Features

Graber® Pleated Shades include a variety of prints and elegant weaves in fashionable colors. The unique design of the back-ladder support of EvenPleat® ensures that pleats will not sag or flatten. These classic shades are an elegant addition to any window and match easily with other window treatments.

- Ladder design gives pleats an even dimensional appearance
- Many fashion-inspired colors enhance any room
- All shade components are color coordinated
- Offer numerous light control and privacy levels
- Two liners offered for light-control: light filtering and room darkening
- Two pleat sizes offered: 1" (2.6 cm) and 2" (5.1 cm) pleat (select styles)

Light-control And Privacy Levels

Sheer: Allows the greatest amount of light into the room for a minimum amount of privacy and a view to the outside. Objects in the room can be seen quite clearly through shades.

Light Filtering*: Allows light to gently filter through and provides privacy. Images and shapes may be seen through these shades, but details are not visible. Deep fabric colors provide moderate light control, while light colors provide lower light control.

Room Darkening*: Allows some light to filter into the room and provides privacy. Objects in a lit room seen through these shades appear as vague shapes. Deep fabric colors darken a room; light colors filter and diffuse bright sunlight.

***These fabrics are translucent and their colors may be influenced by changing light conditions. Colors may appear to vary depending upon the time of day and type of lighting, as well as whether the shade is partially or fully lowered.**

Oeko-Tex® Standard 100 Certified Fabrics

Fabric styles Crossweave, Desert, Grasscloth, Magnolia, Marquis, Prism, Tuvalu are Oeko-Tex Standard 100 certified and are free of PVC, halogen, lead, formaldehyde, allergenic dyes, pesticides, phenols, heavy metals and meet all VOC content limits.

Cordless Lift

- **For surcharge, see Price Charts**
- Available on EvenPleat and FashionPleat shades and 2" (5.1 cm) EvenPleat fabrics
- Available with the Privacy Liner option on single panels of fabric (no overlap)
- Not available with the following fabrics: Brighton, Brighton FR, Geneva and Blackout Liner
- Cordless Lift shades are the safest window shade alternative; ideal for homes with children and pets
- Available as multiple shades on one headrail (standard gap ¾" (1.0 cm))
- Side mounts available up to 60" (152.4 cm) wide
- Not available on specialty applications
- Overlaps not available with Cabana, Grasscloth, Magnolia, Marquis, Orchestra
- An optional sky pole is available for hard to reach shades 36" w(91.5 cm) or less in width. Sky poles are not recommended over 36" (91.5 cm), however, if required, two sky poles should be ordered to ensure even operation.

NOTE: All Cordless Lift shades should be used on windows where the consumer can comfortably raise and lower the shade with their hand and have easy access. Very high windows should use Standard Cord Control shades rather than Cordless Lift.

NOTE: Cordless Lift maximum overall area: Cabana and Crossweave is 6400 sq. in. (4.2 sq. m); There are no restrictions for other fabrics.

Options

Continuous-loop Lift

- **For surcharges, see Options Pricing**
- Will lift EvenPleat® and FashionPleat® shades up to 96" (243.9 cm) long (120" (304.8 cm) for 2" (5.1 cm) pleat) and is especially recommended for larger shades
- Shades over 5000 sq. in. (3.2 sq. m) use a larger clutch ratio for easier lifting, but additional pulls are required to raise the shade
- A single continuous-loop cord raises and lowers the shade and keeps the cord the same length
- Tensioner device will color coordinate with color of the loop
- The clutch mechanism in the color coordinated headrail assists in raising and lowering the shade; it stops shade at any point and holds the bottomrail level
- Safety locking cord guide included; cord guide must be installed for shade operation
- Available as Multiple Shades on One Headrail (standard gap ½" (1.3 cm))
- Side mounts available up to 60" (152.4 cm) wide by 96" (243.9 cm) high

NOTE: When ordered as multiple shades on one headrail there can be either one or two controls. A single control on the left or right can be used on shades up to 120" (304.8 cm) wide to operate all panels. With two controls the left control operates the left panel and the right control operates the right panel. For three panel shades specify middle panel as control right or control left. Continuous-loop controls cannot be located in the middle of a headrail.

