Features and Benefits

- Made of hand-selected NormanTeak[™] that is treated with **Prescription Wood Conditioning[™]** technique according to the moisture content of the final installation location to reduce post-installation shrinking and swelling.
- Louvers are made of **quarter-sawn wood** to ensure generations of durability. This tight, straight and parallel grain also enriches wood character in stain finish.
- The appearance of **furniture quality finish** and the **exceptional craftsmanship** gives Norman Teak shutters an instant feeling of art.
- A wide range of **frame designs**, that keep installation screws out of sight for a clean and decorative look.
- **Reinforced engineered stile**-- Multiple layers of wood bonded together to reinforce durability to the core of the stile, which results in a robust support system for the shutter panel.
- Employs **mortise and tenon joinery** that resists shear and racking forces endured by shutters to ensure prolonged quality and durability.
- **Multiple stile options** available in various sizes to accommodate different window designs. Use **Astragal** or **Rabbet stile** as a natural light block between panels.
- Quick and easy on-site installation with the **pre-installed magnets and hinges**, as well as **pre-mitered frames** and **slotted keyholes**.
- A labor-intensive **hand finishing** process that involves **multiple sanding and coatings** with fine layers of stain or paint to achieve a translucent and polished appearance.
- **Special panel and frame design** that is custom cut to accommodate unique windows. Create unity or attract attention with Sussex's exclusive decorative elements.
- Personalize shutters with **special options**. Choose from fixed louvers, center or offset tilt rod, double hung panels, café shutters, track systems, French door cutout, specialty shapes and many more.
- Available in a **multitude of solid and stain colors** that can match the style of any home.
- A guarantee of Norman's exemplary quality with a **lifetime limited warranty on materials and workmanship**.

Pre-drill L or Z Frames:

General Product Specifications

<u>Description</u>	<u>Minimum</u>	<u>Maximum</u>		
		1¼"	1⅞"	2½" / 3½" / 4½"
Single Panel Width (Regular)	6"	20"	30"	36" for 2½", 42" for 3½" & 4½"
Single Panel Width (Bi-fold)	6"	20"	26"	26"
Multi-fold Panels (hinged shutters, up to 4 panels)	6"	20"	N/A	N/A
Multi-fold Panels (track shutters, up to 4 panels)	6"	N/A	20"	20"
Single Panel Width (for Bypass Panel With Center Stile)	6"	N/A	30"-50"	36"-50"
Single Panel Height	10"	133"	133"	133"
Shutter Width (Without T Post)	N/A	4x single panel width (bifold) + frame		
Shutter Width (With T Post)	N/A	Unlimited (frame pieces exceeding 142" will be spliced)		
Shutter Height	N/A	133" + frame		

Shutters without bottom supports

Sussex shutters will be covered by our warranty for this application, subject to our standard specification limitations and the guidelines listed below:

All Sussex panel configurations:

- You must inform Norman Shutters of situations where shutters will not have bottom support when placing the initial order, or warranty will be considered void.
- Informing Norman Shutters when placing such orders ensures that the factory will add extra hinges to support the panel. This will reduce the probability of the panels sagging.
- If you fail to notify Norman Shutters that the shutter will be used without a bottom support or used as doors, this will constitute a misapplication of the shutter. Consequently, you will be responsible for the cost of any RGA Reorder that is submitted.
- If you want a bifold shutter, a track must be ordered to support the panels.

Tilt Rods

Standard Tilt Rod
Default Location

In the middle of the panel on front side (default).

Offset Tilt Rod^{*}
Default Location

On the front side of the panel and at 1" from the louver ends on the hinged side.

Optional location: per your request.

InvisibleTilt[™] *

Louver tilting system embedded within panel stile. It is not available for 1 1/4" or 1 7/8" louver. The tilting system is split when the number of louvers exceeds the limits as listed below:

Louver Size	Maximum Possible Louvers	Height Range
2 1/2"	21	47 3/4" – 55 1/4"
3 1/2"	14	45 3/4" – 53 1/4"
4 1/2"	10	47 3/4" – 55 1/4"

- For even numbers of louvers, the number of louvers operated by the top and the bottom tilting system will be the same.
- For odd numbers of louvers, the number of louvers operated by the bottom tilting system will be one more than the number of louvers operated by the top tilting system.
- Minimum panel width is changed to 8 11/16"

Divider Rails

- A divider rail is an extra rail in the middle of the panel.
- Creates two sections in the panel so louvers can be operated independently.
- Strengthens the panel and enhances panel structural integrity.
- For 1¼" Colonial louver, divider rail is required for panel heights over 50".
- For other louver sizes, divider rail is required for panel heights over 78".

