PLEASE NOTE:

Photos and illustrations are for inspiration only.
Not all product configurations are available in all countries.

Window blind cords are a strangulation hazard for young children. Consult your dealer or store associate for cordless products, or products with inaccessible cords. Remove this product immediately if a cord longer than 22 cm, or a loop exceeding 44 cm, becomes accessible.

VEUILLEZ NOTER :

Les photos et les illustrations ne sont offertes qu'à titre d'inspiration. Toutes les configurations de produits ne sont pas disponibles dans tous les pays.

Les cordons pour store de fenêtre représentent un risque d'étranglement pour les jeunes enfants. Consultez votre dépositaire ou un associé de magasin pour des produits sans cordon ou des produits dont les cordons ne sont pas accessibles.

Retirez ce produit immédiatement si un cordon mesurant plus de 22 cm de longueur ou une boucle dépassant 44 cm deviennent accessibles.

®Oeko-Tex® fabric

FR = Flame resistant NFPA 701

FH = Free hanging fabric

INS = Fabric inserted into channel panel

Features

Sheer vertical blinds combine the soft look of sheer fabric draperies and the light control benefits of vinyl vertical blinds. When the vanes are open, softly diffused light streams into the room through sheer fabric for minimal privacy and light control; when closed, light is blocked from entering the room to provide maximum privacy and light control. Not only for patio doors, sheer vertical blinds also look beautiful on wider or uniquely shaped windows. Plus, sheer vertical fabrics are easily removed and machine washable.

- Fabric easily installed and removed—no need to take down entire blind
- Easily replace original fabric with different style or color when décor changes
- Fabric is machine washable
- Color coordinated thread for a finished appearance
- Heavy-duty aluminum headrail with steel pantograph system ensures smooth operation and proportional spacing of vanes
- Available as outside mount only
- Stems are removable for easy replacement in the home

Sheer Vertical Blinds: Styles, Fabric Content, and Light Control

Collection Name	Material Content	Light Control	Vane Style	Street Side Appearance	Coordinates
Dijon	100% polyester	Sheer/room darkening	FH	Neutral	
Gossamer	100% polyester	Sheer/room darkening	FH	Neutral	Graber Artisan
Highlight	100% polyester	Sheer/room darkening	FH	Neutral	Graber Artisan

Light Control Levels

Light Filtering: Light is filtered to varying degrees depending on fabric style and color; silhouettes of objects and people are visible through the blind.

Room Darkening: Light is substantially blocked; vague shadows of objects or people may be visible; maximum room darkening is achieved with darker colors.

Sheer: Allows light to enter the room where light control and privacy are not a concern. Objects in the room can be seen quite clearly through open blinds.

Oeko-Tex® Standard 100 Certified Fabrics

Oeko-Tex Standard 100 certifies that our fabrics are free of PVC, halogen, lead, formaldehyde, allergenic dyes, pesticides, phenols, heavy metals, and meet all VOC content limits.

NFPA 701

NFPA 701 Flame resistance test is the standard method of fire tests for flame propagation of textiles and films by the National Fire Protection Agency.

Features

Vertical Blinds: Vane Features

Vane View: Side the color or texture is facing when vanes are rotated open so you can see through the vanes to the street.

Vinyl Styles

- All vinyl vanes offer value, durability, easy cleaning, and superior light control
- Choose from embossed crown, smooth crown, or S-shaped embossed vinyl vanes
- Embossed textures offered in solids or prints with the look of jacquard or linen fabrics, wood, or stucco
- Coordinating 2" horizontal vinyl blinds available for many styles; for pricing on 2" horizontal vinyl blinds, see the Graber® 2" horizontal vinyl product information guide

Vinyl Crown Vanes

- Traditional curved vanes

Vinyl S-Shaped Vanes

- Provide a more drapery like look to your vertical blinds
- Provide better closure for more light control and privacy
- Valances are made with crown PVC of the same texture and color; dye lot cannot be guaranteed
- S-shaped vanes are NOT reversible; vane view shows which side the color/texture is facing when vanes are rotated open so you can see out the window
 - Right stack and split stack—left
 - Left stack—right
- You may choose a vane view other than the recommended if you are concerned about which side of the vane you will see when blinds are rotated open
- For bay and corner blinds, the same vane view is recommended for all blinds

NOTE: See illustrations on how S-shaped vanes will hang.