Perfect-Vue™: Standard Cord Control

- **For pricing, see Price Charts**
- Perfect for combining light controls of sheer light filtering pleated fabric with room darkening, or blackout cellular fabrics
- Standard control is right control — operates bottomrail, while left control operates intermediate rail (can be reversed)
- 1" (2.6 cm) pleated can be combined with 3/8" (1.0 cm) Double Cell and Single Cell cellular fabrics only
- 2" (5.1 cm) pleated can be combined with 3/4" (1.9 cm) Single Cell cellular fabric only
- Midrail cord includes a cord release device
- Headrail coordinates with top fabric
- Bottomrail coordinates with bottom cellular fabric
- Midrail will match headrail as default, however, can specify to match bottomrail at time of order
- Not available with Cut-outs, overlap or liners
- EvenPleat shades offer a unique back ladder support, pleats will not sag or flatten out for the life of the shade
- Available as Multiple Shades on One Headrail (standard gap 1/2" (1.3 cm))
- Side mounts available:
 - Single shade width: 60" (152.4 cm)
 - Multiple shades on one headrail: 42" (106.7 cm)

*For all inside mount applications, 3/8" (1.0 cm) deduction is taken by manufacturer on overall width.

**Maximum single shade width is 72" (182.9 cm) or maximum fabric width, whichever is smaller.

†Single shade maximum with Cocoon Double Cell is 40" (101.6 cm), maximum height is 72" (182.9 cm).

Options

Perfect-Vue™: Cordless Lift

- **For pricing, see Price Charts**
- Perfect for combining light controls of sheer light filtering pleated fabric, with room darkening, or blackout cellular fabrics
- Cordless Lift shades are a safer alternative to shades with accessible cords that are traditionally used to operate window coverings; ideal for homes with children and pets
- 1" (2.6 cm) pleated can be combined with 3/8" (1.0 cm) Double Cell and Single Cell cellular fabrics only
- 2" (5.1 cm) pleated can be combined with 3/4" (1.9 cm) Single Cell cellular fabric only
- Not available with Cut-outs, overlap or liners
- EvenPleat® shades offer a unique back ladder support, pleats will not sag or flatten out for the life of the shade
- Headrail coordinates with pleated top fabric
- Bottomrail coordinates with bottom cellular fabric
- Midrail will match headrail as default, however, can specify to match bottomrail at time of order
- Not available with Multiple Shades on One Headrail
- All Cordless Lift shades need to be used on windows where consumers can comfortably raise and lower the shade with their hands and have easy access. Very high windows should use the Standard Cord Control option, rather than Cordless Lift. Operation of shade requires both sets of handles be used to properly raise and lower rails
- Sky poles not recommended, however, if required, two sky poles should be ordered to ensure even operation
- Side mounts available:
Single shade width: 60" (152.4 cm)

Shade Liner

- **See price charts for liner surcharge**
- Available on select styles with Standard Cord Control, Continuous-loop and Motorized Lift Systems
- Privacy Liner is available with Cordless Lift as a single panel only (no overlaps)
- Creates neutral to the street side appearance
- Create room darkening effects by adding a Blackout liner
- FashionPleat® Privacy and Blackout liner are not available as a shade alone
- Due to construction of shade, light will filter through the rout holes even with a blackout liner

Optional liners increase privacy and light control.

Privacy: Allows a small amount of light to enter the room for a greater sense of privacy. Inside objects appear as shadows.

Blackout Liner: Prevents light from entering for a high level of light control with maximum privacy, preventing even silhouettes from showing through. Due to construction of the shade, light will filter through the rout holes even with Blackout Liner.

NOTE: For shade widths greater than fabric width and heights up to 60" (152.4 cm), the liners will overlap at the same location as the fabric overlaps.

