Features

The Graber® Wood Story

Quality of Wood Defines a Blind's Quality

We use only 100% North American hardwood in the construction of our wood blinds because of its light weight, consistent color, hardness, structural stability, and attractive grain.

Sound Forestry Techniques

We work only with foresters who practice “sustained yield forest management”—nearly twice as much hardwood grows as is harvested in the U.S. each year. The volume of hardwoods in American forests today is greater than it was 50 years ago.

Preserving Our Natural Resources

Our Springs Window Fashions (SWF) wood products facility consumes recycled sawdust and wood shavings, generating the heat required to dry lumber for a completely self-sufficient manufacturing process. Our Reynosa, Mexico fabrication and finishing facility is 99.7% pollution free, above any U.S. standard.

SWF Wood Products, Grayling, Michigan

We have control over the quality of wood used—we control the process from green lumber to finished blinds. Hardwoods used in crafting Graber Wood Blinds are kiln dried and molded at our SWF wood products facility in Grayling, Michigan. The wood is dried slowly to strict wood blind specifications because structural change can occur when moisture is removed. Molding and sanding operations provide the highest quality surface, free of defects.

Springs Window Fashions, Reynosa, Mexico

At our state-of-the-art finishing plant in Reynosa, Mexico, components are carefully sorted prior to fabrication for color uniformity and wood characteristics. We sort wood as an end user, rather than a finishing vendor, taking out defects in a climate-controlled building. To finish the blind, we use only high quality paints and stains; on-site certified color technicians provide both application and quality control.

What Makes Graber Traditions® Blinds Different from the Rest?

- Painted and stained wood blinds are made from 100% North American hardwoods, the premier wood used in the construction of blinds
- SWF wood products and finishing facilities provide state-of-the-art technologies and processes
- Expanded choice of finishes with PureGrain™ Finish—vibrant stains that showcase the natural grain of the wood
- Unique valance choices, cloth tapes, specialty shapes, and more
- Traditions composite blinds have superior strength and moisture resistance
- The best customer service team in the industry—trained to answer any question about Graber Traditions Blinds
- Limited lifetime warranty

Graber Wood Characteristics

Wood used to manufacture Graber Wood Blinds has many natural characteristics that make it truly unique. The following are all natural characteristics of wood, and we do not consider them to be defects:

- Grain—The direction, size, and appearance of wood fibers vary greatly depending on where the wood is cut from within the tree
- Tiger Striping—Occurs when a tree develops wavy grain, due to genetics, soil content, or other natural scenarios
- Burl—Formed from an irregular growth on the outer edge of the tree
- Bird's Eye—Small area on the surface of the board where fibers are contorted to form circular figures that resemble birds' eyes
- Pin Knots—Vary in size, shape, structure, and color
- Mineral Marks—Dark or discolored areas caused by minerals which the tree extracts from the water or soil; can be either a streak or a stain, usually blackish blue
- Knotty Pine/Rustic—Material contains markings that are more extreme than in standard products; the number and degree of marking will vary throughout the blind

Please be assured that these markings in no way affect the durability or the structural integrity of the blind.

Natural variations in color and grain are inherent in the beauty of wood. These variations are within established industry guidelines and should be expected. In addition, blinds may stain slightly darker or lighter than the swatches shown in the sampling.

NOTE: Elite Walnut, Maple, and Cherry will have the unique natural variations of these beautiful hardwoods—these variations are to be expected. Blinds made from these materials will undergo a degree of color change over time, further enhancing the beauty of the wood.

Features

Traditions® Wood Blinds

- Stained and painted blinds crafted from North American hardwoods
- Finish highlights the natural characteristics of wood
- 1" (2.6 cm), 2" (5.1 cm), and 2 $\frac{3}{8}$ " (6.1 cm) slat sizes available
- Sandblast is not available on keystones
- Cordless lift option; not available on 1" (2.6 cm)
- NoHoles™ option available for maximum privacy; not available on 1" (2.6 cm) or with cordless lift
- Easy grip bottomrail for superior closure; makes lifting and lowering cordless lift blinds easier; not available on 1" (2.6 cm)
- Decorative cloth tape option; not available with 1" (2.6 cm) or NoHoles
- Decorative tassel selection

Elite Wood Blinds

- Available in all Graber® wood paints and stains
- 2" (5.1 cm) and 2 $\frac{3}{8}$ " (6.1 cm) slat sizes available
- Sandblast finish available on any 2" (5.1 cm) paint or stain
- Custom color available; not available in unique finishes
- Cordless lift option
- NoHoles option available for maximum privacy; not available with cordless lift
- Easy grip bottomrail for superior closure; makes lifting and lowering cordless lift blinds easier
- Decorative cloth tape option; not available with NoHoles
- Decorative tassel selection
- Specialty shapes
- Accent valance and bottomrail: complement the window and décor of the room by specifying a different color valance and bottomrail

Elite Wood Blinds—Authentic Hardwoods

- 2" (5.1 cm) wood blinds made from premier North American hardwoods—Walnut, Maple, and Cherry with a clear coat finish that further enhances the wood's beauty
- Cordless lift option
- NoHoles option available for maximum privacy; not available with cordless lift
- Easy grip bottomrail for superior closure; makes lifting and lowering cordless lift blinds easier
- Decorative cloth tape option; not available with NoHoles
- Decorative tassel selection

Traditions Composite Blinds

- Moisture-resistant multiple polymer composite slats
- 2" (5.1 cm) and 2 $\frac{1}{2}$ " (6.4 cm) slat sizes available
- Cordless lift option
- NoHoles option available for maximum privacy; not available with cordless lift
- Trapezoid bottomrail for superior closure
- Decorative cloth tape option; not available with NoHoles

Lake Forest® Premium Faux Wood and Faux Wood Blinds

- Solid or woodgrain moisture-resistant engineered polymer slats
- 2" (5.1 cm) and 2 $\frac{1}{2}$ " (6.4 cm) slat sizes available in both premium faux wood and faux wood
- Cordless lift option
- NoHoles option available for maximum privacy; not available with cordless lift
- Trapezoid bottomrail for superior closure; available on premium faux wood blinds only
- Rectangular bottomrail; available on faux wood blinds only
- Decorative cloth tape option; not available with NoHoles

[^]Available with elite wood only.