Specifications

- Standard width: 3"
- Default location: center of the panel unless specified otherwise

Measurements:

- Window size:
 - Measure from the bottom of the window to the center of the divider rail.
- Max frame-to-frame:
 - Measure from the bottom of the frame to the center of the divider rail.
- Position:
 - Per customer's specification. However, the divider rail may be adjusted to a lower or higher position, within our allowable deviation to ensure reinforcement and aesthetics of the shutter.

When placing the order, please clearly specify if the divider rail position needs to line up with that of other shutter divider rails in the same room. Please also refer to the table below for the allowable deviation details.

Divider rail allowable deviations

Louver Size	Allowable ± Deviation
1¼"	½"
1"	¾"
2½"	1"
3½"	1½"
4½"	2"

H>120"	6

Available Stile: Butt and Astragal

Preinstallation:

Panels and frames will be packaged individually, and the hinge is preinstalled onto the frame/post, with the screws for the other half part on the panels in the hardware box.

If bifold/multi-fold panels are packaged together, the hinges are installed before shipping, or the hinges & screws are packed into the hardware box.

Panel Lock: (not available for 1.625" Stile)

Available Material: All

Position: (Only available on Bottom for Track Shutters with Bottom Track; For Regular, available on Top/Bottom/both Top and Bottom)

Panel Config: L Panel Config: R

Panel Config: LR

Panel Config: LL

Panel Config: RR

Panel Config: LLRR

Sussex[®] NormanTeak[™] Shutters

Panel Config: LLLL

Panel Config: RRRR

Panel Config: LLLRRRR

Panel Config: FFFFFF(R)

Default:
Floating panels
stacked to Right

The Panel Lock location for both track system shutters and regular shutters would be the same. The general principle is that the Panel Lock position will avoid the stile which will install the spring-loaded guide at bottom (same stile as the Wheel carrier).

Ring Pull

for easy opening and closing (only available in stainless steel)

(Not available for 1.625" Stile)

Available Material: ALL

Position: For different panel configuration, please refer to the location of Panel Lock to show on which stile the pull will be fixed.

Position:

- A. Above Bottom Rail (Default)
- B. Above 1st Divider Rail (Default when there are Divider Rails)
- C. Custom Location

If both Panel Lock & ring pull are specified, the distance between them is 70mm, and the ring pull location is 171mm from the bottom of panel.

When there is no mid rail, ring pull will be just on the top of Panel Lock (70mm above Panel Lock) as default location; if there are mid rails, bottom of ring pull lines up with top of the 1st mid rail as default location.

Position:

- A. 70mm Above Panel Lock (Default when both Ring Pull and Panel Lock are specified)
- B. Above 1st Divider Rail (Default when there are Divider Rails)
- C. Custom Location

Measurements:

- Window size:
 - Measure from the bottom of the window to the center of the ring pull.
- Max frame-to-frame:
 - Measure from the bottom of the frame to the center of the ring pull.

Side Magnet: Only available for Butt and Astragal stile

This option is applied to the meeting stiles of LR panels.

Application to following condition:

1. Double Hung shutter without horizontal T post:

The side magnet will be installed on the top of bot tom tier and bottom of top tier.

2. Café Shutter

3. No frame or light block or L-shape striker plate on either top or bottom, or if larger than standard top or bottom gap is requested.

Track Shutters—Bifold & Multi-fold

Guidelines and Specs:

Description	Minimum	Maximum		
		1 ¼"	1 ⅞"	2 ½" / 3 ½" / 4 ½"
Single-Panel Width (Bifold Track)	6"	N/A	26"	26"
Single-Panel Width (Multifold track up to 4 panels)	6"	N/A	20"	20"

Special Options

Café Shutters*

- The top of the panel requires a special finish. Please indicate “café shutter” when placing orders.
- The shutter does not come with recessed magnet on top.

Double-Hung Shutters*

- For total number of panels, please include panels in both rows.
- For panel configuration, please provide panel fold for one row.
- The default location for the division point is the center unless specified otherwise.
- Horizontal T Post* can be added for increased structural integrity.

Fixed Louvers

* Surcharge applies. Please see Options and Surcharges page for details.

Special Options (continued)

Raised Panel *

Available in

- Raised panel with louver combination .
- Raised panel only.