For shade widths greater than fabric width and heights over 60" (152.4 cm), the liners will overlap in the center of the shade. Maximum finished shade width limited to 142" (360.7 cm) for 1" (2.6 cm) fabrics and 140" (355.6 cm) for 2" (5.1 cm) fabrics.

Corner Windows

- **No charge**
- Made as individual shades
- Each shade will have its own control, we recommend opposite corners
- Indicate for each shade whether left or right and butt or bypass. The Bypass shade is mounted into the corner. The Butt shade is abutted to the other shade.
- Manufacturing will take appropriate deductions for proper fit. If you do not want manufacturing to take deductions, DO NOT order as a Corner shade.
- For Bottom Up/Top Down and Sun Up/Sun Down with Standard Cord Control the corner controls will be hard to reach
- **Cornices are not available on corner windows**

Measuring Information

Mounting on a Wall or Molding

Measure the width of each window from the corner on the mounting surface (molding or wall) to the point you would like to cover.

Mounting Above the Molding:

Measure the width of each window from the corner on the mounting surface to the point you would like to cover.

Projection measurement is the distance needed to clear any molding or obstructions that the shade will be mounted above.

NOTE: The **Projection (P)** distance is needed to correctly calculate deductions for installations where the shades will use shims or projection brackets to clear molding. All projection distances must match for correct deductions to be calculated.

Options

Bay Windows

- **No charge**
- Made as individual shades.
- Each section will have its own control.
- Manufacturer will take appropriate deductions for proper fit. Do not order as bay window shade if you do not want manufacturing to take deductions.
- For Bottom Up/Top Down and Sun Up/Sun Down with Standard Cord Control the corner controls will be hard to reach
- **Cornices are not available on bay windows**

Measuring Information: Three-sided Bay Window

Measure:

- L and R:** Width of each side window from the corners on the mounting surface to the point you would like to cover.
- C1:** Width of the center window on the mounting surface from corner to corner.

- Angle L-C1:** Angle between the (L) and (C1) windows.
Angle C1-R: Angle between the (C1) and (R) windows.
Projection: If needed: The depth of the trim or molding the shade will be mounted above.

Measuring Information: Four-sided Bay Window

- L and R:** Width of each side window from the corners on the mounting surface to the point you would like to cover.
- C1, C2:** Width of each center window on the mounting surface from corner to corner.

- Angle L-C1:** Angle between the (L) and (C1) windows.
Angle C1-C2: Angle between the (C1) and (C2) windows.
Angle C2-R: Angle between the (C2) and (R) windows.
Projection(P): If needed: The depth of the trim or molding the shade will be mounted above.

Note: The **Projection (P)** distance is needed to correctly calculate deductions for installations where the shades will use shims or projection brackets to clear trim or molding. All projection distances must match for correct deductions to be calculated. For additional windows on bays with up to five sides continue with number progression for center shade sizes (C1, C2, C3, ...) and angles (Angle C1-C2, Angle C2-C3, ...) as needed.

Measure each bay angle using a protractor or angle finder or use two business cards in each bay corner as illustrated above, **trace on paper**, and fax to customer service.

The angle to use between adjacent center bay windows along a straight section of wall is 180° (degrees).

Wood Characteristics

Wood used to manufacture Premier Wood-Wrapped Rails has many natural characteristics that make it truly unique; no two pieces of hardwood are alike. The following are all natural characteristics of wood, and we do not consider them to be defects:

- **Grain** – The direction, size, and appearance of wood fibers vary greatly depending on where the wood is cut within the tree
- **Tiger Striping** – Directional change in grain pattern
- **Burl** – Formed from an irregular growth on the outer edge of the tree
- **Bird's Eye** – Small area on the surface of the board where fibers are contorted to form circular figures that resemble birds' eyes
- **Mineral Marks** – Dark or discolored areas caused by minerals which the tree extracts from the soil; they can be either streaks or stains, usually blackish blue

Natural variations in color and grain effect are inherent in the beauty of wood. These variations are within established industry guidelines and should be expected. In addition, shutters may stain slightly darker or lighter than the samples shown.

