Features

Sheer vertical blinds combine the soft look of sheer fabric draperies and the light control benefits of vinyl vertical blinds. When the vanes are open, softly diffused light streams into the room through sheer fabric for minimal privacy and light control; when closed, light is blocked from entering the room to provide maximum privacy and light control. Not only for patio doors, sheer vertical blinds also look beautiful on wider or uniquely shaped windows. Plus, sheer vertical fabrics are easily removed and machine washable.

- Fabric easily installed and removed—no need to take down entire blind
- Easily replace original fabric with different style or color when décor changes
- Fabric is machine washable
- Color coordinated thread for a finished appearance
- Heavy-duty aluminum headrail with steel pantograph system ensures smooth operation and proportional spacing of vanes
- Available as both inside and outside mount
- Cord and chain control only
- Stems are removable for easy replacement in the home

Sheer Vertical Blinds: Styles, Fabric Content, and Light Control

Collection Name	Material Content	Light Control	Vane Style	Street Side Appearance	Coordinates
Bengali	100% polyester	Sheer/room darkening	FH	Neutral	Graber® Artisan
Cascade	100% polyester	Sheer/room darkening	FH	Neutral	Graber Artisan

Gossamer	100% polyester	Sheer/room darkening	FH	Neutral	Graber Artisan
Highlight	100% polyester	Sheer/room darkening	FH	Neutral	Graber Artisan

Light Control Levels

Light Filtering: Light is filtered to varying degrees depending on fabric style and color; silhouettes of objects and people are visible through the blind.

Room Darkening: Light is substantially blocked; vague shadows of objects or people may be visible; maximum room darkening is achieved with darker colors.

Sheer: Allows light to enter the room where light control and privacy are not a concern. Objects in the room can be seen quite clearly through open blinds.

Oeko-Tex® Standard 100 Certified Fabrics

Oeko-Tex Standard 100 certifies that our fabrics are free of PVC, halogen, lead, formaldehyde, allergenic dyes, pesticides, phenols, heavy metals, and meet all VOC content limits.

NFPA 701

NFPA 701 Flame resistance test is the standard method of fire tests for flame propagation of textiles and films by the National Fire Protection Agency.

Features

Vertical Blinds: Vane Features

Vane View: Side the color or texture is facing when vanes are rotated open so you can see through the vanes to the street.

Free Hanging Fabric with Optional Bottom Chain and Clips

Vinyl Styles

- All vinyl vanes offer value, durability, easy cleaning, and superior light control
- Choose from embossed crown, smooth crown, or S-shaped embossed vinyl vanes
- Embossed textures offered in solids or prints with the look of jacquard or linen fabrics, wood, or stucco
- Coordinating 2" horizontal vinyl blinds available for many styles; for pricing on 2" horizontal vinyl blinds, see the Graber® 2" horizontal vinyl product information guide

Vinyl Crown Vanes

- Traditional curved vanes

Vinyl S-Shaped Vanes

- Provide a more drapery like look to your vertical blinds
- Provide better closure for more light control and privacy
- Valances are made with crown PVC of the same texture and color; dye lot cannot be guaranteed
- S-shaped vanes are NOT reversible; vane view shows which side the color/texture is facing when vanes are rotated open so you can see out the window
 - Right stack and split stack—left
 - Left stack—right
- You may choose a vane view other than the recommended if you are concerned about which side of the vane you will see when blinds are rotated open
- For paired, bay and corner blinds, the same vane view is recommended for all blinds

NOTE: See illustrations on how S-shaped vanes will hang.

Fabric Vanes

- Designer fabric vane styles range from sheer to room darkening in a variety of weaves and materials
- Free-hanging vanes come with sewn-in bottom weights and optional chain and clips
- For increased privacy and room darkening, fabric vanes can be inserted into channel panels; the clear edge channels hold fabric securely and will not yellow over time; the opaque vinyl vanes provide additional privacy and light control; see price charts for replacement pricing
- Coordinating Graber pleated, Roman, solar, and roller shade fabric and Graber sliding panels are available for selected styles
- Available in 3½" fabric styles

Additional Information

- Due to the nature of vane materials (both fabric and vinyl prints), colors may vary slightly from dye lot to dye lot; exact matches cannot be guaranteed
- Due to the random design of some vane patterns, exact alignment of the pattern across the blind is not possible

Vertical Blinds: Headrail Systems

G-71 Super-Vue®

The top-of-the-line G-71 Super-Vue features the patented pantograph traversing system to assure proportional spacing of vanes when closed. G-71 Super-Vue is available in a smooth, anodized aluminum channel. Ball bearing pulleys in the control mechanism and thermoplastic self-lubricating wheels on every carriage allow for smooth traversing vanes. Clear stems provide a sleek appearance with both fabrics and vinyl vanes. E-Z Open™, available only on the G-71 headrail, automatically rotates the vanes when the cord is pulled to traverse the blind.

G-98 Ultra-Vue™

The anodized aluminum G-98 Ultra-Vue headrail system traverses vanes smoothly through the consecutive action of stainless steel pick-up tails. Ultra-Vue carriers are wheeled for smooth traversing and are self-aligning.

G-85 Dura-Vue®

G-85 Dura-Vue headrails traverse vanes smoothly with a thermoplastic strap system. Dura-Vue steel headrail is offered in an ivory painted finish. Dura-Vue carriers are wheeled for smooth traversing.

The design of all Graber® headrails allows for reversible installation, providing versatile placement of controls on either the left or right.

Stack Left Finished Blind Width (FBW)

Split Stack
(recommended for
balanced appearance)
Finished Blind Width (FBW)

1. Determine headrail type and the clear opening width for split stack, stack right or stack left (see diagrams)—the additional 3" shown for privacy is recommended if ordering a right or left stack.
2. Match the clear opening width with dimension found under "CO" column below. For even spacing, round up width measurement to the next size in the stack chart. Split stack will have even number of vanes.
3. Order the corresponding dimension found in the "FBW" (finished blind width) column below.

EXAMPLE: Stack Left

If determined width for clear opening window view is 54¼", order width needed to provide full unobstructed view is 66¾".

NOTE: For stack right or stack left blinds add an additional 3" to the clear opening before calculating the finished blind width.

For G-98 Ultra-Vue™ and G-85 Dura-Vue® headrails, and One Touch® Control, see appropriate stacking charts for single stack blinds only on the following pages.