Specifications

- 12" ≤ raised panel section height ≤ 48".
- For 1¼" Colonial louver, divider rail is required for panel heights over 50".
- For other louver sizes, divider rail is required for panel heights over 78".
- The maximum panel height is 133".

Raised Panel Location(s)

- Top.
- Middle.
- Bottom.
- All (if panel height does not exceed 48").

Rails

- For a panel with raised panel section only, 3" is the standard size for top, bottom and divider rails.
- The minimum size for top and bottom rails is 3".
- If you are matching raised panels to standard shutter panels, the top rail of the standard shutter panel will match the top rail of the raised panel. Please specify clearly when placing order.

* Surcharge applies. Please see Options and Surcharges page for details.

Special Options (continued)

Hand-Carved Rail *

- Available for top and/or bottom rails.
- Please note that the proportion of the design is based on the height of the rail, not the width of the panel.

Vine

Wheat

Rosette

Star

Fish

Swan

Fleur de Lis

Special Options (continued)

Liberty Arch *

- The arch starts and ends 1" from the rail sides.
- The arch height is half of the top rail size (rounded up to $\frac{1}{8}$ " increment).
- The shape of the Arch is based on 3 points taken from the rail.
 - 1st point: 1" from the left stile
 - 2nd point: 1" from the right stile
 - 3rd point: Midpoint of the rail front

French Door Contour Collection*

- Flush and offset cutout options are available in both curved and square French door cutout.
 - ◊ Offset cutout is good option for French Door with molding around the glass.
- All French door cutouts are only available in L frame except Type E and F. The batten is placed behind the Type E/F panel to block light.
- For measurement details please refer to Form section.

Special Options (continued)

Custom Colors *

Available in Sussex[®] shutters and Sussex[®]blinds.

Option (Color Code)	Sample Size	<u>Confirmation Process</u>
Custom Solid (C01)	At least 4" x 4" on a clean, flat surface such as wood or cardboard	All orders require customer's confirmation via actual swatch in the mail before production. Additional shipping and handling fee applies.
Custom Stain (C02)	At least 4" x 4" on a clean, flat surface such as wood or cardboard	All orders require customer's confirmation via digital photo OR actual swatch in the mail before production. Additional shipping and handling fee applies.

Note:

- 1) All custom colors will only be finished with the standard gloss used on all Norman products.
- 2) Please note that we will only be able to match the tone instead of the texture or finish of the sample your submit.
- 3) Only one dispute is allowed during the color confirmation process.
- 4) Customer may waive confirmation to shorten production lead time. Norman[®] will not be responsible for any color variation afterwards.

PerfectTilt[®] *

- Battery operated motor and remote control
 - No expensive and invasive hardwiring required
 - No unsightly cord and plug needed
- Sleek and easy to use wireless remote control
 - Pre-set angle remote buttons, plus minor adjustment, for maximum convenience
 - Complete light and privacy control

* Surcharge applies. Please see Options and Surcharges page for details.

New PerfectTilt RF

The new PerfectTilt RF has many exciting features & benefits.

- Norman[®] is the only national brand that offers motorization on shutters
- No need to plug-in, no cords, no hardwiring
- Tilt multiple panels in sync or individually
- Includes InvisibleTilt[™] system, a completely tilt-rod-free solution for a more streamlined view and improved energy efficiency
- Larger solar panels on solar modules absorb more energy than ever before
- Ergonomic remote includes 8 preset angles and can control unlimited number of shutters in range
- Utilizes RF signal, not traditional infrared: for precise reception, range up to 65 ft., no sensor holes, and no need to point remote directly at receiver
- Remote is equipped with a timer, allowing you to use your own computer from anywhere at any time with our proprietary web interface
- Whisper quiet, gear-driven system
- PerfectTilt[®] RF wires are concealed inside panel, completely hidden from view
- Extra battery packs can be installed as add-on for longer periods between recharges

Parts and Names:

Specialties

Specialty Shutters*

Specialty shutters are made of premium solid wood, finished to match the beauty of all Norman shutters. Templates are required if it is an imperfect specialty. Delivery time is 8 weeks from the order confirmation date for all specialty shutters. Please refer to Specialties and Template Requirement sections for details.

All frames for specialty shutters will be made as solid frames (not with an insert). However, if there is a regular shutter below a specialty shutter and the frames for both shutters are separated by a divider strip, then the top frame will be made as a solid frame but the bottom frames will be made as regular frames with inserts. If the top frames and the side frames are not separated by a divider strip, both side frames and the bottom frames will be made as solid frames.
