*Coordinates with Graber® Roller Shades

†If ordering for use as a room divider: materials indicated as neutral or white under the color to street side column will be colored on one side and neutral or white on the other side.

Light Control and Privacy

Sheer: Allows the most amount of light into the room for a minimum amount of privacy and a view to the outside. Objects in the room can be seen quite clearly through shades.

Light Filtering: Allows light to gently filter through and provides privacy. Images and shapes may be seen through these shades, but details are not visible. Deep fabric colors provide moderate light control, while light colors provide lower light control.

Room Darkening: Light is substantially blocked; vague shadows of objects or people may be visible; maximum room darkening is achieved with darker colors.

REMINDER: For inside mount there will be a light gap (3/8" for wand control) and a secondary treatment (curtains or draperies) is recommended to achieve complete privacy. Otherwise, an outside mount with overlap is recommended.

Pattern Alignment

Due to the pattern design of roller and solar fabrics and natural shade materials, exact alignment of the pattern across panels is not possible.

To ensure consistency of color and fabric and to avoid fabric lot variations, it is important to order all shades for one room at the same time.

Oeko-Tex Standard 100 Certified Fabrics

Oeko-Tex Standard 100 certifies that our fabrics are free of PVC, halogen, lead, formaldehyde, allergenic dyes, pesticides, phenols, heavy metals, and meets all VOC content limits.

Oeko-Tex is a registered trademark of the Oeko-Tex Association.

GREENGUARD Indoor Air Quality Certified Fabrics

Many Graber fabrics have been certified by GREENGUARD Environmental Institute (GEI) to be low chemical and particle emitting fabrics providing a healthier indoor air quality. The process used for certification complies with established indoor air quality standards and is performed by a third party lab. Please see www.graberblinds.com for more information.

Features

Nature's Beauty of Natural Shades

There is simply no substitute for the beauty of the materials used in natural shades. The colors and textures of bamboo, reeds, grasses, and jute have a distinct character and one-of-a-kind look that synthetic materials can't match.

Unique Characteristics of Natural Shades

Asymmetry

Materials used in natural shades are naturally grown and harvested. Variations in shape, thickness, texture, and grain are to be expected from Mother Nature. While adding personality, these variations create asymmetry in the weave that may alter the appearance of the finished shades. Specifically, you may notice:

- **Uneven Spacing or Gaps**—Differences in bamboo or reed shapes and thicknesses can create uneven spacing or gaps in the weave
- **Pattern Changes or Gaps**—The varying thickness of grassy materials, tied knots, and splices can create visual disruptions in the weave pattern or gaps in the weave
- **Length Differences**—Variations in thickness, bamboo joints, or reed sizes can create length differences from both sides of the shades
- **Bowing or Arching**—Different drying rates of bamboo fibers can create a bowing or arching effect on the finished shades

To minimize variations, all materials used are hand selected to comply with strict specifications. These variations are not considered flaws, but rather normal characteristics expected from naturally grown materials.

Color

Evolving with age, the color of bamboo, reeds, grasses, jute, and other natural materials will change slightly. Depending on material composition, they may lighten or darken due to direct sunlight or other climatic conditions. Uncolored or natural materials will experience the most color shift, changing from a green color at harvest to a yellow-brown color over three to six months. Color matching of shades cannot be guaranteed as these are natural reactions to aging.

With character, however, comes inherent natural properties that may influence the appearance of the finished shade. Recognizing and understanding the characteristic traits of natural materials provides more satisfaction and enjoyment once you know why each shade is truly unique!

Stretching/Sagging

The natural elasticity of yarns, combined with the weight of the woven material, may cause shades to stretch or sag from 1" to 1½", and sliding panels to stretch or sag from 1" to 2" after installation. This is particularly noticeable on inside mount shades or shades that extend from ceiling to floor. Ordering shades shorter than needed will help compensate for stretching over time.

Tips

During the shipping process, the natural material may have shifted slightly due to its woven construction, causing slight shortening or uneven edges.

Height—If after installation, the shades are slightly shorter than ordered, grasp the bottom of the shades and gently pull to stretch to the preferred height. Some materials will also stretch by themselves over time.

Uneven Edges—Lightly tap edge of the shades with a flat edge (for example, a ruler) until even.

Frayed Edges—If threads come loose near the edges, use a sharp scissors to trim off stray threads.

Light Control and Privacy

Sheer—Allows the most amount of light into the room for a minimum amount of privacy and a view to the outside. Objects in the room can be seen quite clearly through shades.

Light Filtering—Allows light to gently filter through and provides privacy. Images and shapes may be seen through these shades.

