

The image shows a close-up of a window with light-colored Roman shades. The shades are partially open, revealing a view of green foliage outside. The window is framed by thick, textured, reddish-brown curtains. At the top center, there is a dark grey rectangular box containing the Graber logo and tagline.

## PLEASE NOTE:

Photos and illustrations are for inspiration only.  
 Not all product configurations are available in all countries.  
 Window blind cords are a strangulation hazard for young children.  
 Consult your dealer or store associate for cordless products, or products  
 with inaccessible cords. Remove this product immediately if a cord longer  
 than 22 cm, or a loop exceeding 44 cm, becomes accessible.

## Features

### Summary

Graber® Classic Roman Shades offer the softness of drapery with the practicality of a shade, featuring a variety of fabric styles, colors, textures, and light control options. Select either the classic flat or the looped style—whichever shade best suits your decorating style.

- Finished edges guarantee fabric will not fray
- Fabric valance, **free of charge** at the time of order, creates a finished look
- Clear sill rail protects the bottom of the shade from dirt and wear
- Oeko-Tex® certified fabrics
- Components are color coordinated to fabric

| Features                                                                        | Benefits                                                                                                                                                                                        |

### Light Control and Privacy

**Sheer:** Semi-transparent fabric that allows light to filter through. Images and shapes can be seen through these shades.

**Light Filtering:** Allows light to gently filter through and provides privacy. Images and shapes may be seen through these shades, but details are not visible. Deep fabric color provides moderate light control; light fabric color provides lower light control.

**Room Darkening:** Allows some light to filter into the room and provides privacy. Objects in a lit room seen through these shades appear as vague shapes. Deep fabric color darkens a room; light fabric color filters and diffuses bright sunlight.

### Fabric Disclaimers

To ensure color consistency and avoid dye lot variation, please order all shades for the same room at the same time.

Fabrics cannot be seamed or overlapped.

Colors may appear to vary depending on the time of day and lighting type as well as when the shade is partially or fully lowered.

## Size Considerations

### Cord Lift

\*For all inside mount applications,  $\frac{3}{8}$ " deduction is taken by manufacturer on overall width.

### Depth Requirements for Inside Mount

|        | Continuous-Loop Lift Headrail Dimensions (inches) | <br>Minimum Headrail Depth Mount (inches) | <br>Headrail Flush with Casing (inches) |
|--------|---------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------|
| Flat   | $1\frac{9}{16} \times 2\frac{1}{8}$               | $\frac{5}{8}$                                                                                                                | $2\frac{3}{8}$                                                                                                               |
| Looped | $1\frac{9}{16} \times 2\frac{1}{8}$               | $\frac{5}{8}$ (fabric loops will overhang approximately 3" into room)                                                        | $2\frac{3}{8}$ (fabric loops will overhang approximately 3" into room)                                                       |

# Options

## Shade Options (for surcharges and pricing refer to price charts)

The following is a list of options for Fresco® Roman shades. All options are available in all styles and colors. Limitations will be based on fabric width. See detailed descriptions on the following pages.

**Control Type Options:** see price charts for applicable cost and/or surcharges

- Cord lift
- Continuous-loop lift
- Cordless lift
- Motorized lift: see motorization product information guide

**Shade Options—No Charge**

- Bay and corner window shades
- Clear cord cleats (standard)
- Fabric valance (at time of order)
- Hold down brackets
- Projection brackets:
  - Long (adds up to 2½" extension from wall)
  - Medium (adds up to 1⅝" extension from wall)
  - Short (adds up to 1" extension from wall)
- Shims: ⅜"
- Side-mount brackets (inside mount only)

**Shade Style Choices:** see price charts for applicable cost

- 6" flat style shade
- 4⅝" looped pleat style shade

**Shade Options—Surcharge**

- Bottom up/top down cord lift
- Cord winder
- Decorative cord cleats
- Multiple shades on one headrail
- Valance gimp, fringe, bead trim
- Wood cornices: see wood cornice and valance product information guide

