patterns that do not match up at the edge of the fabric may require additional fabric over what is noted in the yardage requirement charts

C.O.M. Yardage Estimates

- Select a window treatment style and size from the Graber collection
- Select your fabric from your fabric vendor
- Determine the fabric width and repeat; this can typically be found on the back of the fabric swatch
- Find your product in the C.O.M. yardage requirement charts
- Based on the size and fabric repeat, estimate your fabric needs
- Don't forget to include any optional yardage, trim, or other options that might be needed for your particular window treatment
- If you have any questions or concerns, please call SWF customer service for assistance with your estimate; be prepared to provide specific details about the C.O.M. fabric, including the width, pattern repeat, and color; also, have the required information for the selected style ready for proper calculations
- Estimates may be subject to change once your order is received and reviewed
- SWF is not responsible for fabric shortages that can occur due to the type of fabric, pattern placement, or complexity of the treatment

Fabric Features

Customer's Own Material (C.O.M.)

Ordering a C.O.M. Product

- Estimate the fabric or trim requirements before purchase (see instructions on previous page)
- Always order your Graber soft treatments first
- Complete the required order form(s) and email or fax them to SWF customer service
- SWF will process your C.O.M. order and email you a confirmation with instructions to place your fabric order
 - **NOTE:** Each C.O.M. order will require a separate confirmation
- When placing an order with a fabric vendor provide them with the SWF order number
- Include the SWF order number on the outside of your package; this includes fabrics sent directly by you or your fabric vendor
 - Manufacturing lead times begin when fabric is received, inspected, and approved for manufacturing
 - It is important each piece of C.O.M. sent to SWF is labeled clearly to ensure timely processing of your order
- Fabrics must be properly marked, noting the face-side and which direction is up
- Each fabric must be rolled on a tube and sealed in plastic; we do not accept flat folded materials, bedding, or used materials
- An additional flat fee may be applied to your order if additional processing is required for fabrics that arrive without proper identification or are not rolled on a tube or require ironing
- Orders that are shipped directly from your fabric vendor are your responsibility
 - This includes products made in the wrong pattern, color, dye lot, or made inside-out or upside-down
- SWF is not responsible for products produced from incorrectly marked fabrics
- Correctly labeled C.O.M. is received by SWF and processed through for inspection
- Approved materials will be placed into production and shipped within 5 business days
- If, for any reason, the fabric does not pass our inspection process, or we find additional yardage is required, SWF will contact you directly regarding replacement fabric; you will need to contact the fabric vendor for additional fabric and a call tag to return the damaged goods
- If your fabric is miscut or damaged during the production process and needs to be replaced, SWF will cover the cost of new fabric up to a maximum of \$25 per yard; in this case, we may ask you to purchase the amount needed and provide a receipt for reimbursement
 - **IMPORTANT:** Your order will be placed on hold until SWF receives new material from the fabric vendor.

Special Considerations for Outdoor Fabrics

- Outdoor fabrics are available in the following drapery styles only: rod pocket, grommet top, tab top, plain top, back tab
- Grommets for outdoor fabrics available in round style with stainless steel finish only
- Outdoor fabric draperies are only available unlined
- Outdoor drapery fabrics are not available with trim, banding, or color blocking options
- Grommet and plain top draperies are constructed with a material at the header to provide structure; over time this material could soften with exposure to the elements

C.O.M. Yardage Requirements: Draperies

Custom Size Draperies

All Pleated and Rod Pocket Draperies

Standard (Non-Sheer) Fabrics

Chart assumes a 54" fabric width; contact customer service to calculate other widths.

Pleated styles not available in outdoor fabrics.

216	6¾	13¼	19¾	26¼	33	39½	46	52½	59	65¾	72¼	6¼	12¼	6¾
225	7	13¾	20½	27¼	34¼	41	47¾	54½	61¼	68¼	75	6½	12¾	7
Multiplier	1	2	3	4	5	6	7	8	9	10	11			
Trim— Drapery or Valance Bottom Hem	1¾	3½	5	6½	8	9¾	11¼	12¾	14½	16	17½			
Rod Pocket: Header, Add														
Header up to 2"	¼	¼	½	½	¾	¾	1	1	1¼	1¼	1½			
Header up to 4"	¼	½	¾	1	1¼	1½	1¾	2	2¼	2½	2¾			

Above chart does not include repeats.