Natural shades may have variations and visual inconsistencies in color, weave, grain, and texture. They may also crack or split, twist or bow, shrink or stretch, and change color over time due to aging, direct sunlight, or other climatic conditions. These unique characteristics are inherent in natural materials and are not considered defects in material or workmanship. Exact color matches cannot be guaranteed.

[§]Coordinates with Graber® Natural Shades

*Light control without liner. Addition of privacy or room-darkening liner improves light control. If ordering liner on a room divider, liner will be visible on one side.

NOTE: All fabrics have similar street side appearance.

Light Control and Privacy

Sheer: Allows the most amount of light into the room for a minimum amount of privacy and a view to the outside. Objects in the room can be seen quite clearly through shades.

Light Filtering: Allows light to gently filter through and provides privacy. Images and shapes may be seen through these shades, but details are not visible. Deep fabric colors provide moderate light control, while light colors provide lower light control.

Room Darkening: Light is substantially blocked; vague shadows of objects or people may be visible; maximum room darkening is achieved with darker colors.

REMINDER: For inside mount there will be a light gap ($\frac{3}{8}$ " for wand control) and a secondary treatment (curtains or draperies) is recommended to achieve complete privacy. Otherwise, an outside mount with overlap is recommended.

Pattern Alignment

Due to the pattern design of roller and solar fabrics and natural shade materials, exact alignment of the pattern across panels is not possible.

To ensure consistency of color and material and to avoid material lot variations, it is important to order all shades for one room at the same time.

Size Considerations

Single Stack	18 52 spliced	192	20	108 wand control
Split Stack	36 60 spliced	332 192 to 332 (spliced headrail)		

*For all inside mount applications— $\frac{3}{8}$ " deduction is taken on overall width.

Spliced Headrail (wand only)
(see spliced shades options section)

Depth Requirements for Inside Mount

	Sliding Panels Headrail Dimensions (inches)	 Partially recessed headrail in window casing/ molding Minimum Depth Mount (inches)	 Fully recessed headrail in window casing/ molding Flush with Casing (inches)	Roller, Solar Fabric Fully Recessed with Valance Flush with Casing (inches)	Natural Shade Material Fully Recessed with Valance Flush with Casing (inches)
2-Channel	$1\frac{1}{16} \times 1\frac{1}{16}$	1	$1\frac{1}{16}$	$\frac{3}{8}$	$3\frac{3}{16}$
3-Channel	$\frac{1}{16} \times 2$	1	$2\frac{1}{8}$	$\frac{3}{8}$	$3\frac{3}{16}$
4-Channel	$\frac{1}{16} \times 2\frac{3}{4}$	$1\frac{3}{4}$	$2\frac{3}{4}$	$3\frac{3}{16}$	$4\frac{1}{8}$
5-Channel	$\frac{1}{16} \times 3\frac{1}{2}$	$1\frac{3}{4}$	$3\frac{1}{2}$	$4\frac{3}{16}$	$4\frac{3}{4}$

NOTE: For all headrails, height with panel attachment rail is $1\frac{1}{16}$ ".

Options

Summary

The following is a list of options for sliding panels. Most options are available in all styles and colors. Limitations will be based on type. See detailed descriptions on the following pages.

Control Type Options—No Charge

- Wand control—standard

Shade Options—No Charge

- Edge banding—natural shade material only
- Projection brackets
 - Long (adds up to 2½" extension from wall)
 - Optional for 2, 3, 4, and 5 track headrails
 - Medium (adds up to 1⅝" extension from wall)
 - Optional for 2 and 3 track headrails
 - Standard on 4 and 5 track headrails

Shade Options—Surcharge

- Privacy liner: natural shade material only
- Room-darkening liner: natural shade material only
- Spliced shades: shades over 192", first splice is no charge; wand control only
- Square-corner valance: roller, solar, or Roman fabric only
- Premiere valance: natural shade material only
 - 6" valance with horizontal material orientation, edge banding is optional (named self valance previously)
 - 6" valance with vertical material orientation, edge banding top and bottom mandatory
 - 9" valance with horizontal material orientation, edge banding is optional
 - 9" valance with vertical material orientation, edge banding top and bottom mandatory
 - 9" deco-trim valance, no vertical orientation, edge banding, or liner options
- Wood cornice and valances: see cornice and valance product information guide

Options

Wand Control

- No charge
- Standard

Control Length Chart	
Finished Blind Height (inches)	Wand Length (inches)
Up to 30	12
30 ¹ / ₁₆ to 48	24
48 ¹ / ₁₆ to 77	36
77 ¹ / ₁₆ to 92	48
92 ¹ / ₁₆ to 108	60