^{^^}Not available with 2 1/2" (6.4 cm) composite.

Options

Cordless Lift

- **For surcharge, see price charts**
- Available on wood, composite, and faux wood blinds (not available on 1" (2.6 cm) wood)
- Cordless lift blinds offer a safer alternative for homes with children and pets
- Tilt options available: Wand tilt eliminates dangling cords and is the safest option (maximum wand length is 48" (122 cm)); cord tilt is also available
- Easy to use: to lower blind, pull down; to raise, simply guide the blind into the desired location by gently lifting the bottomrail
- Not available with NoHoles™, cut-outs, or specialty shapes
- Legacy, craftsman, or symphony valances recommended with cordless lift blinds for better headrail coverage

	Wood	Composite	Faux Wood
Minimum Width inches (cm)	12 (30.5)	12 (30.5)	12 (30.5)
Maximum Single Blind Width inches (cm)	84 (213.4)	66 (167.7)	63 (160.1)
Maximum Multiple Blinds on One Headrail inches (cm)	120 (304.8)	120 (304.8)	120 (304.8)
Minimum Height inches (cm)	12 (30.5)	12 (30.5)	12 (30.5)
Maximum Height inches (cm)	86 (218.5)*	72 (182.9)	72 (182.9)
Maximum Square Footage square feet (square meters)	50 (127.0)	29 (73.7)	31.5 (80.1)

*78" (198.2 cm) for authentic hardwood Cherry and Maple, 68" (172.8 cm) for Walnut.

Motorized Tilt

See motorization price list for size specifications, options, and surcharges

- Available on 2" (5.1 cm) and 2¾" (6.1 cm) wood blinds and 2" (5.1 cm) and 2½" (6.4 cm) composite blinds
- Motorization will only tilt slats; raising or lowering blind is manual lift
- Blinds can be operated from virtually anywhere in the home
- Provides easy operation of hard-to-reach or large blinds
- Efficiently manages energy (heat gain and loss)
- Tilt slats on groups of multiple blinds simultaneously or individually
- Easily integrated with home automation systems
- Low voltage motorization requires no costly electrical hardwiring
- Motor located on the left side within the headrail; lift is on the right side
- Not available with multiple blinds on one headrail, specialty shapes, or hold down brackets
- Available with multiple power and control options

NOTE: Motorization components and accessories have a five-year limited warranty; excludes batteries.

Options

Multiple Blinds on One Headrail

Gap 1/4" (.07 cm)

- **Surcharge: blinds to the left of the solid line on the price charts**
- **No charge: blinds to the right of the solid line on the price charts**
- Two or more blinds can be installed on a single headrail to provide a practical treatment for larger windows or sliding patio doors
- Due to weight limitations, some blinds must be manufactured as two or three blinds on one headrail

Multiple Blinds	Control Cord Locations	Gap inches (cm)
Cord Lift		
Two-On-One Headrail	Left panel: Left lift only and tilt left or tilt right* Right panel: Right lift only and tilt left or tilt right*	1/4 (0.7) (1/2 (1.3) on NoHoles™)
Cordless Lift		
Two-On-One Headrail	Left panel (tilt left) Right panel (tilt right)	1/4 (0.7)
Three-On-One Headrail	Left panel (tilt left) Right panel (tilt right) Center panel (tilt left)	1/4 (0.7)

*2" (5.1 cm) and 2½" (6.4 cm) premium faux wood and faux wood cannot have same side controls.

NOTE: Optional control locations may be requested.

Measuring

1. Measure overall width of the area to be covered. If space permits, an overlap of 1½" (3.9 cm) per side is recommended for outside mounts.
2. Measure the width of the area each blind is to cover. Measure and specify the left blind first, continuing to the right. Allow a minimum of ¼" (0.7 cm) between blinds for operating clearance.
3. Total width of all blinds, plus clearance(s), must equal overall width.
4. Measure height as follows:
 - a. For windows, use standard inside or outside measuring procedures.
 - b. For patio doors, measure height within ¾" (2.0 cm) of floor, either from ceiling or a point at least 6½" (16.6 cm) above the door frame. Check slat count table to see if blind will completely clear the doorway.

Ordering

1. Indicate whether two or three blinds are to be mounted on one headrail.
2. Specify total width of headrail.
3. Indicate each panel width separately, specify left blind first, continuing to the right.
4. Specify control positions.
5. Add appropriate surcharge, if to the left of the solid line on the price chart.

Options

NoHoles™

- **No charge**
- The design of the NoHoles option eliminates route holes, providing maximum privacy and the best available light control
- Cleaning is simplified by sliding the NoHoles slats out and wiping clean, or keeping the slats in place and vacuuming using a soft brush attachment
- Not available on 1" (2.6 cm) wood, blinds with cloth tapes, cordless lift, or specialty shapes
- Best suited for inside mount applications due to the slight shifting of slats during operation

Standard

NoHoles

Cut-Out Blinds

- **For surcharge, see options pricing**
- Maximum cut-out is 1" (2.6 cm) before route hole or NoHoles notch (corner and side cut-outs only)
- Cut-outs are measured with the slats tilted in the closed position for maximum clearance
- The cut-out height may be larger than requested due to slat placement
- Measure height from the bottom of the window up to the desired location
- Not available with cordless lift and wood vertical blinds

NOTE: Standard lead time does not apply for this feature. Additional manufacturing time is required.

Side Cut-Out

Control Lengths for Cords and Wands

Finished Blind Height inches (cm)	Wand Length* inches (cm)	Cord Length
up to 36 (91.4)	12 (30.5)	1/3 of blind height
36 1/16 to 60 (91.6 to 152.4)	20 (50.8)	
60 1/16 to 70 (152.6 to 177.8)	30 (76.2)	
70 1/16 to 80 (178.0 to 203.2)	40 (101.6)	
80 1/16 to 90 (203.4 to 228.6)	48 (122.0)	
90 1/16 to 100 (228.8 to 254.0)	60 (152.4)	
100 1/16 to 120 (254.2 to 304.8)	72 (182.9)	

*Wands over 48" (122.0 cm) long are a clear plastic.