For fabrics with vertical repeat use the following formula:

$((\text{fabric vertical repeat} \times \text{multiplier}) / 36") + \text{base yardage} = \text{total yardage needed}$

For color blocking: split length of drapery as follows, based on your order and placement, ordering ⅓ and ⅔ or ⅕ and ⅘.

For pleated styles using a pole with rings: ordered width x 1.1 = width needed for yardage determination

C.O.M. Yardage Requirements: Draperies

Custom Size Draperies

All Pleated and Rod Pocket Draperies—60" Sheers

Sheers, Laces, and Casement Fabrics

Chart assumes a 60" fabric width; contact customer service to calculate other widths.

Pleated styles not available in outdoor fabrics.

Rod Pocket Top and Bottom

Sheer Fabrics

Chart assumes a 60" fabric width; contact customer service to calculate other widths. Not available in outdoor fabrics

Length up to (inches) ↓	Width up to (inches) →		
	20	40	50
36	1½	3	4¼
48	1¾	3½	5¼
60	2¼	4¼	6¼
72	2½	5	7¼
84	2¾	5½	8¼
96	3¼	6¼	9¼
Multiplier	1	2	3

Above chart does not include repeats.

For fabrics with vertical repeat use the following formula:

((fabric vertical repeat x multiplier)/36") + base yardage = total yardage needed

Tiebacks

Standard (non-sheer) Fabrics

Chart assumes a 54" fabric width; contact customer service to calculate other widths.

Sheer Fabrics—Straight Tiebacks Only

Chart assumes a 60" fabric width; contact customer service to calculate other widths.

Width up to (inches) →	10	20	30	40	50	60	70
Contour	½	½	¾	¾	¾	1¼	1¼
Straight	½	½	¾	¾	¾	1	1
Straight—Sheer	¾	¾	1¼	1¼	1¼	2	2
Multiplier	1	1	2	2	2	3	3
Trim*	¾	1¼	1¾	2½	3	3½	4
Welting*	1	1	1	1	1	1	1

Above chart does not include repeats.

Fabrics with vertical repeat require extra fabric for both the shade and valance, use the following formula:

((fabric vertical repeat x multiplier)/36") = extra yardage required

total yardage = (base yardage + extra yardage) + (valance + extra yardage)

*Trim and welting not available with sheers, laces, casement fabrics, or outdoor fabrics.

Contour tieback not available in sheers, laces, or casement fabrics.

C.O.M. Yardage Requirements: Fabric Shades

Standard (non-sheer) Fabrics

Charts assume a 54" fabric width; contact customer service to calculate other widths.

Not available with sheers, laces, casement, or outdoor fabrics.

Length up to (inches) ↓	Width up to (inches) →			Edge Banding
	48	90	106 ⁽¹⁾	
36	1¾	3¼	4¾	1¾
48	2	3¾	5¼	2
60	2¼	4½	6¾	2¼
72	2¾	5¼	7¾	2¾
84	3	5¾	8¾	3
96	3¼	6½	9¾	3¼
108	3¾	7¼	10¾	3¾
120	4	7¾	11¾	4
Multiplier	1	2	3	1
Valance	¾	1½	2¼	¾

Above charts do not include repeats.

Fabrics with vertical repeat require extra fabric for both the shade and valance, use the following formula:

((fabric vertical repeat x multiplier)/36") = extra yardage required

total yardage = (base yardage + extra yardage) + (valance + extra yardage)

(1) For multiple shades on one headrail, order yardage based on individual shade sizes.

C.O.M. Yardage Requirements: Fabric Shades

Looped Roman

Standard (non-sheer) Fabrics

Chart assumes a 54" fabric width; contact customer service to calculate other widths.

Not available with sheers, laces, casement, or outdoor fabrics.

Length up to (inches) ↓	Width up to (inches) →		
	48	90	106 ⁽¹⁾
36	2¼	4½	6¾
48	3	5¾	8½
60	3½	6¾	10¼
72	4	8	11¾

96	5¼	10¼	15¼
103	5¾	11¼	16¾
Multiplier	1	2	3
Valance	¾	1½	2¼

(1) For multiple shades on one headrail, order yardage based on individual shade sizes.