## Options

### Cord Lift

- **No charge**
- Cord control can be on the left- or right-hand side
- Cord length is approximately one third of the shade length; customer can request specific length at time of order
- Cord is color coordinated to shade fabric
- Available on both flat and looped styles

### Cordless Lift

Horizontal Wand

Vertical Wand

- **For surcharges, see price charts**
- Provides safety with no external cords on front of shade
- Ideal for homes with children or pets
- Provides clean aesthetics
- Available on both flat and looped styles
- Vertical wand is used with bottom panels greater than 2 $\frac{3}{4}$ "
- Horizontal wand is used with bottom panels less than 2 $\frac{3}{4}$ "
- Shades wider than 48" have two wands for shade operation

**NOTE:** All cordless lift shades need to be used on windows where consumers can comfortably raise and lower them.

## Options

### Continuous-Loop Lift

- **For surcharge, see price charts**
- A single, white continuous-loop lift cord raises and lowers the shade; the cord is always the same length
- The clutch mechanism in the color coordinated aluminum headrail assists in raising and lowering the shade; it stops the shade at any point and holds the bottomrail level
- Continuous-loop lift stacks the fully raised shade more compactly than a standard cord and holds it more securely
- Continuous-loop lift comes with a locking cord loop guide; for shade operation, this tensioner must be installed
- Available on both flat and looped styles
- Not available on bottom up/top down
- Control length for continuous-loop lift shades varies based on the finished shade height (see below); optional cord loop length (sizes listed in chart) available upon request

| Finished Shade Height<br>(inches) | Cord Loop Length<br>(inches) |
|-----------------------------------|------------------------------|
| 12 to 26                          | 18                           |
| 26 $\frac{1}{8}$ to 38            | 24                           |
| 38 $\frac{1}{8}$ to 50            | 36                           |
| 50 $\frac{1}{8}$ to 62            | 48                           |
| 62 $\frac{1}{8}$ to 74            | 60                           |
| 74 $\frac{1}{8}$ to 96            | 72                           |

Optional cord lengths: 84", 96", and 108".

## Options

### Motorized Lift

- **Refer to motorization product information guide for additional options, sizing, and pricing**
- Window treatments can be operated from virtually anywhere in the home
- Provides easy operation of hard-to-reach or large window coverings
- Efficiently manages energy (heat gain and loss)
- Operates multiple window treatments simultaneously or individually
- A safer alternative to accessible cords that are traditionally used to operate window coverings; ideal for homes with children and pets
- Easily integrated with home automation systems
- Low voltage motorization requires no costly electrical hardwiring
- Multiple control and power options available

**NOTE:** Motorization components and accessories have a five-year limited warranty, excluding batteries.

## Options

### Bottom Up/Top Down: Cord Lift

- **For surcharge, see price charts**
- Cord lift with cordlocks
- Allows shade to be raised from the bottom up like a conventional shade or from the top down
- Perfect for screening out unwanted views or maintaining privacy while enjoying natural sunlight
- Popular specialty application used in bedrooms and bathrooms
- Available in both flat and looped styles
- **Not available with multiple shades on one headrail**
- **Not available with continuous-loop lift, cordless lift, or motorized lift**

### Fabric Valance Only

- **For surcharge, see price charts**
- Coordinating fabric valance creates an uninterrupted look and conceals the headrail
- Edges are finished and attached to the headrail with hook and loop tape
- Available on both flat and looped styles
- Fabric valances are free of charge at the time of order; replacement valances available
- Fabric valance returns are not available
- Continuous valance is only available up to fabric width
- Bead trims available; see bead trim page in shade options

**NOTE:** If used on multiple shades on one headrail, or the valance is greater than the fabric width, the valance will have the same breaks as the panels.

