Light Control and Privacy Levels

Sheer: Allows the most sunlight and least privacy

Light Filtering: Blocks some sunlight and offers some privacy

Privacy Liner: Offers increased light control and privacy. At night, objects in your home will appear as silhouettes from the outside.

Blackout Liner: Blocks light and offers complete privacy. At night, objects in your home will not be seen from the outside.

Fabric Disclaimers

Due to the nature of fabric, some fraying on shade edges is normal. If threads come loose near the edges, use sharp scissors to trim off stray threads. To avoid fraying, ensure that your shade is not coming into contact with any surface. Fabric appearance can vary based on changing light conditions in the room. Pleat alignment among multiple shades may not be exact.

Oeko-Tex® Standard 100 Certified Fabrics

Fabric styles Aberdeen, Canyon Ridge, Cloud Metal, Debonair, Desert, Grasscloth, Inkblot, Marina, Prescott, Sahara Ridge, Spring Bloom, and Terrain are Oeko-Tex Standard 100 Certified and are free of PVC, halogen, lead, formaldehyde, allergenic dyes, pesticides, phenols, heavy metals, and meet all VOC content limits.

Oeko-Tex is a registered trademark of the Oeko-Tex Association.

Depth Requirements for Inside Mount Continuous Loop Lift

Shade Type	Headrail Dimensions (inches)	 Minimum Depth Mount (inches)	 Flush with Casing (inches)
1" Pleat	1⅞ x 2⅞	⅝	2⅞
2" Pleat	1⅞ x 2⅞	⅝	2⅞

Control Type and Size Considerations

Continuous Loop Lift

- For surcharges, see price charts
- Recommended for larger, heavier shades
- Larger shades use a larger clutch ratio for easier lifting, but additional pulls are required to raise the shade
- A single continuous loop cord raises and lowers the shade and keeps the cord the same length
- Safety locking cord tensioner included; cord tensioner must be installed for shade operation
- For inside mount, install the shade in the back of the window frame so the cord tensioner can be mounted in front of the shade and not interfere with shade operation. Additional mounting depth may be required.

NOTE: When ordered as multiple shades on one headrail, there can be either one or two controls. A single control on the left or right can be used on shades up to 120" wide to operate all panels. With two controls, the left control operates the left panel and the right control operates the right panel. For three panel shades, specify middle panel as control right or control left. Continuous loop controls cannot be located in the middle of a headrail.

Options

Shade Liner

- For surcharge, see price charts
- Privacy or blackout liners are available on select styles with continuous loop and motorized lift systems
- Privacy liner is available with cordless lift as a single panel only (no overlap)
- Creates neutral to the street side appearance
- Create room-darkening effects by adding a blackout liner
- FashionPleat® privacy and blackout liner are not available as a shade alone
- Due to construction of shade, light will filter through the route holes even with a blackout liner

Optional liners increase privacy and light control.

Privacy Liner: Allows a small amount of light to enter the room for a greater sense of privacy. Inside objects appear as shadows.

Blackout Liner: Prevents light from entering for a high level of light control with maximum privacy, preventing even silhouettes from showing through. Due to construction of the shade, light will filter through the route holes even with blackout liner.

NOTE: For shade widths greater than fabric width and heights up to 60", the liners will overlap at the same location as the fabric overlap. For shade widths greater than fabric width and heights over 60", the liners will overlap in the center of the shade. Maximum finished shade width limited to 142" for 1" fabrics and 140" for 2" fabrics.

EvenPleat Loop Tape

- Ensures uniform pleat spacing from the top of the shade to the bottom, guaranteed for life
- Optional upgrade for select 1" pleated fabrics
- Comes standard on select 1" pleated fabrics and all 2" pleated fabrics

Multiple Shades on One Headrail

Gap

- Surcharge for two or three shades on one headrail less than or equal to fabric width (see price charts)
- Shade widths exceeding fabric width made as two or three shades on one headrail—no charge
- Side mounts available
 - Single shade width: 60"
 - Multiple shades on one headrail: 42"
- Not available with bottom up/top down, sun up/sun down, or Perfect-View shades

Options

Corner Windows

- **No charge**
- Made as individual shades
- Each shade will have its own control; we recommend opposite corners
- Indicate for each shade whether left or right and butt or bypass
- Bypass shade is mounted into the corner; butt shade is abutted to the other shade
- Manufacturer will take appropriate deductions for proper fit; DO NOT order as a corner shade if you do not want manufacturer to take deductions

Measuring Information

Mounting on a Wall or Molding:

Measure the width of each window from the corner on the mounting surface (molding or wall) to the point you would like to cover.

Mounting Above the Molding:

Measure the width of each window from the corner on the mounting surface to the point you would like to cover.
Projection measurement is the distance needed to clear any molding or obstructions that the shade will be mounted above.

