OCTOBER 2025

Summary of Revisions

OCTOBER 2025	
Page 6–7	<p>Added the new Square Cassette offered in 2 sizes:</p> <ul style="list-style-type: none"> • Medium and Large <p>Square Cassette fits the same as Round.</p> <p>Updates include square and round as choices throughout the document</p> <p>Order system will show sizes as follows:</p> <ul style="list-style-type: none"> • Square Md Painted Cassette • Square Lg Painted Cassette
Throughout	"Continuous Loop Lift Cassette" now refers to Square Painted and Round Painted Cassette options
Page 6–7	No change to lift options. Previous Continuous Cord Loop Lift Cassette is now available with Square Painted and Round Painted Cassettes in Medium and Large. Motorized Square Painted and Round Painted Cassette available in Large.
Page 6–7	<ul style="list-style-type: none"> • Maximum Shade Size charts for single and dual shades: Added sizes and cassette type, for example Small Square/Round Cassette to the chart headers for Valance Type. • Mounting Depth Illustrations: Added Square cassette image. Same mounting depth as round.
Page 6–7	Added/updated "Square Painted or Round Painted Cassette" to Options. Added Square Painted Cassette graphic
Page 9–10	Added square cassette graphic and feature data to applicable lift type product detail

Features

Exterior Solar Shades Expand Your Outdoor Living Space

- Maintain an outdoor view
 - Filter and diffuse light while maintaining an outward view
 - The higher the openness factor and the darker the fabric, the clearer the view
- Manage glare
 - Minimize glare on televisions and home office computers
 - The darker the fabric color, the better the glare control and visibility
- Block damaging UV rays
 - The amount of UV ray blockage is the inverse of a fabric's openness factor (i.e., a fabric with 10% openness blocks 90% of UV rays)
 - Protect furniture, carpets, artwork, etc. from fading due to harmful UV rays

- Temperature control
 - Exterior shades reduce solar heat gain before it enters the house, reducing air conditioning costs
 - Solar fabrics reduce heat transmittance, keeping rooms cooler and increasing the comfort level in your home
 - The lighter the fabric color, the better the temperature control

IMPORTANT: Shades must be raised fully during inclement weather and windy conditions. Raise shade in winds exceeding a moderate breeze (13–18 mph: small tree branches move, dust is picked up from the ground surface)

Light Gaps

A light gap will be present on inside mounted shades.
An outside mount with overlap is recommended to eliminate light gap.

Control Type	Light Gap Per Side (inches)
Continuous Loop Lift No Cassette	$\frac{3}{16}$ to $\frac{13}{16}$
Continuous Loop Lift with Cassette	$\frac{3}{16}$ to 1
Motorized Lift with Cassette	1 to $1\frac{5}{16}$

Fabric Recommendations

Please order all shades at the same time to ensure color consistency and minimize dye lot variation.

Fabric Disclaimers

Due to the nature of the weaving process, some imperfection in the weave is normal.

Roll direction cannot be reversed after a shade is ordered.

Fabric appearance can vary based on changing lighting conditions.

Fabrics turned width for height (referred to as railroaded) may curl along the edge. With extremely wide or railroaded shades, a V shape may appear in the center of the panel. This occurs due to the weight of the fabric. This is not a defect in the product.

Fabric Certifications

GREENGUARD Indoor Air Quality Certified® Fabrics: Many Graber® fabrics have been certified by GREENGUARD Environmental Institute (GEI) to be low chemical and particle emitting fabrics, providing a healthier indoor air quality. The process used for certification complies with established indoor air quality standards and is performed by a third party lab. Please see graberblinds.com for more information.

greenguard.org

GREENGUARD Indoor Air Quality Certified is a registered trademark of the GREENGUARD Environmental Institute.

3 | graberdirect.com

Large Window Sizing

Some fabrics can be turned 90° clockwise (width for height) to accommodate wider windows. In these cases some solar fabrics can be seamed for longer lengths. Fabrics turned width for height (referred to as railroaded) may curl along the edge. This is not a defect in the product.

