

FINALÉ WOOD CORNICES

DECORATIVE TOP TREATMENTS FOR WINDOWS

MADE IN THE USA

CUSTOM CORNICES

FINE FURNITURE FOR WINDOWS

Water's Edge Blinds beautiful Finalé Wood Cornices are handcrafted, custom made top treatments for windows. These hard window coverings add stunning dimension to walls, create impressive focal points and most importantly, they make an exclusive design statement every decorator desires.

Each cornice is handcrafted in the USA from 100% North American Hardwoods and is custom built to specifications to ensure a perfect fit. Only eco-friendly stains, paints and UV protective topcoats are used to enhance the natural characteristics of the wood and achieve a durable, long lasting finish. The high quality craftsmanship and finishes used are what gives these wood cornices the appeal of a classic piece of “fine wood furniture”.

From the minimalist to the most sophisticated decorator, there are many wood cornice designs to choose from. Embellishment options such as ornate wood appliqués, fabric or wallpaper options and a rainbow of colorful finishes allow designers to have complete creativity when crafting their own signature style cornice. These custom design options are a part of the beauty that makes Finalé Wood Cornices a truly unique... one-of-a-kind window treatment for all décor settings.

Also available in select finishes, matching horizontal and vertical wood blinds.

ESSENTIAL FORM OF FUNCTION

Functionally, decorating with cornices has many benefits. They can add width and height to windows, making short or narrow windows seem to appear taller and wider. Cornices may also serve as a quick fix when trying to hide visible blemishes such as dated moulding, cracks in walls or existing drapery rods. Alternative uses for cornices include framing entryways or large pictures and more popularly, as a bed crown paired with luxurious drapery.

HOW TO MEASURE

STANDARD WINDOW

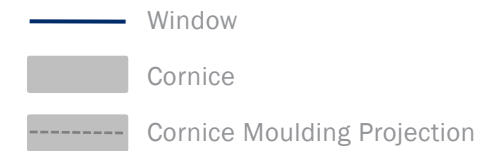

Use a steel tape measure to measure each window individually.

For a standard cornice provide measurements for the inside length of the cornice and the inside depth for each return.

REQUIRED MEASUREMENTS

- A. Inside Cornice Measurement
- B. Left Return
- C. Right Return

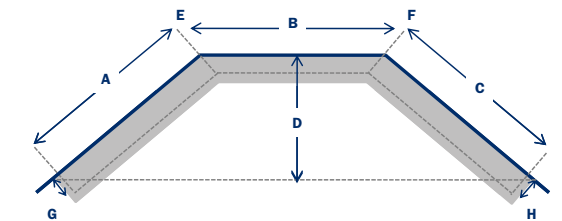

BAY WINDOW

For bay windows supply all inside cornice measurements required in the picture.

The inside of the cornice will be built according to the measurements provided.

The final cornice will ship in three pieces.

REQUIRED MEASUREMENTS

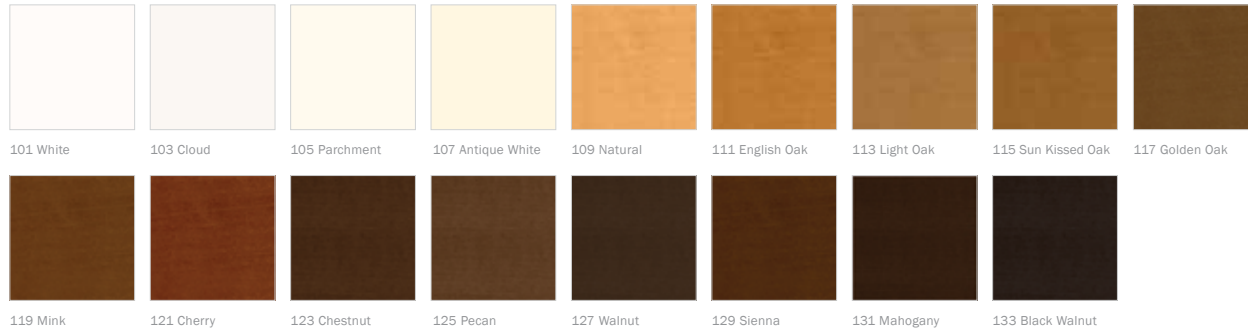

- A. Inside Cornice Measurement
- B. Inside Cornice Measurement
- C. Inside Cornice Measurement
- D. Depth
- E. Degree of Left Angle
- F. Degree of Right Angle
- G. Left Return
- H. Right Return

NOTE: Only inside measurements are required when ordering cornices. A cornice's outside measurements will differ from the inside measurements due to the thickness of the wood and cornice moulding projection. Depending on the style of cornice, the projection may range from 1/2" to 3" beyond the inside measurement of the cornice. Please take this measurement into consideration to ensure the cornice will fit properly in the designated space.