NOTE: Above control lengths may not fit your control needs based on window location or operator. Special length cords and wands may be requested at the time of ordering.

Options

Bay and Corner Windows

- Made as individual blinds to fit in bay or corner windows
- Each blind is on an individual headrail and has its own control
- Indicate each blind with bypass or butt; bypass is the blind mounted into the corner; butt is the blind butted up to the other blind; must provide blind location (left and right blind)
- Control locations can be on the right or left side of each blind; placing controls opposite the corner is recommended
- Depending on the angle, some corner blinds cannot be raised to the same height

- Manufacturer will take appropriate deductions for proper fit
- No additional charge
- Valances will be mitered in the corner for finished look
- Cornices and wood verticals are not available on bay or corner windows
- Slat alignment cannot be guaranteed on side by side blinds
- If you do not want manufacturer to take deductions DO NOT order as bay or corner

NOTE: Standard lead time does not apply for this feature. Additional manufacturing time is required.

Measuring Information

Corner Window

Measure:

Width of each window from corner to the point you would like to cover.

Three-Sided Bay Window

Measure:

A and C: Width of side windows from the corners to the point you would like the blind to cover.

B: Width of the center window from corner to corner.

Angle A-B: Angle between windows (A) and (B).

Angle B-C: Angle between windows (B) and (C).

Four-Sided Bay Window

Measure:

A and D: Width of side windows from the corners to the point you would like the blind to cover.

B and C: Width of each window from corner to corner.

Angle A-B: Angle between windows (A) and (B).

Angle B-C: Angle between windows (B) and (C).

Angle C-D: Angle between windows (C) and (D).

Five-Sided Bay Window

Measure:

A and E: Width of side windows from the corners to the point you would like the blind to cover.

B, C, and D: Width of each center window from corner to corner.

Angle A-B: Angle between windows (A) and (B).

Angle B-C: Angle between windows (B) and (C).

Angle C-D: Angle between windows (C) and (D).

Angle D-E: Angle between windows (D) and (E).

NOTE: Measure bay angle using protractor or angle finder, or use two business cards in bay corner as illustrated above, trace onto paper and fax to customer service.

Options

Cloth Tapes

- For surcharge, see price charts
- Decorative option to add to wood, composite, or faux wood blinds
- Decorative tapes will have pattern visible to room side only
- Not available with 1" (2.6 cm) wood, NoHoles™ option, or specialty shapes
- See chart below for availability of colors

Options

Decorative Tassels (wood blinds only)

Standard Tassel

1" (2.6 cm) wood tassel stained or painted to coordinate with your wood blinds.

Brass Tassel

1" (2.6 cm) antique brass tassel ideal for medium and dark stains and paints.

No charge for elite blinds.

Nickel Tassel

1" (2.6 cm) nickel tassel ideal for light stains and paints.

No charge for elite blinds.

Carved Tassel

1" (2.6 cm) carved wood tassel stained or painted to coordinate with your wood blinds.

No charge for elite blinds (not available on authentic hardwoods).

Flared Tassel

2¼" (5.8 cm) long, genuine hardwood tassel stained or painted to coordinate with your wood blinds.

No charge for elite blinds (not available on authentic hardwoods).

Ovate Tassel

2¼" (5.8 cm) long, genuine hardwood tassel stained or painted to coordinate with your wood blinds.

No charge for elite blinds (not available on authentic hardwoods).

NOTE: For surcharges see options pricing.

Accent Color (elite wood blinds only)

For surcharge, see options pricing.

Complement the window and décor of the room by specifying a different color valance and bottomrail. Single color only.

Custom Color

For surcharge, see options pricing.

Graber® offers the unique option of custom color either paint or stain. Use the following guidelines when placing your order:

1. Complete the custom color match request form. Forms can be found on graberdirect.com.
2. Supply Springs Window Fashions with a color sample labeled with the color name and purchase order number. The sample needs to be at least 2" (5.1 cm) x 2" (5.1 cm). For best results, submit a 3" (7.7 cm) x 3" (7.7 cm) color sample.
3. Send the order, along with the request form and color sample to: Springs Window Fashions, LLC
ATTN: Graber Custom Color
33 West 3rd Street, Suite 400
Williamsport, PA 17701
4. Approval of the custom color sample is required on orders of six or more blinds. A sample of the custom color will be sent upon request for orders of less than six blinds. If a custom color sample is not requested, the sample provided will be used to manufacture the wood blinds. If the color sample is to be returned, please note this on your order.
5. Custom color samples will be sent for approval approximately two weeks after receiving the original color sample.
6. Once approval is received, fabrication of the custom color blinds will begin.

Why Elite Wood for Your Client's Home

Elite wood blinds are individually hand finished using a wiping technique to enhance the beauty of the wood and create a truly beautiful blind as unique as your client.

Additional benefits of elite wood blinds include:

- Each wood component is finished after being cut and routed for the client's individual blind—creating wood components that are completely sealed from the environment
- Elite wood finish is applied using a wiping process rather than flow coating the finish; the end result is a finish that further enhances the beautiful characteristics of the wood
- All Graber Traditions® paints and stains are available using this unique finishing style, or create a completely customized blind using the custom color option

How to Order Elite Wood: Special Ordering Instructions

On graberdirect.com

- Select the description elite wood
- Select the finish choice
 - Elite finish
 - Elite high gloss
 - Sandblast finish (2" (5.1 cm) only)
- Follow the remaining ordering instructions to complete the order

NOTE: Due to the nature of the elite process, blinds and specialty shapes require an extended lead time. Lead times vary depending on blind sizes and quantities.

Options

How to Measure for Valance Returns

Window depths vary considerably depending on the age and style of the window. **Always** measure the window depth, regardless of the type of window treatment the client is considering. Knowing the depth when the order is placed can help prevent costly errors.

Please use our valance return cards to assist in correctly calculating valance return sizes.