Light Control and Privacy

Privacy: Solar shades do not offer nighttime privacy—lighted interiors allow inward visibility. If complete privacy is desired, consider adding an additional window treatment.

October 2025

"NO RR" signifies a fabric that cannot be rotated 90 degrees in order to add to the maximum width for a shade.

Due to continuous manufacturing improvements, minimums and maximums are subject to change. These tables provide approximate maximum size size available by fabric and cassette. Seams may be added to fabrics to accommodate long shade requirements. For shades longer than material width, seams will be visible when the shade is fully extended.

Size Considerations

How to Determine Maximum Shade Size

Follow these easy steps to determine approximate maximum size and valance size from the maximum shade size tables.

1. Determine your fabric style and shade size, and select whether you want a square or round cassette (or if you choose the no-cassette option for continuous loop lift).
2. Find the fabric in the first column.
3. Determine if your shade size is within the normal fabric orientation size range.
4. Identify the appropriate size cassette (or no cassette for Continuous Loop lift) for your shade size.
5. If your shade size is larger than either the maximum width or height range, your fabric may be able to be turned width for height for larger shades. Use the fabric turned width for height (railroaded) table.

EXAMPLE: Determine approximate maximum size and cassette for normal orientation shades. The example Continuous Loop lift shade is 110" x 120" Vanguard 5% with cassette.

1. Find Vanguard 5% in the first column.
2. Follow the Vanguard 5% fabric row to the width and height sizes.
3. The maximum width and maximum height in normal fabric orientation available for this configuration is 117" x 144".

NOTE: Both width and height must be less than the maximum width and height segment to fit the normal shade orientation.

4. Follow this segment to the top of the table. This segment is within the large cassette size indicating this shade's smallest segment cassette size available is a large size cassette.

Planning for Installation of Exterior Shades

Use the following planning guidelines for your exterior shade:

1. Determine the location of the shade.
2. Motorized lift shade: Determine the exterior power location. Measure the distance from the planned shade location to the electrical outlet or jbox to order the motor power cable lead length (10 feet).
3. Determine the side of the shade (left or right) the bead chain for Continuous Loop lift or the motor power cable for motorized lift should exit.
4. For top mounts, large cassette installation: ½" spacing is required between the window and the back of the bracket.
5. For wall mounts, large cassette installation: ¾" clearance is required above bracket.
6. Use a stud finder to locate solid area to mount installation brackets.
7. Installation of motorized lift shades may require two people.
8. Never install exterior shades in windy conditions.
9. A licensed electrician is required for all electrical connections. All local and NEC codes must be followed.
10. The installation screws provided are for mounting on wood. For mounting on materials other than wood, please consult a qualified professional.

Size Considerations

Depth Requirements for Inside Mount

- The following diagrams illustrate the mounting depth requirements for shades mounted inside window casements or deck/porch frames
- Motorized lift shades only available with large cassette
- Continuous Loop lift shades shown

Square Md Painted or Round Md Painted Cassette

- 1 3/4" minimum inside mount (Continuous Loop lift only)

Square Lg Painted or Round Lg Painted Cassette

- 1 3/4" minimum inside mount

No Valance*

- 3/4" minimum needed to attach bracket for an inside/side mount
- 4 1/8" minimum for an inside/top mount

*Largest possible measurement given. This will vary with fabric and window dimensions.

Guide Cables (motorized lift shades only)

Use the following to determine the guide cable length that will be provided with your shade:

1. Add 10" to the shade height.
2. The next longest cable length will be supplied.
 - Included in motorized lift pricing
 - Stainless steel guide cable
 - Four lengths available: 54", 80", 144", and 186"
 - Stainless steel cable locks included
 - Cables will be at least 10" longer than ordered height; longer cable can be cut to length needed

EXAMPLE: Shade height is 95". Add 10" = 105". Shade will come with a guide cable at 144" Cable can be cut to required length at time of installation.