Fabric Vanes

- Designer fabric vane styles range from sheer to room darkening in a variety of weaves and materials
- Free-hanging vanes come with sewn-in bottom weights and optional chain and clips
- For increased privacy and room darkening, fabric vanes can be inserted into channel panels; the clear edge channels hold fabric securely and will not yellow over time; the opaque vinyl vanes provide additional privacy and light control; see price charts for replacement pricing
- Coordinating Graber pleated, solar, and roller shade fabric and Graber sliding panels are available for selected styles
- Available in 3½" fabric styles

Additional Information

- Due to the nature of vane materials (both fabric and vinyl prints), colors may vary slightly from dye lot to dye lot; exact matches cannot be guaranteed
- Due to the random design of some vane patterns, exact alignment of the pattern across the blind is not possible

Size Considerations

Vertical Blinds

	Width			Height	
	Minimum Single Stack (inches)	Minimum Split Stack (inches)	Maximum (inches)	Minimum (inches)	Maximum (inches)
One Touch®	9	N/A	144	12	104

Outside	All types	Yes/no	0	0	0
Inside	Ceiling or top	No	5/8	1/2	1/2
Inside	Ceiling or top	Yes	3/4	5/8	1/2
Inside	Wall or back	No	1 1/16	7/8	7/8
Inside	Wall or back	Yes	1 1/8	1 1/8	1 1/8

Mount	Width Deductions (inches)
Outside	0
Inside	1/4

Depth Requirements for Inside Mount

	Headrail Dimensions (inches)	 Partially recessed headrail in window casing/molding Minimum Depth Mount (inches)	Headrail Flush with Casing (vanes and/or valance not flush with casing) (inches)	Depth Needed for Flush Mount Vane (inches)	 Fully recessed valance in window casing/molding Depth Needed for Flush Mount Valance (inches)
G-71 Super-Vue	1 5/8 x 1 15/16	2 3/4	3	3 3/4	4 3/8
G-98 Ultra-Vue	1 5/8 x 1 3/8	2 3/4	2 11/16	3 3/4	4 3/8
G-85 Dura-Vue	1 5/8 x 1 1/2	2 3/4	2 3/4	3 3/4	4 3/8

Sheer Vertical Blinds

	Width		Height	
	Minimum (inches)	Maximum (inches)	Minimum (inches)	Maximum (inches)
One Touch	17	144	19	104

Depth Requirements for Inside Mount

 Partially recessed headrail in window casing/molding Minimum Depth Partially Recessed Mount (inches)	Depth Needed for Flush Mount Headrail (inches)	Depth Needed for Flush Mount Vane (inches)	 Fully recessed valance in window casing/molding Depth Needed for Flush Mount Valance (inches)
2 3/4	3	5 1/4	6

Partially Recessed: A partially recessed window treatment is where the depth of the window casing is less than the space necessary for a flush mount.

Flush Mount: If the window casing is deep enough to mount the entire blind inside of it, this is called a flush mount.

Options

Summary

The following is a list of options for vertical and sheer vertical blinds. All options are available in all styles and colors. Limitations will be based on fabric width. See detailed descriptions on the following pages.