To calculate the return width, use this formula:

(standard return width) minus (client window depth) = special return width to order for inside mount blind

REMEMBER:

- Smallest return width is $\frac{1}{2}$ " (1.3 cm) (inside measurement), maximum return width is 8" (20.4 cm)
- Returns up to 1" (2.6 cm) (inside measurement) will be glued; $1\frac{1}{16}$ " (2.7 cm) to $4\frac{5}{8}$ " (11.8 cm) optional glued
- The width of a return and the width of a valance are measured on the inside (back side) of the valance, not the outside (face) of the valance (see diagram at right)
- Standard return size for $2\frac{3}{8}$ " (6.1 cm) blinds—subtract $\frac{3}{16}$ " (0.5 cm) prior to determining special return width
- Standard return size for $2\frac{1}{2}$ " (6.4 cm) blinds—subtract $\frac{3}{8}$ " (1.0 cm) prior to determining special return width

A: Inside Measurement
B: Outside Measurement

How to Measure and Order Valances

If a valance is ordered, it is supplied in one of the following styles, depending on how your blind will be mounted. For a more custom look, the valance and returns may be special ordered to your measurements.

NOTE: Valances with returns are measured and cut from the **INSIDE** of the miter to ensure the most accurate fit when installed over the headrail or window frame.

Blinds ordered as an OUTSIDE MOUNT

with requested returns will be supplied with returns sized to cover the end of the blind back to the mounting surface. If projection brackets are requested when the blind is ordered, longer returns will be sent automatically. Outside mount blinds are available without returns upon request.

A: Inside Measurement
B: Outside Measurement

NOTE: Minimum return width is $\frac{1}{2}$ " (1.3 cm), maximum return width is 8" (20.4 cm).

Additional Ordering Information:

- Please state at the time of order if the valance and return measurements are for the **EXACT** size required so that no additions or deductions are made
- Different return sizes can be ordered for the same valance; always provide **LEFT** return **INSIDE** measurement first when ordering
- Valance projection is different if the blind has a wand tilt or cord tilt; please refer to the previous specifications chart for more information
- Returns up to 1" (2.6 cm) will be glued; $1\frac{1}{16}$ " (2.7 cm) to $4\frac{5}{8}$ " (11.8 cm) optional glued; $4\frac{11}{16}$ " (12.0 cm) and greater will not be glued
- Bay and corner blinds—must specify return width on inside mount at time of order
- Single side returns are available—opposite end will be cut straight

Options

Valance Keystone

- Decorative keystones are required on wood valances that require splicing
- Keystones will be equally spaced unless special splice locations are requested at time of order
- Optional keystones can be ordered with single piece valances, or in addition to required keystones at the time of order only
 - Minimum width with a keystone: 12" (30.5 cm)
 - Maximum number of keystones: 3
- Keystones will be stained or painted to match the valance ordered as standard; optional different color selection available
- Keystones not available on elite authentic hardwood, distressed wood, barnwood, in sandblast finish, composite, or faux wood valances
- Keystones cannot be ordered for existing valances, attachment will not work
- All inside mount applications will have a slight light gap at the top of valance when installed

Splicing Requirements

Profile	Number of Sections	Number of Keystones	No Returns		With Returns (inside dimensions)	
			Minimum inches (cm)	Maximum inches (cm)	Minimum inches (cm)	Maximum inches (cm)
2½" (6.4 cm) Classic Barnwood Valance*	1	0	8 (20.4)	100¼ (254.7)	8 (20.4)	98⅞ (249.9)
3" (7.7 cm) Classic Wood Valance	2	1	100⅞ (254.8)	200½ (509.3)	98⅞ (250.1)	198⅞ (504.6)
3½" (8.9 cm) Craftsman Wood Valance						
3½" (8.9 cm) Legacy Wood Valance	3	2	200⅞ (509.5)	300¾ (764.0)	198⅞ (504.7)	298⅞ (759.2)
4½" (11.5 cm) Symphony Wood Valance						

*Keystones not available.

Outside Mount

- Wood valances requiring a splice will include a keystone (see chart above for details)

Inside Mount

- Wood valances 100¼" (254.7 cm) or wider will require a keystone

How to Measure a Special Splice Location

A keystone is supplied for valance widths that require a splice. Keystones will be equally spaced unless a special splice location is requested at time of order. The placement of the splice will be calculated by the factory using an **INSIDE** measurement from the mitered corner to the location specified on the order.

Each splice location should be recorded starting from the **LEFT BACKSIDE** corner.

These formulas are used to calculate BACKSIDE valance measurements.

Inside Mount with No Returns	Ordered width - ¼" (0.2 cm)
Inside Mount with Returns	Ordered width + ¼" (0.7 cm)
Outside Mount with No Returns	Ordered width + ½" (1.3 cm)
Outside Mount with Returns	Ordered width + ¾" (2.0 cm)

Example: Overall valance width = 80" (203.2 cm) backside measurement
 First splice from left = 30" (76.2 cm) backside measurement
 Second splice from left = 50" (127.0 cm) backside measurement

For surcharge, see options pricing.

NOTE: All measurements need to be from BACKSIDE.

Options

Wood Specialty Shapes: Incline Wire Blinds

NOTE: Maximum degree from vertical is 45°.
Blinds over 30° will have marginal tilt.
Blinds over 40° will have marginal lowering.

- Blinds up to 60" (152.4 cm) will have 2 wires
- Blinds over 60" (152.4 cm) will have 4 wires

Options Available:

- Decorative tassels
- Ring tilt (2" (5.1 cm) only)
- Custom color
- High gloss finish
- Accent color

NOTE: Due to the nature of the elite process, specialty shapes require an extended lead time. Lead times vary depending on blind sizes and quantities.

Features

- For pricing, see options pricing
- Cord, wand, and ring tilt options available
- Wand control is the universal joint attachment
- Width less than 24" (61.0 cm) cannot have same side controls
- There is a turn buckle in the headrail for adjusting the tension in the wires
- At the bottomrail, there are sill plates that are used to attach the wires to the sill
- Color coordinated box style bracket

Incline (tension) Wire Blinds

- Rectangular blinds will tilt only; may be used in windows installed vertically to 45 degrees from vertically (maximum)
- Ideal for applications that require stabilized blinds, such as boats

- A. Rise—The vertical measurement from the top of a window to the RUN to form a 90 degree angle.
- B. Run—The horizontal measurement from the bottom of a window to the RISE to form a 90 degree angle.
- C. Angle—The degree the window is slanted perpendicular (at a right angle) to the floor.
- D. Catenary—The degree a blind may possibly bow. No measurement needed. Must give measurements for width and height. A and B are used to calculate the angle (must be less than 45°).