## Options

### Multiple Shades on One Headrail

1/4" Spacing

- **For surcharge, see price charts**
- Available as two-on-one headrail with cord lift, continuous-loop lift and cordless lift controls
- Available as three-on-one headrail with cordless lift or continuous-loop lift controls
- Available in flat and looped styles
- Standard valances on multiple shades will have the same breaks as the panels
- Continuous valance covering multiple shades is not available

|                                     | Maximum Overall Size for Multiple Shades* (inches) | Maximum Width with Side Mount (inches) | Control Locations                                                                                                                                                                                                                                                       | Gap (inches) |

## Options

### Corner Windows

Shades on Corner Windows

- **No charge**
- Made as individual shades
- Each shade will have its own control; we recommend opposite corners
- Indicate left or right for each shade
- Manufacturer will take appropriate deductions for proper fit; DO NOT order as a corner shade if you do not want manufacturer to take deductions
- **Cornices or decorative wood valances are not available on corner windows**
- For bottom up/top down cord lift, the corner controls will be hard to reach
- Flat style is recommended for corner windows
- Looped style will have light gaps due to fabric loops

#### Measuring Information

##### Mounting on a Wall or Molding:

Measure the width of each window from the corner on the mounting surface (molding or wall) to the point you would like to cover.

##### Mounting Above the Molding:

Measure the width of each window from the corner on the mounting surface to the point you would like to cover.

Projection measurement is the distance needed to clear any molding or obstructions that the shade will be mounted above.

**NOTE:** The projection (P) distance is needed to correctly calculate deductions for installations where the shades will use shims or projection brackets to clear molding. All projection distances must match for correct deductions to be calculated.

# Options

## Bay Windows

- **No charge**
- Made as individual shades
- Each section will have its own control
- Manufacturer will take appropriate deductions for proper fit; DO NOT order as a corner shade if you do not want manufacturer to take deductions
- **Cornices or decorative wood valances are not available on corner windows**
- For bottom up/top down cord lift, depending on the angle, controls may be hard to reach
- Flat style is recommended for bay windows
- Looped style will have light gaps due to fabric loops

### Measuring Information: Three-Sided Bay Window

#### Measure:

- L and R:** Width of each side window from the corners on the mounting surface to the point you would like to cover.
- C1:** Width of the center window on the mounting surface from corner to corner.

- Angle L-C1:** Angle between the (L) and (C1) windows.
- Angle C1-R:** Angle between the (C1) and (R) windows.
- Projection:** If needed: The depth of the trim or molding the shade will be mounted above.

### Measuring Information: Four-Sided Bay Window

#### Measure:

- L and R:** Width of each side window from the corners on the mounting surface to the point you would like to cover.
- C1, C2:** Width of each center window on the mounting surface from corner to corner.

- Angle L-C1:** Angle between the (L) and (C1) windows.
- Angle C1-C2:** Angle between the (C1) and (C2) windows.
- Angle C2-R:** Angle between the (C2) and (R) windows.
- Projection:** If needed: The depth of the trim or molding the shade will be mounted above.

**NOTE:** The projection (P) distance is needed to correctly calculate deductions for installations where the shades will use shims or projection brackets to clear trim or molding. All projection distances must match for correct deductions to be calculated.

For additional windows on bays with up to five sides, continue with number progression for center shade sizes (C1, C2, C3, ...) and angles (angle C1-C2, angle C2-C3, ...), as needed.

Measure each bay angle using a protractor or angle finder, or use two business cards in each bay corner as illustrated above and fax to customer service 1-800-552-4559.

**The angle to use between adjacent center bay windows along a straight section of wall is 180 degrees.**

## General Information

### Shade Stack Height Chart

#### Looped

| Finish Shade Height (inches) | Stack Height (inches) |
|------------------------------|-----------------------|
| Up to 29                     | 9                     |
| 29 to 41                     | 10                    |
| 41 to 58                     | 11                    |
| 58 to 75                     | 12                    |
| 75 to 96                     | 13                    |

#### Flat

| Finish Shade Height (inches) | Stack Height (inches) |
|------------------------------|-----------------------|
| Up to 32                     | 10                    |
| 32 to 56                     | 11                    |
| 56 to 80                     | 12                    |
| 80 to 96                     | 13                    |

**NOTE:** Stack height includes headrail and sill rail.

This chart is an approximation of the largest stack possible for all control types at each height range.