Motor Power Cable

1. Estimate the number of feet from the cassette valance motor power cable exit to the electrical junction box or GFCI (ground fault circuit interrupter) outlet.
2. Select 10 feet.

Options

Summary

Control Type Options

- Continuous Loop lift
- Motorized lift with guide cables

Shade Options—No Charge

- Chain location
- Turning fabric width for height to accommodate wider windows
- Longer chain length
- Reverse roll
- Cable locks—motorized lift
- Guide cables—motorized lift
- Hold downs—Continuous Loop lift

Shade Options—Surcharge

- Cassette valance
- Motorization accessories

Reverse Roll

• No charge

- Standard roll is where fabric rolls over the tube to the back
- Reverse roll is where the fabric rolls over the tube to the front
- Reverse roll not available with valances
- Roll direction cannot be changed after shade is manufactured

NOTE: For optimal privacy and light control, standard roll should be used.

Continuous Loop Lift

• For pricing, see price charts

- Beaded chain and clutch system makes raising and lowering shade easy
- Two clutch sizes depending on shade size
- Stainless bead chain stays same length regardless of shade position
- Bead chain length is approximately $\frac{7}{8}$ length of shade; customer can request longer chain length at time of order
- Chain is kept at a constant length and held taut by a safety hold down device

NOTE: Hold down device must be installed to operate the shade.

- Choose left or right chain location (right is standard)
- Component and cassette valance color is selectable
- Hem bar hold downs attach the shade to the frame of the window or deck/patio
- Fabrics and components are specifically designed for outdoor use

NOTE: All exterior shades must be fully raised in wind and inclement weather. Raise shade in winds exceeding a moderate breeze (13–18 mph: small tree branches move, dust is picked up from the ground surface)

Square Painted or Round Painted Cassette

- Choose Square Painted or Round Painted Cassette
- Square Painted Cassette Colors: Black 939, Brown 873, Cream 715, White 871
- Round Painted Cassette Colors: Black 939, Brown 873, Vanilla 970, White 871
- Painted and powder coated finishes are rated for outdoor use
- Square Painted or Round Painted cassette must be ordered at the same time as the continuous-loop lift shade

- **NOTE:** Motorized lift system includes a cassette. Choose square or round
- Sizes: Medium $3\frac{5}{8}$ " high x $4\frac{1}{4}$ " deep (continuous loop lift only); Large $4\frac{5}{8}$ " high x $5\frac{1}{2}$ "

Options

Motorized Lift

- **For pricing, see price charts**
- Components are rated for exterior use
- Motorized lift shades come standard with a radio frequency AC motor providing convenient operation through wireless remote controllers and wall switches
- Powered using a 3-prong plug (residential outlet) (sold separately) or wired directly by an electrician
- Radio frequency operation allows shade operation from virtually anywhere without direct line of sight; no wiring is required between the motor and the controllers
- Upper and lower motor limits are pre-programmed for added convenience
- Square Large Painted Cassette is included in price in four colors: Black 939, Brown 873, Cream 715, White 871
- Round Large Painted Cassette is included in price in 4 colors: Black 939, Brown 873, Vanilla 970, White 871
- Universal cable locks are standard
- Guide cables are secured with unique, universal cable lock that can be mounted base/sill or back/wall
- Guide cables determined by shade height; 54", 80", 144", 186"

Motorized Lift Options

- Controllers and wall switches are wireless, providing installation and operation convenience
- 1- and 5-channel remote controllers operate individual or groups of shades
- Exterior rated remote controls are water resistant and shock proof
- Interior remote controllers and wireless wall switches can operate the same shades
- Interior wireless 1- and 5-channel wall switches provide convenient operation of individual or groups of shades from inside the home
- Wind sensor will automatically raise the shade in windy conditions, providing protection of your shades
- Choose left or right motor power cable location
- Power cable length available: 10 feet
- Exterior rated black plug available