Measuring Information

Use regular measuring instructions; see measuring instructions tab. Available on elite wood blinds.

Size Considerations	Incline Wire inches (cm)	
Minimum Width	16 (40.7)	
Maximum Width	96 (243.9)	
Minimum Height	12 (30.5)	
Size Considerations	Blind Width inches (cm)	Max Height inches (cm)
Maximum Height	16 to 32 (40.7 to 81.3)	120 (304.8)
	32½ to 57 (81.6 to 144.8)	108 (274.4)
	57½ to 92 (145.1 to 233.7)	102 (259.1)
	92½ to 96 (234.0 to 243.9)	90 (228.6)

Depth Requirements	2" (5.1 cm) inches (cm)	2½" (6.1 cm) inches (cm)
Minimum	¾ (2.0)	¾ (2.0)
Flush with Casing	2¾ (6.1)	2¾ (6.1)

NOTE: Not available with cloth tapes, cordless lift, cut-outs, multiple blinds on one headrail, NoHoles™, or valances.

Slat alignment cannot be guaranteed on side by side blinds.

Options

Wood Specialty Shapes: Angle Top or Bottom

Features

- For pricing, see price charts
- Available in 2" (5.1 cm) and 2 3/8" (6.1 cm) slats
- Extruded aluminum headrail
 - 2 1/4" (5.8 cm) depth x 2" (5.1 cm) height

- Lightblocking headrail is not available
- See below for measuring guidelines
- Not available with cloth tapes, cordless lift, cut-outs, motorized tilt, NoHoles™, or unique finishes

Controls

- Cord and wand tilt options available
- Standard wood wand lengths are 12" (30.5 cm), 20" (50.8 cm), 30" (76.2 cm), 40" (101.6 cm), and 48" (122.0 cm)
- Polycarbonate wands available in lengths over 48" (122.0 cm)
- Universal joint attachments for wand control
- Wand and cord tilt controls will be approximately one third the length of the blind; controls on angle top or angle bottom blinds will be located on the short side of the blind
- Due to the angle of the headrail, blinds may not operate as smoothly as a standard blind
- Maximum angle is 45°
- Blinds have tilt function only

Size Considerations	2" (5.1 cm) inches (cm)	2 3/8" (6.1 cm) inches (cm)
Minimum Width	15 (38.1)	15 (38.1)
Minimum Height*	12 (30.5)	12 (30.5)
Maximum Width	96 (243.9)	96 (243.9)
Maximum Height	120 (304.8)	120 (304.8)

*Long side.

Depth Requirements	2" (5.1 cm) inches (cm)	2 3/8" (6.1 cm) inches (cm)
Minimum	3/4 (2.0)	3/4 (2.0)
Flush with Casing	3 3/8 (9.9)	3 3/8 (9.9)

Mounting Options

- Blinds under 24" (61.0 cm) must use hold down brackets to ensure level installation

NOTE: Due to the nature of the elite process, specialty shapes require an extended lead time. Lead times vary depending on blind sizes and quantities.

Valance

5" (12.7 cm) Flat Valance

- Valance returns are not available

Angle Top or Bottom: Measuring Guidelines

Refer to diagrams for illustrations of measurements to include when ordering an angle top or angle bottom blind.

Also specify/include:

- Inside or outside mount

W: Straight width

B: Length of short side

H: Length of long side

A: Angle width

Options

Wood Specialty Shapes: Trapezoid, Triangle, and Octagon

Features

- For pricing, see price charts
- Available in 2" (5.1 cm) and 2½" (6.1 cm) slats
- Extruded aluminum headrail
 - 2¼" (5.8 cm) depth x 2" (5.1 cm) height

Controls

- Cord and wand tilt options available
- Standard wood wand lengths are 12" (30.5 cm), 20" (50.8 cm), 30" (76.2 cm), 40" (101.6 cm), and 48" (122.0 cm)
- Polycarbonate wands available in lengths over 48" (122.0 cm)
- Universal joint attachments for wand control
- Wand and cord tilt controls will be approximately one third the length of the blind
- Due to the angle of the headrail, blinds may not operate as smoothly as a standard blind
- Blinds have tilt function only

Mounting Options

- All shapes receive predrilled openings and fasteners for direct mounting
 - Inside mounts: predrilled openings are located on the underside of the headrail
 - Outside mounts: predrilled openings are located on the front and back face of the headrail

NOTE: Due to the nature of the elite process, specialty shapes require an extended lead time. Lead times vary depending on blind sizes and quantities.

- Lightblocking headrail is not available
- See below for measuring guidelines
- Not available with cloth tapes, cordless lift, cut-outs, motorized tilt, NoHoles™, or unique finishes

Size Considerations	2" (5.1 cm) inches (cm)	2½" (6.1 cm) inches (cm)
Minimum Width**	15 (38.1)	15 (38.1)
Minimum Height	12 (30.5)	12 (30.5)
Maximum Width	96 (243.9)	96 (243.9)
Maximum Height	120 (304.8)	120 (304.8)

**Octagon and trapezoid: 7½" (19.1 cm) exact minimum for top headrail.

Depth Requirements	2" (5.1 cm) inches (cm)	2½" (6.1 cm) inches (cm)
Minimum	2¼ (5.8)	2¾ (6.1)
Flush with Casing	3⅞ (9.9)	3⅞ (9.9)

Valance

5" (12.7 cm) Flat Valance

- Valance returns are not available

Trapezoid, Triangle, or Octagon: Measuring Guidelines

†Verify each section width.

††Depending on sizes, octagon may be framed on all sides. Contact customer service.

Refer to diagrams for illustrations of measurements to include when ordering a trapezoid, triangle, or octagon blind.