- Control length is the distance from the top of the track to the bottom of the wand control
- Spliced headrail tracks are only available as wand control
- Wand is oriented to the front of the panel
- Split stack has a wand on each leading panel

Stack Options

- No charge
- Stack is the location of the panels when the shade is fully open
- Order selection based on stack right, left, or split

Split Stack

Stack Left

Stack Right

Options

Edge Banding: Natural Shades

- **No charge**
- Edge banding is required with natural shade material
- Not available with roller, solar, or Roman fabrics

1" Edge Banding	Color Number
Black	7000
Cocoa	7001
Dark Beige	7005
Dove Gray	7981
Graphite	7899

Options

Spliced Shades

- **For surcharge, see price charts**
- Shades over 192", first splice is at no charge
- Excellent option for homes or apartments where narrow hallways, elevators, or stairwells make it difficult to move wide shades
- Available with wand control only
- Headrail sections will require assembly at installation
- Single stack shade available up to 192" wide; shade operates as one unit after headrail sections are assembled together; maximum number of headrail sections: 3 (2 splices)
- Split stack shade available up to 332" wide; maximum number of headrail sections when greater than 192": 6 (5 splices)
- 4- and 5-track headrails only

NOTE: Must specify spliced shades at time of order.

Replacement Panel Information

- **For pricing, see replacement panel price charts**
- Replacement panels may be ordered to replace damaged panels or to update panels to match new décor
- Each panel is priced individually based on panel width and shade height
- When ordering, specify
 - Fabric or material style, color name, and color number
 - Finished panel width (width at top of panel)
 - Overall shade height (height of shade including headrail)
 - Number of panels needed

NOTE: Due to dye lot variations and color aging, exact color match to the original order is not guaranteed.

Replacement Headrail Information

- **For surcharge, see price charts**
- Valances not included with replacement headrail; must be ordered separately
- Installation hardware is included

Specify the following when ordering:

- Finished shade width and installation (inside or outside mount)
- Number of tracks
- Stack option (right, left, split)
- Control option (wand control)
- Control location (left or right)
- Headrail color (Gray or Bronze)
- Projection brackets (if desired)

Replacement Valance

A valance only option is available. Orders for roller, solar, and Roman fabrics will receive the square-corner valance; orders for natural shade materials will receive the premiere valance. See price charts for price.

Options

Roller, Solar, and Roman Square-Corner Valance

- **For surcharge, see price charts**
- A square-corner vinyl, channel panel valance is available as a surcharge option for roller, solar, and Roman fabric shades
- The square-corner valance includes two returns
- Special valance return lengths are available from 1" to 6"
- A single valance is available up to 192" in width; due to material widths, the valance may be spliced in two or three places
- Not available with natural shade materials

Valance: Premiere Natural Shades Sliding Panels and Premiere Valance Only

Shown with Option A

Option A

Option B

Option C: Deco-Trim Designs
Seascape

This design is scaled to the width of the shade

Dentil

This design will repeat with the width of the shade

Cathedral

This design will repeat with the width of the shade

Horizon

This design is scaled to the width of the shade

- **For surcharge, see price charts**
- Natural shade material is mounted to a North American hardwood frame with mitered corner returns that attach separately; valance upgrade option provides stable returns and a clean, uniform appearance
- Valance can be ordered for use alone or to complement other window treatments
- Valance includes mounting brackets
- Valance returns are available on all options
 - Valance returns are standard on outside mount natural shades premiere valance based on headrail depth
 - Special valance return widths available for outside mounts from 1½" to 8" or inside mounts from 1½" to 3"
 - Special return height sizes are not available
 - Horizontal valance returns are not edge banded
- Valances over maximum material width will be spliced
- Fabric edge banding is available on 6" or 9" horizontally or vertically oriented material; not available on deco-trim valance
- Not available with roller, solar, and Roman fabrics

Options:

A: 6" or 9" valance with horizontal material orientation, edge banding is optional.

B: 6" or 9" valance with vertical material orientation, edge banding top and bottom mandatory.

C: 9" deco-trim valance; no vertical orientation option (must select accent gimp).

D: Wood cornice: see cornices and valances product information guide.

NOTE: Horizontally oriented valances over 96" will be spliced in one to three places and will not align with shade panels. Vertically oriented material will be one continuous piece. Hardwood frame will be spliced at 94" with returns and 95" without returns.

General Information

Use this chart to determine the number of tracks to order for single stack.