Vertical Blinds

Options—No Charge

- Bay and corner windows
- Projection bracket: 4 $\frac{3}{8}$ "

Options—Surcharge (see price charts for pricing and/or surcharges)

- Cut-outs
- Round-corner valance
- Double round-corner valance
- Square-corner valance
- Stay Clear™ channel panels
- Wood cornices and valances (see cornices and valances product information guide)

Sheer Vertical Blinds

Options—No Charge

- Bay and corner windows
- Dauphine® valance

Options—Surcharge (see price charts for pricing and/or surcharges)

- Round-corner valance
- Double round-corner valance
- Wood cornices and valances (see cornices and valances product information guide)

Control Options

One Touch® Wand Control

- **No charge**
- A slender wand controls vane rotation and traversing
- Simple, convenient, safe (no cords and chains)
- Recommended for homes with children or pets
- Available with single stack, and split stack: opposite stack not available
- Wand is always attached to leading vane
- Split stack is only available in the US
- When two headrails are butted together, a light gap of approximately 1" may exist where the louvers meet

Width		Height	
Minimum (inches)	Maximum (inches)	Minimum (inches)	Maximum (inches)
9	144	12*	104

Wand Sizes

Keep in mind that the wand length is determined by the finished blind height. If the vertical blind covers a patio door or the bottom of the vertical blind reaches the floor, the following chart indicates wand length. If the headrail distance from the floor is greater than 77" or there is any furniture in front of the blind, specify a 48" or 60" wand for easy accessibility.

Blind Height (inches)	Wand Height (inches)
77 or less*	33
77 $\frac{1}{2}$ to 92	48
92 $\frac{1}{2}$ to 96	60

*If blind is less than 35", wand will be longer than vanes.

Options

Vertical Blinds: Headrail Systems

G-71 Super-Vue®

The top-of-the-line G-71 Super-Vue features the patented pantograph traversing system to assure proportional spacing of vanes when closed. G-71 Super-Vue is available in a smooth, anodized aluminum channel. Ball bearing pulleys in the control mechanism and thermoplastic self-lubricating wheels on every carriage allow for smooth traversing vanes. Clear stems provide a sleek appearance with both fabrics and vinyl vanes.

G-98 Ultra-Vue™

The anodized aluminum G-98 Ultra-Vue headrail system traverses vanes smoothly through the consecutive action of stainless steel pick-up tails. Ultra-Vue carriers are wheeled for smooth traversing and are self-aligning.

G-85 Dura-Vue®

G-85 Dura-Vue headrails traverse vanes smoothly with a thermoplastic strap system. Dura-Vue steel headrail is offered in an ivory painted finish. Dura-Vue carriers are wheeled for smooth traversing.

The design of all Graber® headrails allows for reversible installation, providing versatile placement of controls on either the left or right.

Options

Vertical Blinds and Sheer Vertical Blinds: Stacking Options

Split Stack
Left Controls
(right controls available)

Left Stack
Same Side Stack
and Controls

Right Stack
Same Side Stack and
Controls

NOTE: Split Stack not available for sheer wand draw.

Vertical Blinds and Sheer Vertical Blinds: Installation Types

Inside/Ceiling Mount

Outside Mount

1. Inside Mount—Ceiling or Top of Window Frame (standard)
Manufacturing height deduction is taken for blinds being installed as inside, ceiling mount with or without a valance.
2. Inside Mount—Wall or Back of Window Frame
Manufacturing height deduction is taken for blinds being installed as inside mount using the L-bracket for a wall mount. An additional manufacturing height deduction is taken if a valance is included, to accommodate the height of the Dauphine® valance bracket.
3. Outside Mount—Wall or Back (standard)
No manufacturing height deduction is taken.
4. Outside Mount—Ceiling or Top (optional)
No manufacturing height deduction is taken.