W: Bottom width

H: Length of long side

A: Top width

Also specify/include:

- Inside or outside mount
- Control location

Options

Wood Specialty Shapes: Arched Blinds

Features

- For pricing, see price charts
- Available in 2" (5.1 cm) and 2 3/8" (6.1 cm) slats
- Extruded aluminum headrail
 - 2 1/4" (5.8 cm) depth x 2" (5.1 cm) height

- Lightblocking headrail is not available
- See below for measuring guidelines
- Not available with cloth tapes, cordless lift, cut-outs, motorized tilt, NoHoles™, or unique finishes

Controls

- Cord and wand tilt options available
- Standard wood wand lengths are 12" (30.5 cm), 20" (50.8 cm), 30" (76.2 cm), 40" (101.6 cm), and 48" (122.0 cm)
- Polycarbonate wands available in lengths over 48" (122.0 cm)
- Arched blinds will fully tilt but will not lift
- Universal joint attachments for wand control
- Wand and cord tilt controls will be approximately one third the length of the blind; controls on arched blinds will be located on the low side of the quarter arch
- Due to the angle of the headrail, blinds may not operate as smoothly as a standard blind
- Blinds have tilt function only

	2" (5.1 cm) inches (cm)	2 3/8" (6.1 cm) inches (cm)
Minimum Arch Width: Full Arch	24 (61.0)	24 (61.0)
Minimum Arch Width: Quarter Arch	15 (38.1)	15 (38.1)
Minimum Arch Height: Full Arch	12 (30.5)	12 (30.5)
Minimum Arch Height: Quarter Arch	12 (30.5)	12 (30.5)
Maximum Arch Width	96 (243.9)	96 (243.9)
Maximum Height of Extended Arches, Quarter Arches	120 (304.8)	120 (304.8)

Mounting Options

- We recommend hold down brackets for quarter arches less than 24" (61.0 cm) in width to ensure level installation
- Arches will receive predrilled openings and fasteners
 - Inside mounts: predrilled openings are located on the underside of the headrail
 - Outside mounts: predrilled openings are located on the front and back face of the headrail

Depth Requirements	2" (5.1 cm) inches (cm)	2 3/8" (6.1 cm) inches (cm)
Minimum	2 1/4 (5.8)	2 3/8 (6.1)
Flush with Casing	3 3/8 (9.9)	3 3/8 (9.9)

NOTE: Due to the nature of the elite process, specialty shapes require an extended lead time. Lead times vary depending on blind sizes and quantities.

Valance

5" (12.7 cm) Flat Valance

- Valance returns are not available

Arched Blinds: Measuring Guidelines

Refer to diagrams for illustrations of measurements to include when ordering an arched blind.

W: Straight width

B*: Length to springline (point where arch begins)

Template needs to extend 6" (15.3 cm) past the springline.

H*: Overall height

A: Arch height

Also specify/include:

- Inside or outside mount
- Control location

*A + B = H

†Perfect arch: height = 1/2 of width;

Perfect 1/4" (0.7 cm) = width and height are the same

^Customer must provide template

Options

Wood Specialty Shapes: Ovals and Circles

Features

- For pricing, see price charts
- Available in 2" (5.1 cm) and 2½" (6.1 cm) slats
- Extruded aluminum headrail
 - 2¼" (5.8 cm) depth x 2" (5.1 cm) height

Controls

- Cord and wand tilt options available
- Standard wood wand lengths are 12" (30.5 cm), 20" (50.8 cm), 30" (76.2 cm), 40" (101.6 cm), and 48" (122.0 cm)
- Polycarbonate wands available in lengths over 48" (122.0 cm)
- Universal joint attachments for wand control
- Wand and cord tilt controls will be approximately one third the length of the blind
- Blinds have tilt function only

Mounting Options

- All shapes receive predrilled openings and fasteners for direct mounting
 - Inside mounts: predrilled openings are located on the underside of the headrail
 - Outside mounts: predrilled openings are located on the front and back face of the headrail

NOTES:

1. For blinds less than 16 square feet (1.49 square meters), valance may appear disproportionate in scale.
2. Due to the nature of the elite process, specialty shapes require an extended lead time. Lead times vary depending on blind sizes and quantities.

Circles and Ovals: Measuring Guidelines

Refer to diagrams for illustrations of measurements to include when ordering a circle or oval blind.

W and H: Provide width and height.

Template required if width and height are not the same.

- Lightblocking headrail is not available
- See below for measuring guidelines
- Not available with cloth tapes, cordless lift, cut-outs, motorized tilt, NoHoles™, or unique finishes

Size Considerations	2" (5.1 cm) inches (cm)	2½" (6.1 cm) inches (cm)
Minimum Diameter Width or Height	24 (61.0)	24 (61.0)
Maximum Diameter Width or Height	72 (182.9)	72 (182.9)

Depth Requirements	2" (5.1 cm) inches (cm)	2½" (6.1 cm) inches (cm)
Minimum	2¼ (5.8)	2½ (6.1)
Flush with Casing	3⅞ (9.9)	3⅞ (9.9)

Valance

5" (12.7 cm) Flat Valance

- Valance returns are not available

NOTES:

1. Maximum spacing between ladders is 24" (61.0 cm).
2. Standard control positions: lift right/tilt left.
3. Maximum slat width is 96" (243.9 cm). Wider blinds must be multiple blinds on one headrail.
4. 7" (17.8 cm) to 8¹⁵/₁₆" (22.8 cm) not available with cloth tapes.
5. Cloth tape ladder quantity is the same as number of ladders listed above.

Also specify/include:

- Inside or outside mount
- Control location

Options

Making a Template for Specialty Blinds

1. Tape butcher paper, kraft, or construction paper over the window opening allowing plenty of overlap.
2. Being careful not to press against the template paper while tracing, draw an exact outline of the window opening. Pressing on the template paper may distort the paper and cause the wrong size to be made.
3. Remove the paper from the window opening. If the shade is an outside mount, add the desired amount of overlap to the window outline and draw a second outline around it to match the shape of the finished shade. Be sure to erase the inside line.
4. Mark the dimensions on the template. Check that the template dimensions match your measurements of the actual window opening.
NOTE: Make sure the template is of the window opening, not the glass only measurement.
5. Cut the shape from the paper.
6. **PLACE THE TEMPLATE BACK INTO THE WINDOW OPENING TO CHECK FOR PROPER FIT COMPLETELY AROUND.**
7. Indicate on the template
 - “Room side” and “top” on the template
 - Purchase order number
 - Customer’s name
 - Your store name and account number
8. Roll up template and place in a mailing tube. **DO NOT FOLD TEMPLATE.**
NOTE: Template of arch top plus 6" (15.3 cm) beyond springline (point where arch begins). Required for elongated arch.