NOTE: The projection (P) distance is needed to correctly calculate deductions for installations where the shades will use shims or projection brackets to clear molding. All projection distances must match for correct deductions to be calculated.

Options

Bay Windows

- **No charge**
- Made as individual shades
- Each section will have its own control
- Manufacturer will take appropriate deductions for proper fit;
DO NOT order as bay window shade if you do not want manufacturing to take deductions

Measuring Information: Three-Sided Bay Window

Measure:

- L and R:** Width of each side window from the corners on the mounting surface to the point you would like to cover.
- C1:** Width of the center window on the mounting surface from corner to corner.

- Angle L-C1:** Angle between the (L) and (C1) windows.
- Angle C1-R:** Angle between the (C1) and (R) windows.
- Projection:** If needed: The depth of the trim or molding the shade will be mounted above.

Measuring Information: Four-Sided Bay Window

- L and R:** Width of each side window from the corners on the mounting surface to the point you would like to cover.
- C1, C2:** Width of each center window on the mounting surface from corner to corner.
- Angle L-C1:** Angle between the (L) and (C1) windows.
- Angle C1-C2:** Angle between the (C1) and (C2) windows.
- Angle C2-R:** Angle between the (C2) and (R) windows.
- Projection (P):** If needed: The depth of the trim or molding the shade will be mounted above.

NOTE: The projection (P) distance is needed to correctly calculate deductions for installations where the shades will use shims or projection brackets to clear trim or molding. All projection distances must match for correct deductions to be calculated.

For additional windows on bays with up to five sides continue with number progression for center shade sizes (C1, C2, C3, ...) and angles (Angle C1-C2, Angle C2-C3, ...) as needed.

*Measure each bay angle using a protractor or angle finder or use two business cards in each bay corner as illustrated above, **trace on paper**, and fax or email to customer service.

The angle to use between adjacent center bay windows along a straight section of wall is 180° (degrees).

- **For surcharges, see price charts**
- Perfect arches are those where the radius of the circle is constant at all points; height is exactly half the width
- Perfect quarter circle is where height and width are equal
- For inside mount, measure inside of window frame; for outside mount, add the desired amount of overlap to your measurements
- Include width and height measurements on all orders
- Side mount available up to 60" wide exact
- Liner available if fabric allows

Non-Perfect Arches (require a template)

- **For surcharges, see price charts**
- Non-perfect arches are those where the radius of the circle is NOT constant at all points; height is not exactly half the width
- Include width and height measurements on all orders
- For inside mount, measure inside of window frame; for outside mount, add the desired amount of overlap to your measurements
- See template instructions
- Side mount available up to 60" wide exact
- Liner available if fabric allows

NOTE: Arches can be made in EvenPleat® fabrics, however they will not have the back loop tape.

Making a Template for Specialty Windows

1. Tape butcher paper or heavy brown wrapping paper over the window opening allowing plenty of overlap.
2. Being careful not to press against the template paper while tracing, draw an exact outline of the window opening. Pressing on the template paper may distort the paper and cause the wrong size to be made.
3. Remove the paper from the window opening. If the shade is an outside mount, add the desired amount of overlap to the window outline. Draw a second outline around it to match the shape of the finished shade. **Be sure to erase the inside line.**
4. Mark the dimensions on the template. Check that the template dimensions match your measurements of the actual window opening.
NOTE: Make sure the template is of the window opening, not the measurement of the glass only.
5. Cut the shape from the paper.
6. **PLACE THE TEMPLATE BACK INTO THE WINDOW OPENING TO CHECK FOR PROPER FIT.**
7. Indicate on the template:
 - Room side and top
 - Purchase order number
 - Customer's name
 - Your store name and account number
8. Attach a copy of your purchase order to the template.
9. Roll up template and place in a mailing tube.
DO NOT FOLD TEMPLATE.

Mail to: SPRINGS WINDOW FASHIONS, LLC

ACCEPTABLE MATERIALS FOR MAKING TEMPLATES

Kraft paper
Butcher paper
Construction paper

WE WILL NOT ACCEPT TEMPLATES MADE FROM THE FOLLOWING MATERIALS

Newspaper	Plastic
Wax paper	Fabric
Tissue paper	Roofing paper
Existing arch shades	Wrapping paper
Cardboard	Poster board

NOTE: If the material used to make a template stretches, tears easily, will not lay flat, or will mark the fabric, IT WILL NOT BE USED.
If template is not precut from paper, IT WILL NOT BE USED.

Using Template Service

For surcharge, see price charts

Template service is used when a customer is unable to make or supply a template.

To use the template service, simply:

1. Select template service when entering your order online.
2. Use the Specialty Shapes Reference Guide to determine what measurements you need to supply for each shape.
3. Enter the lettered measurements using line item comments. The comments have been pre-programmed to all of the measurements you need to enter for your special shape.

For additional information, contact customer service.