Options

Vertical Blinds: Cut-Out Blinds

- **For surcharges, see price charts**
- Order when air conditioner, heating register, or other object would interfere with vanes
- Blind must stack away from cut-out area
- Specify size and base price by maximum width and height of blind
- Submit drawing to identify size and location of cut-out (see example)
- Minimum cut-out width 3½"
- Cut-out must be a full vane width (3½"); therefore may be wider than ordered

Vertical Blinds: Stay Clear™ Channel Panel for Fabric Vanes

- **See price charts for surcharges**
- For replacement channel panel pricing, see price charts
- Vane material inserted into extruded channel panel with clear edges; see blind features for fabric styles available
- Offers improved privacy, room darkening, and a neutral color appearance from exterior of window
- Channel panel colors are: Ivory (#7137) or White (#7136)

Vertical Blinds and Sheer Vertical Blinds: Replacement Vane Ordering

See the column at the far right of each price chart, for individual vane pricing based on material desired.

How to Price a Replacement Vane

- Use the price charts for individual vane pricing
- Determine which chart based on material desired
- Locate height of your vane on the left side of the chart
- Use the price in the "Replmt Vanes" column in the price charts that coincides with the height of vane desired

How to Measure a Replacement Existing Vane, No Changes

- Measure the vane(s) from tip to tip to determine the exact finished vane length/height (FLL)
- No additional deductions will be taken by manufacturing; vanes will be manufactured to the exact size you provide
- Submit the measurement as exact height

How to Measure a Replacement Existing Vane, Changing the Height of the Vanes

- Measure from top of mounted headrail to bottom of location to be covered
- Record this measurement; this is the finished blind length/height (FBL)
- Manufacturing will take appropriate deduction so vanes will cover desired area

NOTE: Free hang fabric vanes include bottom weights.

Options

Vertical Blinds: Square-Corner Valance

Square-Corner Valance
without Dust Cover

Square-Corner Valance
with Dust Cover

5 1/2" Returns

- **For surcharge, see price charts**
- The square-corner valance is an extruded vinyl, Stay-Clear™ channel panel, which is sized to hold 3 1/2" wide vane material; it includes two 5 1/2" returns
- Valances greater than 192" must have a dust cover
- Vinyl valance inserts are not available over 191" wide

Maximum Valance Size Limitations

	Valance		Returns	
	Maximum Vinyl (inches)	Maximum Fabric (inches)	Minimum (inches)	Maximum (inches)
Square-Corner Valance	191	191	3	8

Vertical Blinds and Sheer Vertical Blinds: Round-Corner and Double Round-Corner Valances

5 1/2" Return

Round-Corner
Valance

5 1/2" Return

4 1/2" Return

Double Round-Corner
Valance

Round-Corner Valance
with Dust Cover

Outside Mount Only

- **For surcharge, see price charts**
- The round-corner valance system features the Stay-Clear channel panel and is guaranteed not to yellow; accommodates vinyl and fabric vanes as inserts; S-shaped style vanes use matching crown profile for valance insert
- Create a layered look with a double round-corner valance
- Round and double round-corner valances include 5 1/2" returns
- Single round-corner valance: 3 3/4" high
- Double round-corner valance: 6 1/2" high

Maximum Valance Size Limitations

	Valance		Returns	
	Maximum Vinyl (inches)	Maximum Fabric (inches)	Minimum (inches)	Maximum (inches)
Round-Corner Valance	171	191	3	8
Double Round-Corner Valance	171	191	3	8

Sheer Vertical Blinds: Dauphine® Valance

4 1/2"

- **No charge**
- Fabric is Shirred for a soft look
- Snap-in brackets for easy installation
- Threader cap provides no-snap shirring of sheer fabric
- Notched for minimum 2 1/2" returns and will extend to 7 1/2" using the additional return slides which are included

NOTE: Top hem of blind will be visible below the Dauphine valance.

Also available are wood cornices and valances; see cornice and valance product information guide for more information.

Options

Vertical Blinds and Sheer Vertical Blinds: Bay and Corner Windows

- **No charge**
- in order to minimize corner gaps, we recommend having the wand on the non-corner side of the tracks
- Square-corner valance with dust cover only
- Each blind is controlled separately
- List each track width and height on separate lines
- Price as separate blinds
- If no deductions are required, do not order as bay or corner
- Not available with sheer verticals

Measuring Information

Corner Window

Measure: Width of each window from corner to the point you would like to cover.