Balloon

Standard (non-sheer) Fabrics

Chart assumes a 54" fabric width; contact customer service to calculate other widths.

Not available with sheers, laces, casement, or outdoor fabrics.

Length up to (inches) ↓	Width up to (inches) →			
	26	48	69	90
36	1¾	3½	5	6¾
48	2¼	4	6	8
60	2½	4¾	7	9¼
72	2¾	5½	8	10¾
84	3¼	6	9	12
96	3½	6¾	10	13¼
103	3¾	7½	11	14¾
Multiplier	1	2	3	4

Above chart does not include repeats.

Fabrics with vertical repeat require extra fabric for both the shade and valance, use the following formula:

$((\text{fabric vertical repeat} \times \text{multiplier}) / 36") = \text{extra yardage required}$

$\text{total yardage} = (\text{base yardage} + \text{extra yardage}) + (\text{valance} + \text{extra yardage})$

C.O.M. Yardage Requirements: Cornices

Premium Fabric-Wrapped Cornices

Straight Cut

Not available with sheers, laces, casement, or outdoor fabrics.

Width up to (inches) →	64	120	174	190
All Styles—6" to 10" Length	1½	2¼	3	3¾
All Styles—11" to 21" Length	2¼	3¾	4¼	5¼
Self or Contrast Welting—Add	1	1½	2	2¼
HR > 20", Add	¾	¾	¾	¾
Multiplier	2	3	4	5

Fabric Railroaded—Fabric is Rotated 90°

Not available with sheers, laces, casement, or outdoor fabrics.

When selecting to railroad fabric consider pattern direction, scale, and repeat. Patterns should have no or minimal repeat.

Single Cut

Width up to (inches) →	36	64	120	174	190
All Fabrics to 21" Length	2¼	3	4½	6	6½
Self or Contrast Welting—Add	1	1	1½	2	2¼
HR Multiplier	N/A	1	1	1	1

Side by Side Cut

Two cornices cut side by side based on parameters below.

Patterns will not be centered.

Patterns should have no or minimal repeat.

Width up to (inches) →	36	64	120	174	190
All Styles up to 13" Length with Maximum 4" Return or Dust Cover	2¼	3	4½	6	6½
All Styles up to 11" Length with Maximum 8" Return or Dust Cover	2¼	3	4½	6	6½
Self or Contrast Welting—Add	1	1	1½	2	2¼
HR Multiplier	1	1	1	1	1

Options—Straight Cut and Fabric Railroaded

Width up to (inches) →	36 ⁽¹⁾	64	120	174	190
Cording Trim	4½	6	9	12	13

(1) 36" only applies to railroaded cornices.

Above charts do not include repeats.

Fabrics with vertical repeat require extra fabric for both the shade and valance, use the following formula:
 $((\text{fabric vertical repeat} \times \text{multiplier}) / 36") = \text{extra yardage required}$

For fabrics with horizontal repeat greater than 20" add 1 yard of primary fabric

HR Multiplier

Railroaded fabrics with horizontal repeat require extra fabric using the following formula:
 $((\text{fabric horizontal repeat} \times \text{multiplier}) / 36") = \text{extra yardage required}$

C.O.M. Yardage Requirements: Cornices

Fabric-Wrapped Cornices

Straight Cut

Not available with sheers, laces, casement, or outdoor fabrics.

Straight, Contour, Traditional

Width up to (inches) →	72	126	144
All Styles	1	1½	2
Self or Contrast Welting—Add	¾	1	1¼
HR > 20", Add	½	½	½
Multiplier	2	3	4

Curved

Width up to (inches) →	72	126	144
Primary Fabric	1	1½	2
Contrast Fabric	½	¾	1
Cording Trim	5	8	9
HR > 20", Add	½	½	½
Multiplier	2	3	4

Fabric Railroaded—Fabric is Rotated 90°

Not available with sheers, laces, casement, or outdoor fabrics.

When selecting to railroad fabric consider pattern direction, scale, and repeat.

Patterns should have no or minimal repeat.