Making A Template For Specialty Windows

1. Tape butcher paper or heavy brown wrapping paper over the window opening allowing plenty of overlap.
2. Being careful not to press against the template paper while tracing, draw an exact outline of the window opening. Pressing on the template paper may distort the paper and cause the wrong size to be made.
3. Remove the paper from the window opening. If the shade is an outside mount, add the desired amount of overlap to the window outline. Draw a second outline around it to match the shape of the finished shade. **Be sure to erase the inside line.**
4. Mark the dimensions on the template. Check that the template dimensions match your measurements of the actual window opening.

NOTE: Make sure the template is of the window opening, not the measurement of the glass only.

5. Cut the shape from the paper.
6. **PLACE THE TEMPLATE BACK INTO THE WINDOW OPENING TO CHECK FOR PROPER FIT.**
7. **Indicate on the template:**
 - "Room side" and "top"
 - Purchase order number
 - Customer's name
 - Your store name and account number
8. Attach a copy of your purchase order to the template.
9. Roll up template and place in a mailing tube.
DO NOT FOLD TEMPLATE.

Mail to: SPRINGS WINDOW FASHIONS LLC

NOTE: When mailing, make sure to get a tracking number and note your return address on the mailing tube.

ACCEPTABLE MATERIALS FOR MAKING TEMPLATES:

Kraft Paper
Butcher Paper
Construction Paper

WE WILL NOT ACCEPT TEMPLATES MADE FROM THE FOLLOWING MATERIALS:

Newspaper	Plastic
Wax Paper	Fabric
Tissue Paper	Roofing Paper
Existing Arch Shades	Wrapping Paper
Cardboard	Poster Board

NOTE: If the material used to make a template stretches, tears easily, will not lay flat, or will mark the fabric, IT WILL NOT BE USED.

Using A Template Service

For surcharge, see Options Pricing

To use the template service, simply:

1. Select Template Service when entering your order online.
2. Use the template worksheet to determine what measurements you need to supply for each shape.
3. Enter the lettered measurements using line item comments. The comments have been pre-programmed to all of the measurements you need to enter for your special shape.

NOTE: Sizes are approximate.

All stack calculations are with Standard Cord Controls, for Cordless Lift Controls add $\frac{7}{8}$ " (2.3 cm).

Stack height includes all rails and both pleated and cellular fabrics together, but is based on the cellular fabric chosen.

Thickest pleated fabric was used for calculation.

Cordless Lift Product Detail

NOTE: Available with 1" (2.6 cm) or 2" (5.1 cm) Pleated; Shown as 1" (2.6 cm) Pleated.

NOTE: Not available with the following fabrics: Brighton, Brighton FR, Geneva and Blackout liner.

EvenPleat® Loop Tape
(rear view of shade)

Ensures uniform pleat spacing from the top of the shade to the bottom, guaranteed for life;
Color coordinated to the back of the fabric.

NOTE: All Cordless Lift shades need to be used on windows where consumers can comfortably raise and lower the shade with their hands and have easy access. Suggest adding a sky pole for hard-to-reach applications, up to 36" (91.5 cm) wide. Sky poles are not recommended over 36" (91.5 cm), however, if required, two sky poles should be ordered to ensure even operation. **See options for details.**

How To Order And Price Perfect-Vue™ Shades

1. Select the corresponding Price Group for the top of the shade (Pleated Fabric).
2. Select the corresponding Price Group for the bottom of the shade (Cellular Fabric).
3. Find your width and height.
4. Add together cost of the top and the bottom shades for the total cost of Standard Cord Control Perfect-Vue shade.
5. The Cordless Lift option has a surcharge based on the width of the shade:

WIDTH UP TO in. (cm) →	24 (61.0)	30 (76.2)	36 (91.5)	42 (106.7)	48 (122.0)	54 (137.2)	60 (152.4)	66 (167.7)	72 (182.9)	84 (213.4)