Three-Sided Bay Window

Measure:

- A and C: Width of side windows from the corners to the point you would like the blind to cover.
 B: Width of the center window from corner to corner.
 Angle A-B: Angle between windows (A) and (B).
 Angle B-C: Angle between windows (B) and (C).

Measure bay angle using protractor or angle finder. Or use two business cards in bay corner as illustrated and fax to customer service.

Four-Sided Bay Window

Measure:

- A and D: Width of side windows from the corners to the point you would like the blind to cover.
 B and C: Width of each window from corner to corner.
 Angle A-B: Angle between windows (A) and (B).
 Angle B-C: Angle between windows (B) and (C).
 Angle C-D: Angle between windows (C) and (D).

Measure bay angle using protractor or angle finder. Or use two business cards in bay corner as illustrated and fax to customer service.

Five-Sided Bay Window

Measure:

- A and E: Width of side windows from the corners to the point you would like the blind to cover.
 B, C, and D: Width of each center window from corner to corner.
 Angle A-B: Angle between windows (A) and (B).
 Angle B-C: Angle between windows (B) and (C).
 Angle C-D: Angle between windows (C) and (D).
 Angle D-E: Angle between windows (D) and (E).

Measure bay angle using protractor or angle finder. Or use two business cards as illustrated and fax to customer service.

Options

Vertical Blinds and Sheer Vertical Blinds: Clear Opening: How to Measure for Uncovered Window

Stack Left Finished Blind Width (FBW)

Split Stack
(recommended for
balanced appearance)
Finished Blind Width (FBW)

1. Determine headrail type and the clear opening width for split stack, stack right or stack left (see diagrams)—the additional 3" shown for privacy is recommended if ordering a right or left stack.
2. Match the clear opening width with dimension found under "CO" column below. For even spacing, round up width measurement to the next size in the stack chart. Split stack will have even number of vanes.
3. Order the corresponding dimension found in the "FBW" (finished blind width) column below.

EXAMPLE: Stack Left

If determined width for clear opening window view is 54 $\frac{1}{4}$ ", order width needed to provide full unobstructed view is 66 $\frac{3}{4}$ ".

NOTE: For stack right or stack left blinds add an additional 3" to the clear opening before calculating the finished blind width.

For G-98 Ultra-Vue™ and G-85 Dura-Vue® headrails, and One Touch® Control, see appropriate stacking charts for single stack blinds only on the following pages.

Sheer Vertical Blinds: Hem Style

- 4" drapery hem is standard

General Information

G-71 Super-Vue® Product Detail

Features	Benefits
Heavy-Duty Anodized Aluminum Headrail	Will not rust; ideal for high-humidity applications
Rack and Pinion Gear System	Allows vanes to rotate smoothly and easily
Centrally Located Carrier Stems	Reversible headrail
Pantograph System	Requires very little draw force to open and close blinds; vanes stay proportionately spaced when opening the blind
One Touch® Control	Safety and convenience
Removable Stems	Ability to repair instead of remaking—less invasive for the customer
Clear Nylon Vane Stems	Nearly invisible, yet extremely strong

NOTE: Wand control is standard. See control options section for details.

General Information

G-98 Ultra-Vue™ Product Detail

Thin Profile Carrier System

- Narrow carrier width provides reduced vane stack
- Self-aligning carriers for trouble-free operation

Color Coordinated End Caps

- Provide a clean, finished look

Aluminum Headrail

- Will not rust
- Perfect for high-humidity applications

Inside Headrail View

Features	Benefits
Heavy-Duty Anodized Aluminum Headrail	Will not rust; ideal for high-humidity applications
Thin Profile Carriers	Reduced stack