### Bottom Panel Heights

The standard panel height is 6" for flat and 4<sup>5</sup>/<sub>16</sub>" for looped style. Bottom panel is used as the adjustment panel to get to finished shade height. The bottom panel height varies depending on shade height. A small change in finished shade height can create significantly different looks.

#### For Example:

| Finished Shade Height* (inches) | Flat                  |                                          | Looped                |                                          |
|---------------------------------|-----------------------|------------------------------------------|-----------------------|------------------------------------------|
|                                 | Number of Full Panels | Approximate Bottom Panel Height (inches) | Number of Full Panels | Approximate Bottom Panel Height (inches) |
| 60                              | 9                     | 5 <sup>5</sup> / <sub>16</sub>           | 13                    | 3 <sup>5</sup> / <sub>16</sub>           |
| 61                              | 10                    | 3 <sup>5</sup> / <sub>16</sub>           | 14                    | 0                                        |
| 61                              | 10                    | 3 <sup>5</sup> / <sub>16</sub>           | 14                    | 0                                        |
| 62                              | 10                    | 1 <sup>5</sup> / <sub>16</sub>           | 14                    | 1                                        |

\*Approximate.

#### IMPORTANT ORDERING NOTE:

For shades hanging in the same room at the same height or for groups of shades, please add the words "hanging side-by-side" to the order comments. This is important for the manufacturing process and for panel adjustments.

It is very important to consider this possible variation when ordering more than one shade for a room. For approximate panel counts, see the following pages.

## General Information

### Panel Count Chart: Cord Lift

The purpose of this information is to help the consumer visualize what their shade will look like by approximating the number of full panels and the bottom panel length. Full panel lengths are 6" for flat and 4 $\frac{5}{16}$ " for looped; however, the bottom panel is used as the adjustment panel to get to finished shade height. **Therefore, the bottom panel length varies depending on shade height.** A small change in finished shade height can create significantly different looks.

**This chart should be used to compare the effect of various lengths. The information can vary depending on the pleat length tolerance.**

| Finished Shade Height* (inches) | Flat                  |                                          | Looped                |                                          |
|---------------------------------|-----------------------|------------------------------------------|-----------------------|------------------------------------------|
|                                 | Number of Full Panels | Approximate Bottom Panel Height (inches) | Number of Full Panels | Approximate Bottom Panel Height (inches) |
| 18                              | 2                     | 5 $\frac{3}{8}$                          | 4                     | 1 $\frac{1}{8}$                          |
| 19                              | 3                     | $\frac{3}{4}$                            | 4                     | 1 $\frac{1}{8}$                          |
| 20                              | 3                     | 1 $\frac{1}{8}$                          | 4                     | 2 $\frac{1}{8}$                          |
| 21                              | 3                     | 2 $\frac{3}{8}$                          | 4                     | 3 $\frac{1}{8}$                          |
| 22                              | 3                     | 3 $\frac{3}{8}$                          | 4                     | 4 $\frac{1}{8}$                          |
| 23                              | 3                     | 4 $\frac{3}{8}$                          | 5                     | $\frac{7}{8}$                            |
| 24                              | 3                     | 5 $\frac{3}{8}$                          | 5                     | 1 $\frac{1}{8}$                          |
| 25                              | 4                     | $\frac{3}{4}$                            | 5                     | 2 $\frac{1}{8}$                          |

\*Finished shade height equals ordered height; there are no factory deductions for height.

**EXAMPLE:** A flat shade with a 48" finished shade height will have seven full panels and the eighth panel will be approximately 5 $\frac{3}{8}$ " long.

## General Information

### Panel Count Chart: Cordless Lift, Continuous-Loop Lift, and Motorized Lift

The purpose of this information is to help the consumer visualize what their shade will look like by approximating the number of full panels and the bottom panel length. Full panel lengths are 6" for flat and 4 $\frac{5}{16}$ " for looped; however, the bottom panel is used as the adjustment panel to get to finished shade height. **Therefore, the bottom panel length varies depending on shade height.** A small change in finished shade height can create significantly different looks.