Single Cut

Straight, Contour, Traditional

Width up to (inches) →	36	72	126	144
All Fabrics, All Lengths	2	3	4½	5
Contrast Welting—Add	1	1	1½	2
HR Multiplier	1	1	1	1

Curved

Width up to (inches) →	36	72	126	144
Primary Fabric	2	3	4½	5
Contrast Fabric	2	3	4½	5
Cording Trim	3	5	8	9
HR Multiplier	1	1	1	1

Side by Side Cut

Up to two cornices cut side by side for straight, contour, and traditional styles.

Up to three cornices cut side by side for curved styles.

Patterns will not be centered.

Patterns should have no or minimal repeat.

Straight, Contour, Traditional

Width up to (inches) →	36	72	126	144
All Styles, All Lengths—Includes Welting	2	3	4½	5
Contrast Welting—Bias Cut	1	1	1½	2
HR Multiplier	1	1	1	1

Curved

Width up to (inches) →	36	72	126	144
Primary Fabric	2	3	4½	5
Contrast Fabric	2	3	4½	5
Cording Trim	3	5	8	9
HR Multiplier	1	1	1	1

Above charts do not include repeats.

Fabrics with vertical repeat require extra fabric for both the shade and valance, use the following formula:

((fabric vertical repeat x multiplier)/36") = extra yardage required

For fabrics with horizontal repeat greater than 20" add 1 yard of primary fabric

HR Multiplier

Railroaded fabrics with horizontal repeat require extra fabric using the following formula:

((fabric horizontal repeat x multiplier)/36") = extra yardage required

C.O.M. Yardage Requirements: Swag and Cascades

Traditional Swag and Cascade

Standard (non-sheer) Fabrics*

Chart assumes a 54" fabric width; contact customer service to calculate other widths.

Not available with sheers, laces, casement, or outdoor fabrics.

Number of Swags	1	2	3	4	5	6	7	8	9
Width up to (inches) →	42	71	96	120	144	168	192	216	240
Swag Only	2	4	5¼	7¼	9¼	11½	13½	15½	17½
Swags with Self Lined Cascade	6¼	8½	10¼	12	14	15¾	17½	19¼	21¼
Swags with Contrast Lined Cascade, Face Fabric	4¼	6	8	9¾	11½	13¼	15¼	17	18¾
Contrast Lined Cascade, Contrast Fabric	2½	2½	2½	2½	2½	2½	2½	2½	2½
For 63" Cascade Add:									
Swags with Self Lined Cascade	3	3	3	3	3	3	3	3	3
Swags with Contrast Lined Cascade, Face Fabric	1½	1½	1½	1½	1½	1½	1½	1½	1½
Contrast Lined Cascade, Contrast Fabric	1½	1½	1½	1½	1½	1½	1½	1½	1½
For 84" Cascade Add:									
Swags with Self Lined Cascade	5½	5½	5½	5½	5½	5½	5½	5½	5½
Swags with Contrast Lined Cascade, Face Fabric	2¾	2¾	2¾	2¾	2¾	2¾	2¾	2¾	2¾
Contrast Lined Cascade, Contrast Fabric	2¾	2¾	2¾	2¾	2¾	2¾	2¾	2¾	2¾

$((\text{fabric vertical repeat} \times \text{multiplier}) / 36") + \text{base yardage} = \text{total yardage needed}$

*Styles not available in sheers, laces, or casement fabrics.

C.O.M. Yardage Requirements: Pillows

Accent Pillows

Standard (Non-Sheer) Fabrics*

Chart assumes a 54" fabric width; contact customer service to calculate other widths.

Not available with sheers, laces, casement, or outdoor fabrics.

	Square			Rectangle	
	16" x 16"	20" x 20"	22" x 22"	12" x 16"	16" x 20"
Pillow with Plain Edge	$\frac{3}{4}$	$\frac{3}{4}$	$\frac{3}{4}$	$\frac{3}{4}$	$\frac{3}{4}$
Welting (Self or Contrast)	1	1	1	1	1
Trim Yards	2	2½	2¾	1¾	2¼
Multiplier	1	1	1	1	1

Above charts do not include repeats (see formula at bottom of page for fabrics with repeats).

For fabrics with vertical repeat use the following formula:

$((\text{fabric vertical repeat} \times \text{multiplier}) / 36") + \text{base yardage} = \text{total yardage needed}$

*Styles not available in sheers, laces, or casement fabrics.