NOTE: This is just a sample for illustration purposes only—other information may be needed for your order.

Mail to: Springs Window Fashions, LLC
33 West Third Street
Suite 400
Williamsport, PA 17701
ATTN: Specialty Dept.

NOTE: When mailing, make sure to get a tracking number and note your return address on the mailing tube.

ACCEPTABLE MATERIALS FOR MAKING TEMPLATES:

- Kraft paper
- Butcher paper
- Construction paper

WE WILL NOT ACCEPT TEMPLATES MADE FROM THE FOLLOWING MATERIALS:

- Newspaper
- Plastic
- Wax paper
- Fabric
- Tissue paper
- Roofing paper
- Existing arch shades
- Wrapping paper
- Cardboard
- Poster board

NOTE: If the material used to make a template stretches, tears easily, will not lay flat, or will mark the fabric—IT WILL NOT BE USED.

Using the Graber® Template Service

To use the template service:

1. Select template service when entering your order online.
2. Use the template worksheet (located on graberdirect.com) to determine what measurements you need to supply for each shape.
3. Enter the lettered measurements using line item comments.

For surcharge see options pricing.

How to measure for the template service:

- Measure the interior of the specialty application to the nearest 1/8" (0.4 cm) using a metal tape measure
- Document each measurement as outlined in “Wood Specialty Shapes: Arched Blinds” section
- Not available with gothic arch

General Information

Slat Route and Ladder Count Charts

Take any inside mount deductions before determining ladder quantity (inside mount— $\frac{1}{2}$ " (1.3 cm); outside mount—no deduction).

Blinds with two lift cords will have two clear plastic cord stop beads located approximately 2" (5.1 cm) below the headrail. Cords will continue down, each ending in a tassel. Blinds with three or more lift cords will have the cords joined together with a tassel approximately 2" (5.1 cm) below the headrail. Two individual cords will continue down, each ending in a tassel.

Traditions® 1" (2.6 cm) Wood Blinds

For Standard or Reverse Controls

Finished Blind Width inches (cm)	Slat End Route inches (cm)	# of Ladders	# of Lifts	# of Center Brackets
7 to 8 $\frac{1}{16}$ " (17.8 to 22.8)	1 $\frac{3}{4}$ (4.5)	2	2	0
9 to 13 $\frac{3}{4}$ " (22.9 to 35.0)	3 $\frac{3}{4}$ (8.3)	2	2	0
13 $\frac{1}{16}$ to 20 $\frac{3}{4}$ " (35.1 to 52.8)	4 (10.2)	2	2	0
20 $\frac{1}{16}$ to 35" (52.9 to 88.9)	6 (15.3)	2	2	0
35 $\frac{1}{16}$ to 58" (89.1 to 147.4)	6 (15.3)	3	2	1 over 48" (122.0 cm) FBW

General Information

Cordless Lift Blinds Product Detail: Wood, Composite, and Faux Wood

Pair cordless lift with wand tilt for a blind that eliminates operating cords and is safer for homes with children and pets, or pair it with cord tilt for fast, simple control.

To lower blind, simply pull down on the bottomrail. To raise the blind, simply guide the blind into the desired location by gently lifting the bottomrail.

Not available with sky pole option.

Features

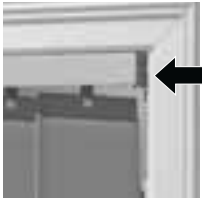

- Available in all Graber® Traditions® wood paints and stains
- Custom color available
- G-71 headrail features the patented pantograph traversing system to assure proportional spacing of vanes and automatically rotates the vanes when the cord is pulled to traverse the blind
- Unique design features multiple hinges on each vane to ensure they hang straight—without warping or twisting
- One-way or split stack available

Size Considerations

					
		Width		Height	
		Min Blind (exact) inches (cm)	Max Track inches (cm)	Min Blind inches (cm)	Max Blind inches (cm)
Blind Type	Price Group				
Elite Wood Vertical Blinds	J	9 (22.9)	144 (365.8)*	6 (15.3)	120 (304.8)

*Blinds over 96" (243.9 cm) wide: must be a split stack due to the weight of wood vane.

Depth Requirements for Inside Mount

					
		Partially recessed headrail in window casing/molding	Fully recessed headrail in window casing/molding		
Blind Type	Headrail Dimensions inches (cm)	Minimum Depth Mount inches (cm)	Flush with Casing inches (cm)	Depth Needed for Flush Mount Vane inches (cm)	Depth Needed for Flush Mount Valance inches (cm)
Elite Wood Vertical Blinds	$1\frac{3}{8} \times 1\frac{15}{16}$ (3.5 x 5.0)	2 $\frac{1}{8}$ (6.1)	3 (7.7)	3 $\frac{3}{4}$ (9.6)	4 $\frac{1}{2}$ (11.8)

Wood Vertical Blinds

Options: Cord and Chain Control

- Cord and chain control standard

Opening	Standard Controls	Optional Controls
Split Stack	Right	Left
One-Way Stack Right	Right	Left
One-Way Stack Left	Left	Right
Opposite Stack and Control	Left stack/right control	Right stack/left control

Chain and traversing cord must be at the same end of the track.

Paired Blinds

- **Price as two separate blinds**
- The appearance of a split stack blind can be achieved by pairing two individual one-way stack blinds; the center opening point can be either on center or off center
- Paired blinds can also be used when the required width is larger than the maximum width available for a single blind
- Specify paired blinds on your order
- Control locations must be same as stack
- Cut-outs not available
- Warranty will be voided if one-way stack is wider than 96"
- Available with one-way cord and chain only

Replacement Vane Ordering

FLL = Finished vane length/height—the measurement from the top of the vane to the bottom of the vane. This measurement is approximately 2¼" (5.8 cm) less than the FBL.

FBL = Finished blind length/height—the measurement from the top of the headrail to the bottom of the vane.