Minimum Depth Requirement: 2 or 3 tracks = 1"; 4 or 5 tracks = 1¾"

Inside Mount: Match the width measurement of the window with the finished shade width range column. Inside mount shades made with more tracks have a larger clear window opening. Shades with fewer tracks may cover the window more. Select the number of tracks based on the measurements in the chart below.

Outside Mount: To determine width measurement and to select number of tracks, find clear opening measurement in the chart. Select number of desired tracks. The shade width will be the clear window opening, plus stack width, and privacy overlap. The shade width will vary with the number of tracks selected.

NOTE: For maximum clear opening, see "How to Measure for Uncovered or Clear Window Opening". To determine panel configurations, see single stack shade chart under panel configurations.

General Information

Use this chart to determine the number of tracks to order for split stack.

Minimum Depth Requirement: 2 or 3 tracks = 1"; 4 or 5 tracks = 1¾"

Inside Mount: Select the number of tracks based on the measurements in the chart below. Match the width measurement of the window with the finished shade width range column. Inside mount shades made with more tracks have a larger clear window opening. Shades with fewer tracks may cover the window more.

Outside Mount: To determine width measurement and to select number of tracks, find clear opening measurement in the chart. Select number of desired tracks. The finished shade width will be the clear window opening plus the stack width. The shade width will vary with the number of tracks selected.

NOTE: For maximum clear opening, see "How to Measure for Uncovered or Clear Window Opening". To determine panel configurations, see split stack shade chart under panel configurations.

General Information

How to Measure for Uncovered or Clear Window Opening

Single Stack Left Shown
Finished shade width for total clear opening

Split Stack
(recommended for balanced appearance)
Finished shade width for total clear opening

1. Measure desired clear window opening. For additional privacy and light control, add 3" to the clear window opening measurement.
2. Match this measurement with the clear opening measurement in the track selection charts. Select the number of desired tracks. The finished shade width will be the clear window opening, 3" privacy overlap, and the panel width.
3. Order this size headrail.
4. Example: single stack
 - a. If determined width for clear opening window view is 57" including the 3" privacy overlap, the finished shade width using 4 tracks is about 80". Order an 80" width headrail.

Panel Configurations

Single Stack Shade

Single stack shades may be ordered to stack left or right. The diagrams below depict a single stack left shade. The configuration is the reverse for a single stack right shade. The white panels indicate the lead panel. Headrail is not reversible. Panel overlap is always 4".

Shade Width (inches)	Number of Tracks on Headrail	Number of Panels	Panel Configuration of Headrail (view from top of headrail)
18 to 92	2	2	Closed shade; front facing room (left-stack)
18 to 136	3	3	Closed shade; front facing room (left-stack)
20 to 180	4	4	Closed shade; front facing room (left-stack)
24 to 192	5	5	Closed shade; front facing room (left-stack)

Split Stack

The white panels indicate the lead panels and where the split will occur. Headrail is not reversible. Panel overlap is always 4".

Shade Width (inches)	Number of Tracks on Headrail	Number of Panels	Panel Configuration of Headrail (view from top of headrail)
36 to 118	2	4	Closed shade; front facing room
36 to 272%	4	6	Closed shade; front facing room
36 to 332	5	8	Closed shade; front facing room

General Information

Sliding Panel: Roller, Solar, and Roman Fabrics Product Detail

NOTE: Panel overlap is always 4". Illustrations depict a single stack right shade. Configuration is reverse for a single stack left shade. Headrail is not reversible.

General Information

Sliding Panel: Natural Shade Materials Product Detail

Projection Brackets

- Standard on outside or wall mounts
- Used with standard mounting clips

Hidden Standard Mounting Clips

- Used for inside or ceiling mounts
- Used with projection brackets for wall mounts

Panel Attachment

- Reduces light gap and securely holds heavy materials

Wand Control

- Standard
(always on lead panel)

Aluminum Track System

- Durable and rust resistant
- Precision roller system (in headrail)
- Quiet and smooth traversing of panels

Edge Banding

- Protects edges of natural shade material

Valance Clips

Premiere Valance

- Optional with surcharge

NOTE: Panel overlap is always 4". Illustrations depict a single stack right shade. Configuration is reverse for a single stack left shade. Headrail is not reversible.

Replacement Panel Pricing and Ordering: Roller, Solar, and Roman Shades

Replacement panels may be ordered to replace damaged panels or to update panels to match new décor. Each panel is priced individually based on panel width and shade height.

When ordering, specify:

- Fabric style, color name, and color number
- Finished panel width (width at top of panel)
- Overall shade height (height of shade including headrail)
- Number of panels needed

NOTE: Due to dye lot variations, we cannot guarantee an exact color match to the original order.