**This chart should be used to compare the effect of various lengths. The information can vary depending on the pleat length tolerance.**

| Finished Shade Height* (inches) | Flat                  |                                          | Looped                |                                          |
|---------------------------------|-----------------------|------------------------------------------|-----------------------|------------------------------------------|
|                                 | Number of Full Panels | Approximate Bottom Panel Height (inches) | Number of Full Panels | Approximate Bottom Panel Height (inches) |
| 18                              | 2                     | 4 $\frac{1}{2}$                          | 3                     | 3 $\frac{3}{8}$                          |

| 96                              | 15                    | 4 $\frac{1}{2}$                          | 21                    | 4                                        |

\*Finished shade height equals ordered height; there are no factory deductions for height.

**EXAMPLE:** A flat shade with a 48" finished shade height will have seven full panels and the eighth panel will be approximately 5 $\frac{3}{8}$ " long.

## General Information

### Panel Count Chart: Bottom Up/Top Down Cord Lift

The purpose of this information is to help the consumer visualize what their shade will look like by approximating the number of full panels and the bottom panel length. Full panel lengths are 6" for flat and 4 $\frac{5}{16}$ " for looped; however, the bottom panel is used as the adjustment panel to get to finished shade height. **Therefore, the bottom panel length varies depending on shade height.** A small change in finished shade height can create significantly different looks.

**This chart should be used to compare the effect of various lengths. The information can vary depending on the pleat length tolerance.**

| Finished Shade Height* (inches) | Flat                  |                                          | Looped                |                                          |
|---------------------------------|-----------------------|------------------------------------------|-----------------------|------------------------------------------|
|                                 | Number of Full Panels | Approximate Bottom Panel Height (inches) | Number of Full Panels | Approximate Bottom Panel Height (inches) |

\*Finished shade height equals ordered height; there are no factory deductions for height.

**EXAMPLE:** A flat shade with a 48" finished shade height will have seven full panels and the eighth panel will be approximately 5" long.

# General Information

## Flat Style Product Detail

### Installation Brackets

- Zinc-plated spring steel for easy installation
- Hidden snap-in design
- Facilitate easy installation and removal of shade

### Aluminum Headrail

- Color coordinated to shade fabric
- 1 1/16" profile, 1 7/16" depth
- Extremely durable and rustproof

### Fabric Valance (shown in illustration)

- Free of charge; must be requested at time of order
- Matches shade fabric for uninterrupted look
- Attaches to the headrail with hook and loop fastener
- Valance height is 5 1/4"
- Valance returns not available

### Flat 6" Tabbed Fabric

- Pleats provide an elegant look
- Variety of patterns and color choices
- Finished edges guaranteed not to fray

### Projection Brackets

- Long (adds 2 1/2" extension from wall)
- Medium (adds 1 3/4" extension from wall)
- Short (adds 1" extension from wall)

### Side Mount Brackets (optional)

- Maximum width 60"

### Flush Mount End Caps

- Color coordinated to shade fabric
- Sleek look, tighter fit

### Cordlock (not visible)

- Sleek, streamlined design
- Color coordinated to shade fabric
- Free-floating serrated cord-locking roller for dependable operation

### Lift Cord

- Color coordinated to shade fabric
- 1.2 mm braided polyester with a core for durability

### Joiner Ball and End Ball

- Color coordinated to shade fabric

### Sill Rail

- Wrapped in fabric and covered by clear channel for tailored look and maximum durability

### Hold Down Brackets (optional)

- Secure shade to door, wall, or window sill

This panel will vary in height depending on shade height.

### Cord Management Options

### Back View with Safety Loop Cord

### Safety Loop Cord

- Prevents cord from being easily pulled away from the shade and forming a loop

**NOTE:** Shown with standard cord.