- **For surcharge, see options pricing**

How to Measure a Replacement Existing Vane, No Changes

- Measure the vane(s) from tip to tip to determine the exact length/height (FLL)
- Finished vane length (FLL) is measured from top of metal vane clip to the bottom of the vane
- No additional deductions will be taken by manufacturing; vanes will be manufactured to the exact size provided
- Submit the measurement as exact height

How to Measure a Replacement Existing Vane, Changing the Height of the Vanes

- Measure from top of mounted headrail to bottom of location to be covered
- Record this measurement; this is the finished blind length/height (FBL)
- Manufacturing will take appropriate deduction so vanes will cover desired area

NOTE: When ordering replacement vanes only, hinge direction must be indicated (up or down).

46	119½ (303.6)	144 (365.8)	117% (299.5)	144 (365.8)

1. Determine the clear opening width for one-way stack or split stack (see diagrams)—the additional 3" (7.7 cm) shown for privacy is recommended if ordering one-way stack.
2. Match the clear opening width dimension found under CO column. For even spacing, round up width measurement to the next size in the stack chart. Split stack will have even numbers of vanes.
3. Order the corresponding dimension found in the FBW (finished blind width) column.

EXAMPLE: One-way stack if determined width for clear opening window view is 54½" (138.5 cm), order width needed to provide full unobstructed view is 66¾" (169.6 cm).

NOTE: For one-way stack blinds add an additional 3" (7.7 cm) to the clear opening before calculating the finished blind width.

One-Way Stack Finished Blind Width (FBW)

Split-Stack
(recommended for balanced appearance)
finished blind width (FBW)

Wood Vertical Blinds

Product Detail

Pantograph Traversing System

- Keeps vanes evenly spaced whether blind is closed or partially open

Vertical Vane Splice

- See chart for splices vs. height of vane

Height of Vanes without Metal Clip inches (cm)	Number of Splices Per Vane
0 to 24 (0 to 61.0)	0
$24\frac{1}{16}$ to $47\frac{1}{8}$ (61.2 to 119.7)	1
$47\frac{1}{16}$ to $70\frac{1}{2}$ (120.2 to 179.1)	2
$70\frac{9}{16}$ to $93\frac{3}{4}$ (179.3 to 238.2)	3
$93\frac{13}{16}$ to 117 (238.3 to 297.2)	4

Installation Hardware for Wood Vertical Blinds

Track Clip for Inside or Ceiling Mount

Angle Bracket for Outside or Wall Mount

Optional 4" (10.2 cm) Angle Bracket

NOTE: Must be requested at time of order.

Mount	Standard/Optional	Hardware
Inside	Standard	Track clip
Outside	Standard	$3\frac{3}{4}$ " (8.3 cm) angle bracket with track clip
	Optional	4" (10.2 cm) angle bracket with track clip

Add Surcharge to Blind Price

Multiple Blinds on One Headrail	\$44 (no charge to the right of the solid line)
---------------------------------	---

See options pricing for additional options and surcharges.

NOTE: Due to weight limitations, blinds to the right of the solid line must be manufactured as multiple blinds on one headrail. Single blinds over 43 square feet (3.99 square meters) will be heavy and difficult to lift and may have light gaps toward the bottom of the blind.

Cloth Tapes	Add 20%
Multiple Blinds on One Headrail	44 (no charge to the right of the solid line)

See options pricing for additional options and surcharges.

*Cordless lift blinds are available in the heavy outlined area above; multiple blinds on one headrail are required for cordless lift blinds over 84" (213.4 cm) wide. Cordless lift maximum height is 86" (218.5 cm).

NOTE: Due to weight limitations, blinds to right of solid line will be manufactured as multiple blinds on one headrail. Single blinds over 43 square feet (3.99 square meters) will be heavy and difficult to lift and may have light gaps toward the bottom of the blind.

Add Surcharge to Blind Price

Cordless Lift*	\$119
Cloth Tapes	Add 20%
Multiple Blinds on One Headrail	44 (no charge to the right of the solid line)

See options pricing for additional options and surcharges.

*Cordless lift blinds are available in the heavy outlined area above; multiple blinds on one headrail are required for cordless lift blinds over 84" (213.4 cm) wide. Cordless lift maximum height is 78" (198.2 cm), 68" (172.8 cm) for Walnut.

NOTE: Due to weight limitations, blinds to right of solid line will be manufactured as multiple blinds on one headrail. Single blinds over 43 square feet (3.99 square meters) will be heavy and difficult to lift and may have light gaps toward the bottom of the blind.

Colors

Cherry C007
 Maple. M007
 Walnut W007

NOTE: Elite Walnut, Maple, and Cherry will have the unique natural variations of these beautiful hardwoods—these variations are to be expected. Blinds made from these materials will undergo a degree of color change over time, further enhancing the beauty of the wood.

Multiple Blinds on One Headrail	44 (no charge to the right of the solid line)

See options pricing for additional options and surcharges.
 *Cordless lift blinds are available in the heavy outlined area above; multiple blinds on one headrail are required for cordless lift blinds over 66" (167.7 cm) wide. Cordless lift maximum height is 72" (182.9 cm).

NOTE: Due to weight limitations, blinds to right of solid line will be manufactured as multiple blinds on one headrail. Single blinds over 43 square feet (3.99 square meters) will be heavy and difficult to lift and may have light gaps toward the bottom of the blind.

NOTE: Majestic valance is recommended with 2½" (6.4 cm) blinds or cordless lift for better headrail coverage.

See options pricing for additional options and surcharges.

*Cordless lift blinds are available in the heavy outlined area above; multiple blinds on one headrail are required for cordless lift blinds over 63" (160.1 cm) wide. Cordless lift maximum height is 72" (182.9 cm).

NOTE: Due to weight limitations, blinds to right of solid line will be manufactured as multiple blinds on one headrail. Single blinds over 43 square feet (3.99 square meters) will be heavy and difficult to lift and may have light gaps toward the bottom of the blind.

NOTE: Majestic valance is recommended with 2½" (6.4 cm) blinds or cordless lift for better headrail coverage.

Colors: Smooth and Textured

2½" (6.4 cm) Colors

Buttermilk 7078
 Coconut 7630
 Coconut Textured 7299
 Marshmallow 7742
 Milky Way 7058
 Seattle Grey 7774
 White 7035

*Classic valance will be textured to coordinate with textured slats. Majestic valance will be color coordinated in a smooth finish.
